MIL-T-46313B(MU)
AMENDMENT 2
15 December 1969
SUPERSEDING
AMENDMENT 1
28 April 1969

MILITARY SPECIFICATION

TELESCOPE, PANORAMIC: M117

This amendment forms a part of Military Specification MIL-T-46313B(MU) dated 10 December 1968.

* Paragraph 3.7.7: Delete entire paragraph and substitute new paragraph.

"3.7.7 Reticle accuracy.- The angular separation between the two 40 mil graduations on the horizontal axis shall be plus or minus 0.5 mil."

* Paragraph 3.9.1: Change inch ounce readings as indicated below:

"10 to 36" in lieu of "10 to 30"
"60" in lieu of "54"
"10 to 36" in lieu of "5 to 10"
"46" in lieu of "18"
"3 to 48" in lieu of "10 to 48".

* Paragraph 4.7.2.1.8: Delete entire paragraph and substitute new paragraph.

"4.7.2.1.8 Reticle accuracy.- Angular separation between the two 40 mil graduations may be determined by aligning one of the panoramic telescope's 40 mil graduation to the corresponding mark of the projected reticle or wall target. This alignment may be attained by activating the elevation and azimuth knobs. Observe coincidence between the other 40 mil graduation of the panoramic telescope and the corresponding mark of the projected reticle or wall target. This coincidence must be within the limits of 3.7.7."

*The outside margin has been marked to indicate where additions to the previous amendment has been made. This has been done as a convenience only and the Government assumes no liability whatsoever for any inaccuracies in this notation. Bidders and contractors are cautioned to evaluate the requirements of this document based on the entire content as written irrespective of the marginal notation and relationship to the last previous amendment.
