COMMERCIAL ITEM DESCRIPTION

ALGINATE COMPOUND SOLUTION, DENTAL

The General Services Administration has authorized the use of this Commercial Item Description.

This Commercial Item Description covers a ready-mixed dental alginate compound solution.

Salient characteristics:

General. The solution shall be suitable for use as a separating medium (tin foil substitute) during processing of pink or clear resin dentures, or resin tooth restorations in the dental laboratory.

Material. The alginate compound solution shall be a ready-mixed aqueous solution or colloidal suspension containing a refined alginate compound, a compatible germicide to inhibit the growth of micro-organisms, a non-precipitating preservative and a suitable dye indicator. The dye indicator shall be colored.

Physical properties. The viscosity of the solution shall be such as to permit application of thin, lump-free, non-gelatinous coats to dental casts. At freezing temperature (32^0F), no precipitate shall form. At lower temperatures, wherein the complete solution freezes, the solution shall revert to its original non-precipitate state and properties on thawing.

AMSC N/A FSC 6520

DISTRIBUTION STATEMENT A. Approved for public release, distribution is unlimited.

Performance. The dried film, formed by coating the mold surfaces of stone, plaster or other investments with the solution, shall have the following characteristics:

Shall be thin, glazed, hard, and non-peeling.

Shall be insoluble in water and shall be an effective moisture barrier between the stone investment, or plaster surfaces and the denture or restoration.

The dye indicator color shall disappear and shall not stain restorations.

Shall be capable of withstanding trial mold packing with polyethylene sheets and normal processing procedures without becoming dislodged from the coated surface.

Shall not adhere to processed dentures or tooth restorations. The restoration, when removed from the flask, shall be free of adhering plaster or stone.

Delivery schedule. Not more than 3 months shall have elapsed from the date of manufacture to the date of delivery to the Government.

Instructions. The solution shall be supplied with complete instructions for use to include the method of application of the solution and the number of coats to be applied.

Workmanship. The alginate compound solution and its container shall be furnished clean and free of particulate or foreign matter, and shall be free from defects which may detract from their appearance or impair their serviceability.

Unit. Bottle (BT). One bottle containing eight ounces (236 ml) of alginate compound solution, as specified, constitutes one unit. Each bottle shall be packaged in a leakproof closure with instructions for use.

Quality Assurance Provisions.

Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the contractor is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract or purchase order, the contractor may use his own or any facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure supplies and services conform to prescribed requirements.

Records. Records of examinations and tests performed by or for the contractor shall be maintained by the contractor and made available to the Government upon the Government's request, at any time, or from time to time, during the performance of the contract and for a period of three years after delivery of the supplies to which such records relate.

Inspection. Inspection, as used herein, is defined as both examination (such as visual or auditory investigation without the use of special laboratory appliances or procedures) and testing (determination by technical means of physical and chemical properties) of the item.

Sampling for inspection. Sampling for inspection shall be conducted in accordance with MIL-STD-105. Where feasible, the same sample shall be used for the determination of two or more examination characteristics. The unit of product for inspection purposes shall be one bottle of alginate. Unless otherwise specified, sampling for examination shall be conducted at inspection level II, AQL 2.5, and sampling for tests (when applicable) shall be conducted at inspection level S-1, AQL 1.0.

Check the source to verify that this is the current version before use.

Examination. The solution shall be examined to determine compliance with specification requirements. Solution shall be examined for defects including, but not limited to those listed below.

Defects

Solution not free of lumps or is gelatinous.

Solution not free of precipitate or particulates.

The bottle or bottle closure leaks.

Tests. Tests shall be conducted to determine compliance with specification requirements. The solution shall be used in accordance with manufacturer's instructions and the performance properties shall be tested using dental prosthetic procedures.

Contractor certification. The contractor shall certify that the product offered meets the the salient characteristics of this description and conform to the producers' own drawings, specifications, standards, and quality assurance practices. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Regulatory requirements.

Federal Food, Drug and Cosmetic Act. If the product covered by this document has been determined by the U.S. Food and Drug Administration to be under its jurisdiction, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of the Federal Food, Drug and Cosmetic Act, as amended, and regulations promulgated thereunder. In addition, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with tne requirements of all other applicable Federal, State, and local statutes, ordinances, and regulations.

Recovered materials. The offeror/contractor is encouraged to use recovered material in accordance with Public Law 94-580 to tne maximum extent practical.

INSTRUCTIONS In a continuing effort to make our standardization documents better, the DoD provides this form for use in submitting comments and suggestions for improvements. All users of military standardization documents are invited to provide suggestions. This form may be detached, folded along the lines indicated, taped along the loose edge (DO NOT STAPLE), and mailed. In block 5, be as specific as possible about particular problem areas such as wording which required interpretation was too rigid, restrictive, loose, ambiguous, or was incompatible, and give proposed wording changes which would alleviate the problems. Enter in block 6 any remarks not related to a specific paragraph of the document. If block 7 is filled out, an acknowledgement will be mailed to you within 30 days to let you know that your comments were received and are being considered.

NOTE: This form may not be used to request copies of documents, nor to request waivers, deviations, or clarification of specification requirements on current contracts. Comments submitted on this form do not constitute or imply authorization to waive any portion of the referenced document(s) or to amend contractual requirements.
