INCH-POUND
MIL-R-55342/6E
AMENDMENT 1
4 June 1996

MILITARY SPECIFICATION

RESISTORS, FIXED, FILM, CHIP, ESTABLISHED RELIABILITY STYLE RM0705

This amendment forms a part of MIL-R-55342/6E, dated 28 June 1995, and is approved for use by all Departments and Agencies of the Department of Defense.

PAGE 2

After 3.2, add new paragraph as follows:

"3.2.1 Transition requirements from previous revision. Due to significant changes in MIL-R-55342, revision F, and this specification, the following transition requirements shall be followed by the QPL manufacturers:

1. Raw material inventories, including plate stocks can be considered in-process materials for finished parts to the previous revision. QPL manufacturers can continue to manufacture MIL-R-55342/6(Revision E) QPL product through June 30, 1996 using this inventory. As of July 1, 1996, all MIL-R-55342 products shall be manufactured to the latest revision of this MIL-R-55342 specification. No further production of QPL resistors to the previous revision shall be allowed after June 30, 1996. Manufacturing lot date codes shall reflect this decision. That is, all product with a date code representing the date of July 1, 1996, or after, must be manufactured to, and meet the requirements of Revision F.

2. QPL resistors manufactured to the previous revisions that are currently in inventory or that will be placed in inventory according to the procedure outlined in 1. above shall still be considered JAN QPL product. However, this product shall not be offered on orders that are specifically requesting QPL product to the latest specification revision Revision F or later of the MIL-R-55342 documents. This QPL product shall only be offered on orders where the QPL product to the previous revision is acceptable to the procuring activity.

3. Any order which specifically identifies the latest revision of MIL-R-55342 and the detail specification shall not be filled with the previous revision product. Manufacturers shall supply QPL product on these orders that meet the latest revisions. In some cases, it might be possible to upgrade existing QPL products to meet the requirements of the new revision. However, specific approval from the qualifying activity is required (including identification of specific part numbers, tests, ect.) before any upgrading can occur. (NOTE: See MIL-R-55342F for similar transition requirements)."

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.
