COMMERCIAL ITEM DESCRIPTION

EGG WHIP

The General Services Administration has authorized the use of this commercial item description as a replacement for RR-W-456 which has been cancelled.

1. SCOPE AND CLASSIFICATION

1.1 Scope. This commercial item description covers corrosion-resisting eggwhips.

1.2 Classification. The eggwhips shall be of the following sizes:

Size 1 - 12 inch overall length

Size 2 - 16 inch overall length

2. APPLICABLE DOCUMENTS

2.1 The documents referenced in this commercial item description shall be the issues in effect on the date of issuance of the invitation for bids or request for proposal unless otherwise specified. These documents form a part of this commercial item description to the extent specified. In the event of a conflict between this commercial item description and a document referenced herein, this commercial item description shall take precedence.

Federal Standard:

FED-STD-376 - Preferred Metric Units For General Use By The Federal Government.

Beneficial comments, recommendations, additions, deletions, clarifications, etc. and any data which may improve this document should be sent to: General Services Administration, Engineering Group (7FXEE), 819 Taylor St., Fort Worth, TX 76102

DISTRIBUTION STATEMENT A: Approved for public release; distribution is unlimited.

FSC 7330

Check the source to verify that this is the current version before use.

Copies of Federal standards are available from the General Services Administration Business Service Centers in Boston, MA; New York, NY; Philadelphia, PA; Washington, DC; Atlanta, GA; Chicago, IL; Kansas City, MO; Fort Worth, TX; Denver, CO; San Francisco, CA; Los Angeles, CA; and Seattle, WA.

Military Standard:

MIL-STD-105 - Sampling Procedures and Tables for Inspection by Attributes.

Copies of military standards may be obtained from Standardization Documents Order Desk, Bldg. 4D, 700 Robbins Avenue, Philadelphia, PA 19111-5094.

ASTM Standards:

A 167 - Standard Specification for Stainless and Heat-Resisting Chromium-Nickel Steel Plate, Sheet and Strip.
E 29 - Standard Practice For Using Digits In Test Data To Determine Conformance With Specifications.

Application for copies of ASTM standards should be addressed to ASTM, 1916 Race Street, Philadelphia, PA 19103.

National Sanitation Foundation (NSF):

Criteria C-2 - Special Equipment and/or Devices.

Annual Listing - Food Service Equipment and Related Products, Components and Materials.

Application for NSF documents should be addressed to the National Sanitation Foundation, 3475 Plymouth Road, P.O. Box 1468, Ann Arbor, MI 48106.

3. SALIENT CHARACTERISTICS

3.1 Design and construction. The eggwhips shall be fabricated from corrosion-resisting steel, type 302 or 304 conforming to ASTM A 167. The eggwhip shall have the specified number of bow wires fastened to a tubular metal handle or molded plastic handle. The minimum space between the bow wires at the handle shall be 1/16 inch. The handle shall be sealed at the end opposite the bow wires and at the point of entry of the bow wires with non-toxic solder or epoxy in order to prevent accumulation of foreign material. The handles shall be a minimum of 4 inches in length and 1 inch in diameter.

Check the source to verify that this is the current version before use.

3.1.1 Size 1. The size 1 eggwhip shall be 11-1/2 to 12-1/2 inches in overall length and have a minimum bow diameter of 2-1/2 inches. The size 1 eggwhip shall have a minimum of eight bow wires. The bow wires shall have a minimum diameter of 0.078 inch.

3.1.2 Size 2. The size 2 eggwhip shall be 15-1/2 to 17 inches in overall length and have a minimum bow diameter of 2-3/4 inches. The size 2 eggwhip shall have a minimum of seven bow wires. The bow wires shall have a minimum diameter of 0.090 inch.

3.2 National Sanitation Foundation (NSF) compliance. Prior to approval of first shipment, the contractor shall submit to the contracting officer or his authorized representative satisfactory evidence that the items offered meet the applicable requirements of NSF Criteria No. C-2. Satisfactory evidence of this compliance may be any of the following:

(1) A listing in the current edition of the NSF "Listing of Food Service Equipment" and display of the NSF seal on the finished item, or

(2) A certification issued by NSF under this special one-time contract evaluation/certification service, or

(3) A certified test report from a recognized independent testing laboratory acceptable to the contracting officer or authorized representative of the service for which the items are being procured, indicating that the item has been tested and conforms to NSF Criteria No. C-2.

3.3 Marking. The eggwhip shall be marked with the manufacturer's name, trade name, or trademark by means of a hang tag or adhesive decal.

3.4 Workmanship. The eggwhips shall be clean and free from any burrs, slivers, scratches, rough die marks, or excess solder. The eggwhips shall not be fractured, buckled, bent, punctured, malformed, or damaged.

3.5 Regulatory requirements. The offeror/contractor is encouraged to use recovered materials in accordance with Public Law 94-580 to the maximum extent practicable.

3.6 Metric products. Products manufactured to metric dimensions will be considered on an equal basis with those manufactured using inch/pound units, provided they fall within the tolerances specified using conversion tables contained in the latest revision of FED-STD-376, and all other requirements of this commercial item description are met.

3.7 Commercial item. The use of the term "commercial item description" in this document does not imply that any item or items offered are not required to conform with all requirements specified herein.

4. QUALITY ASSURANCE PROVISIONS

4.1 Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the contractor is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract or order, the contractor may use his own or any other facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure that supplies and services conform to prescribed requirements.

4.2 Sampling. The levels of inspection and acceptable quality levels (AQL's) shall be in accordance with MIL-STD-105.

4.3 Lot formation. All eggwhips from the same manufacturer of the same size offered for delivery at one time shall be considered a lot for purposes of inspection.

4.4 Sampling for visual and dimensional examination. A random sample of eggwhips shall be selected from each lot in accordance with inspection level S-4, AQL 4.0 expressed in terms of defects per hundred units. The sample unit shall be one eggwhip. The sample eggwhips shall be visually and dimensionally examined to verify compliance with table I and the remainder of this commercial item description. All dimensions are absolute as defined in ASTM E 29.

TABLE I. Classification of defects

Examine	Defect
Finish	Area of corrosion, stain or discoloration
Construction and Workmanship	Scratch or tool mark 1/
	Any sharp edge, sliver, rough tool or die mark, or burr
	Any component fractured, split, bent, buckled, punctured or otherwise impaired
	Handles not completely sealed
	Any dimension not as specified
Marking	Missing or illegible

1/ - An unacceptable scratch is one that will catch a fingernail when run across it.

Check the source to verify that this is the current version before use.

4.5 Examination for preparation for delivery. A random sample of shipping containers shall be selected from each lot for examination of the unit, intermediate and shipping containers (as applicable) for conformance with the preservation, packaging, packing, labeling, and marking required in the contract or order. Samples shall be selected in accordance with inspection level S-2, AQL 6.5, expressed in terms of defects per hundred units.

5. PREPARATION FOR DELIVERY

5.1 Packaging, packing, and marking. The packaging, packing, and marking shall be as specified in the contract or order.

6. NOTES

6.1 Ordering data. Purchasers should select the preferred options permitted herein and include the following information in procurement documents (if applicable).

a. Title, number and date of this commercial item description.
b. Size required.
c. The packaging, packing, and marking required.

6.2 National Stock Numbers (NSN's): The following is a list of NSNs assigned which correspond to this CID. The list may not be indicative of all possible NSN's associated with this CID.

NSN	Size
7330-00-205-3336	1 - 12 inch length
7330-00-815-1458	2 - 16 inch length
