COMMERCIAL ITEM DESCRIPTION

APPLICATOR, GLYCERIN-LEMON OIL IMPREGNATED

The General Services Administration has authorized the use of this commercial item description.

This commercial item description describes a swab stick saturated with a fresh lemon taste. The swab stick is used to refresh and moisten patient's mouth and lips.

Salient characteristics. Applicator, Glycerin-Lemon Oil Impregnated, shall be disposable, and suitable and safe for use as an oral lubricant. The applicator shall consist of a flexible plastic handle not less than 3-3/4 inches (95 mm) with a lint-free Purified Cotton, USP or Purified Rayon, USP, tip on the distal end. The tip shall be pear-shaped, having a minimum diameter of approximately 7/16 inch (11 mm) . The tip shall be securely attached to the end of the handle with glue, without interference with absorbency of the fibers. The immediate container shall contain three applicators impregnated with a lemon-flavored glycerin solution. The applicator shall have a minimum of 2 years shelf-life.

Workmanship. The applicators shall be free from defects which detract from its appearance or impair its serviceability.

Immediate container. The immediate container shall be a foil or plastic hermetically sealed, tear-open envelope which will allow the contents to remain clean, moist and ready for use until the envelope is damaged or opened. The immediate container shall contain three applicators.

Unit. Package (PG). One package containing twenty-five immediate containers, as specified, constitutes one unit. Packaging for the VA applicator shall appear in the solicitation.

Sampling for inspection. Sampling for inspection shall be conducted in accordance with MIL-STD-105. The unit of product for inspection purposes shall be 3 applicators in their immediate container. Unless otherwise specified, sampling for examination shall be conducted at inspection level II, AQL 2.5 percent defective, and sampling for tests (when applicable) shall be conducted at inspection level S-1, AQL 1.0 percent defective.

Metric products. Products manufactured to metric dimensions will be considered on an equal basis with those manufactured using inch-pound units, providing they fall within the tolerances specified using conversion tables contained in the latest revision of Federal Standard No. 376, and all other requirements of this document are met.

If a product is manufactured to metric dimensions and those dimensions exceed the tolerances specified in the inch-pound units, a request should be made to the contracting officer to determine if the product is acceptable.

The contracting officer has the option of accepting or rejecting the product.

Contractor certification. The contractor shall certify that the product offered meets the salient characteristics of this description and conforms to the producers' own drawings, specifications, standards, and quality assurance practices. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Regulatory requirements

Federal Food, Drug and Cosmetic Act - If the product covered by this document has been determined by the U.S. Food and Drug Administration to be under its jurisdiction, the offeror/contractor shall comply, and be responsible for compliance by it subcontractors/suppliers, with the requirements of the Federal Food, Drug and Cosmetic Act, as amended, and regulations promulgated thereunder. In addition, the offeror/contractor shall comply, and be responsible for compliance by its contractors/suppliers, with the requirements of all other applicable Federal, State, and local statutes, ordinances, and regulations.

Recovered materials - The offeror/contractor is encouraged to use recovered material in accordance with Federal Acquisition Regulation Subpart 23.4 to the maximum extent practical.

Preservation, packaging, packing, labeling, and marking - Unless otherwise specified, preservation, packaging, and packing shall be to a degree of protection to preclude damage to containers and/or contents thereof under normal shipping conditions, handling, etc., involving shipment from the supply source to the receiving activity, plus reshipment from receiving activity, and shall conform to applicable carrier's rules and regulations. Intermediate and exterior package quantities and labeling and marking shall be as specified in the contract and/or order.
