MILITARY SPECIFICATION

RESISTORS, FIXED, FILM, CHIP, ESTABLISHED RELIABILITY,
GENERAL SPECIFICATION FOR

This amendment forms a part of MIL-R-55342F, dated 28 June 1995, and is approved for use by all Departments and Agencies of the Department of Defense.

PAGE 9

After 3.5.2.2, add new paragraph as follows:

"3.5.2.3 Transition requirements from previous revision. Due to significant changes in this revision of the specification, the following transition requirements shall be followed by the QPL manufacturers:

a. Raw material inventories, including plate stocks can be considered in-process materials for finished parts to the previous revision. QPL manufacturers can continue to manufacture Revision E QPL product through June 30, 1996 using this inventory. As of July 1, 1996, all MIL-R-55342 products shall be manufactured to the latest revisions of the MIL-R-55342 specifications. No further production of QPL resistors to the previous revisions shall be allowed after June 30, 1996. Manufacturing lot date codes shall reflect this decision. That is, all product with a date code representing the date of July 1, 1996, or after, must be manufactured to, and meet the requirements of Revision F.

b. QPL resistors manufactured to the previous revisions that are currently in inventory or that will be placed in inventory according to the procedure outlined in a. above shall still be considered JAN QPL product. However, this product shall not be offered on orders that are specifically requesting the QPL product to the latest specification revision of the MIL-R-55342 documents. This QPL product shall only be offered on orders where the QPL product to the previous revisions is acceptable to the procuring activity.

c. Any order which specifically identifies the latest revision of MIL-R-55342 and the detail specification shall not be filled with the previous revision product. Manufacturers shall supply the QPL product on these orders that meet the latest revisions. In some cases, it might be possible to upgrade existing QPL products to meet the requirements of the new revision. However, specific approval from the qualifying activity is required (including identification of specific part numbers, tests, ect.) before any upgrading can occur."

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

4.6.1.2.5.2, fourth sentence, delete and substitute the following:

"If the lot fails this solderability test, the lot may be reworked a second time and retested. If the lot fails the second rework, the lot shall be considered to have failed and that product will not be supplied to the requirements of this specification."

PAGE 35

4.7.12.1, after third sentence, add the following: "(for terminations S, T, and D the applied force shall be 0.75 kilograms)".

4.7.12.1, after fourth sentence, add the following: "(for terminations S, T, and D the applied force shall be 1.5 kilograms)".

PAGE 36

4.7.12.2, after third sentence, add the following: "(for terminations S, T, and D the applied force shall be 0.75 kilograms)".
