COMMERCIAL ITEM DESCRIPTION

SACK, SHIPPING, PAPER (REINFORCED)

This commercial item description, has been approved by the General Services Administration.

1. SCOPE. This description covers reinforced paper sacks for shipping items weighing not more than 4.535 kg (10 pounds).

2. SALIENT CHARACTERISTICS.

2.1. Construction. Sacks shall be fabricated from water resistant, reinforced kraft paper. The fabricated sacks shall pass the water resistance test and the impact resistance test.

2.3. Dimensions. Dimensions of the sacks shall be outside measurements, expressed as width by length. Dimensions shall be as specified with a tolerance of ± 6.35 mm (± 1/4"). Unless otherwise specified, sack opening shall be on the short side.

2.4. Workmanship. Sacks shall be uniformly constructed and free from holes, tears, cuts, splits, or other defects which might impair their usefulness. Sacks shall be free from sharp edges on the inside which might cause paper cuts to persons inserting or removing material.

Beneficial comments, recommendations, additions, deletions, clarifications, etc. and any data which may improve this document, should be sent to: General Services Administration, Federal Supply Service, 26 Federal Plaza, New York N.Y. 10278 ATTN: Engineering Branch (2FYEE).

3. REGULATORY REQUIREMENTS.

3.1. Certification. The contractor shall certify that the kraft paper used in the manufacture of this item contains a minimum of 5% Post Consumer Material (PCM), in accordance with Title 40 of the Code of Federal Regulations Part 247, Comprehensive Guideline for Procurement of Products Containing Recovered Materials; Final Rule. The Government reserves the right to require proof of such conformance prior to first delivery, and thereafter as may be otherwise provided for under the provisions of the contract.

4. QUALITY ASSURANCE.

4.1. Product conformance. The product provided shall meet the salient characteristics of this commercial item description, conform to producer's own drawings, specifications, standards, and quality assurance practices and be the same product offered for sale in the commercial market. The Government reserves the right to require proof of such conformance.

4.2. Water resistance test. Two drops of water shall be placed on the outside of the sack and covered with a watchglass. The water shall remain on the outside of the sack without being absorbed for not less than 10 minutes.

4.3. Impact resistance test. Determine the cubic capacity of the sack by multiplying the three factors F1, F2, and F3, together:

Cubic capacity = F1 x F2 x F3
F1 = specified length
F2 = 90% of specified width
F3 = 10% of specified width

Fill a graduated cylinder or similar volumetric device to 75% of the cubic capacity of the sack with dry, unpopped, popcorn. Transfer the popcorn to the sack and seal the open end of the sack with packaging tape. Drop each sack 6 times from a height of 91 cm (36") onto a hard, unyielding surface such as uncarpeted concrete. The sack shall be dropped once on each face and once on each side. If any popcorn spills from the sack, the sack does not pass the impact resistance test.

5. PACKAGING, PACKING AND MARKING. Packing, packing and marking shall be as specified in the contract or purchase order.

6. REFERENCED DOCUMENTS. The issue of the referenced documents in effect on the date of the solicitation for offers or request for proposals shall be used to determine conformance with the requirements of this Commercial Item Description.

6.1. CFR, Title 40, Code of Federal Regulations, Protection of the Environment, Part 247. Copies may be purchased with a VISA, Master Card or prepaid check through: Government Printing Office, Washington DC; Phone 202-783-3238. When ordering ask for: Title 40, Parts 190-250; Stock Number: 869-013-00-146-0.

7. NOTES.

7.1. Ordering data. Purchasers shall specify the following in the contract or purchase order:

7.1.1. Dimensions, expressed as width by length.
7.1.2. Packaging, packing and marking required.

7.2. List of NSNs:
