COMMERCIAL ITEM DESCRIPTION
FILE, HAND (AMERICAN PATTERN), THREE SQUARE

The General Services Administration has authorized the use of this commercial item description by all federal agencies.

1. SCOPE. This commercial item description covers hand files used for filing internal angles, clearing out corners, and for filing taps and cutters in the annealed state.

2. CLASSIFICATION.

Type I – Bastard-cut
Type II – Second-cut
Type III – Smooth-cut

3. SALIENT CHARACTERISTICS.

3.1 Design. The file shall be tapered on all sides at least one-third (1/3) of the length to the point. Double-cut on each surface (two sets of parallel cuts on the surface, one set crossing the other). Sides at any point on the file shall be of equal width. Edges set (blunted), then double-cut. No portion shall extend outside of the area of the largest cross-section of the file. The file shall be furnished in three (3) types and assorted sizes as shown in section 3.2.

3.2 Dimensions.

Length	Dimensions at largest section A	Number of teeth per inch surface	
		Min	Max
Inches	Inch		
	Bastard-cut		
6	1/2	33	37
8	5/8	25	29
10	3/4	22	25
	Second-cut		
6	1/2	43	49
8	5/8	36	41
10	3/4	31	35
	Smooth-cut		
6	1/2	55	61
8	5/8	44	49
10	3/4	39	44

Length dimension: Measured from the point (free or front end) to the heel (junction of the tang with the body of the file) and have a tolerance of ± 1/8 inch.

Tolerance: Width (A) - ±1/16 inch.

3.3 Material. The file shall be of a carbon alloy steel.

3.4 Tang. Shall be of a conventional shape and size suitable for attachment to a wood handle. Tempered to a maximum hardness of 45 on the Rockwell C scale when tested per ASTM E18. It shall be measured at a point approximately midway of its length and width.

3.5 Teeth. Shall be uniformly cut or etched and of uniform height throughout the fully cut portion. Cutting surfaces shall be hardened to a uniform hardness. The distance between the heel and point of the file, excluding the tang, shall be hardened to not greater than 68 nor less than 64 on the Rockwell C scale when tested per ASTM E18. The file shall be free from decarburization and brittleness.

3.6 Marking. The file shall be marked with the name of the manufacturer or with a trademark of such known character that the source of manufacture may be readily determined.

3.7 Workmanship. The teeth of the file shall be well-defined, sharp, and uniform in height and form. There shall be no evidence of rust or other defect which may impair serviceability, durability or appearance.

4. REGULATORY REQUIREMENTS.

Check the source to verify that this is the current version before use.

4.1 Recovered Materials. The offeror/contractor is encouraged to use recovered materials to the maximum extent practicable, in accordance with paragraph 23.403 of the Federal acquisition Regulation (FAR).

4.2 Metric products. Products manufactured to metric dimensions will be considered on an equal basis with those manufactured using inch-pound units, provided they fall within the tolerances specified (using conversion tables contained in the latest revision of Federal Standard 376) and all other requirements of this document are met. If a product is manufactured to metric dimensions and those dimensions exceed the tolerances specified in the inch- pound units, a request should be made to the contracting officer to determine if the product is acceptable.

5. PRODUCT CONFORMANCE.

5.1 Product Conformance. The product provided shall meet the salient characteristics of this Commercial Item Description, conform to the producer's own drawing, specifications, standards, and quality assurance practices, and be the same product offered for sale in the commercial market. The government reserves the right to require proof of such conformance.

5.2 Responsibility for Inspection. Unless otherwise specified, the contractor is responsible for the performance of all inspection requirements and may use any commercial facilities (including the contractor's own facilities) suitable for performance of the inspection requirements, unless disapproved by the Government. The Government reserves the right to perform any of the inspections deemed necessary to assure the item conforms to the specified requirements.

6. PACKAGING. Preservation, packaging and marking shall be as specified in the contract or order.

7. NOTES. This section contains information of a general or explanatory nature that is not mandatory.

7.1 Source of Documents.

American Society for Testing and Materials (ASTM), 100 Barr Harbor Drive, PO Box C700, West Conshohocken, PA 19428-2959.

Federal Acquisition Regulation (FAR): Government Printing Office, Superintendent of Documents, Washington, DC 20401-9371.

GSA Specification Section (3FP-E), Suite 8100, 470 L'Enfant Plaza, SW, Washington, DC 20407.

7.2 Ordering data. Purchasers should select the preferred options permitted herein and should include the following information in procurement documents.

a. Title, number, and date of Commercial Item Description.
b. Type
c. Length
d. Packaging requirements.

7.3 National Stock Numbers (NSN's). A list of NSN's assigned that correspond to this CID. The list may not be indicative of all possible NSN's associated with the CID.
