COMMERCIAL ITEM DESCRIPTION

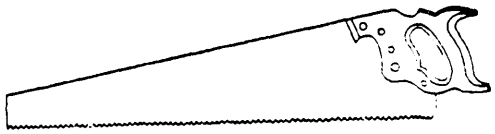

SAW, HAND, CROSSCUT
(NONSPARKING AND NONMAGNETIC)

The General Services Administration has authorized the use of this commercial item description.

This commercial item description covers one hand saw assigned National Stock Number (NSN) 5110-00-540-1693 having a blade made of a nonferrous alloy having a low sparking hazard and a low magnetic permeability.

Salient characteristics:

Handle. The handle shall be similar to the one in the illustration below and be made of straight-grained clear hardwood or a suitable fire-resistant or self-extinguishing plastic. The handle hole opening shall be not less than 3-3/4 inches in length, by 1-1/8 inches in width.

Blade. The blade shall have 8 teeth to the inch, be 24 inches long (distance between the teeth nearest the ends of the saw blade), and be made of beryllium copper or aluminum bronze alloy having an iron content not over five percent, and when present, it shall be well diffused throughout the alloy. When tested with a magnetic permeability indicator conforming to Military Specification MIL-I-17214, the magnetic permeability shall not be above 1.2 on the indicator scale. Fasteners used to assemble the blade to the handle shall be made of the same material as the blade or of aluminum.

Workmanship. Blades shall be straight along their length and uniform in width and have well defined and ground cutting edges. Handles shall be comfortable to the hand and securely assembled to the blade. There shall be no imperfections which would impair durability, serviceability, or appearance.

Marking. Each saw shall be marked in a plain and permanent manner with name, abbreviation, or chemical symbol of the alloy, the manufacturer's name or trademark of such known character that the source of manufacture may be readily determined, and the country of origin.

Quality assurance provisions. Sampling for inspection shall be in accordance with MIL-STD-105, Sampling Procedures and Tables for Inspection by Attributes, except where otherwise indicated herein. The lot size shall consist of all saws offered for acceptance at one time. A sample unit shall be one saw.

A. Examination for design, dimensions and workmanship. The inspection level shall be S-2 with an acceptable quality level (AQL) of 4.0 percent defective.

B. Material. Material shall be ascertained by manufacturer's certification.

FSC 5110

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

Regulatory requirements. The offerer/contractor is encouraged to use recovered materials in accordance with Public Law 94-580, as amended, to the maximum extent practicable.

Preservation, packaging, packing, labeling, and marking. The preservation, packaging, packing, labeling, and marking shall be as specified in the contract or order.

Notes:

The issue of referenced documents in effect on the date of invitation for bid or request for proposals shall be used to determine compliance with the stated requirements. Sources for obtaining referenced documents may be determined by contacting the Contracting Officer.

MILITARY INTERESTS:

NONE: DoD has determined that no military activity has in official interest in this commercial item description.

PREPARING ACTIVITY:

GSA-FSS
