GG–W–262a
10 DECEMBER 1952

SUPERSEDING
Int. Fed. Spec. GG–W–262 (Navy–BuMed)
17 March 1952

FEDERAL SPECIFICATION

WHEEL, POTTER'S

This specification was approved by the Commissioner, Federal Supply Service, General Services Administration, for the use of all Federal agencies.

1. SCOPE AND CLASSIFICATION

1.1 Scope.—This specification covers potter's wheel, of the foot-treadle type, for use in ceramic work in occupational therapy.

1.2 Classification.

1.2.1 *Type and grade.*—The potter's wheel covered by this specification shall be of one type and grade.

2. APPLICABLE SPECIFICATIONS

2.1 There are no other specifications applicable to this specification except those referenced in section 7 by individual departments.

(Copies of Federal specifications and the Federal Specifications Index may be obtained upon application, accompanied by check, money order, cash, or Government Printing Office coupons, to the General Services Administration, Business Service Center, Region 3, Seventh and D Streets, S. W., Washington 25, D. C. This office will also honor deposit account numbers issued by the Government Printing Office. Single copies of product specifications required for bidding purposes are available without charge at the GSA Regional Offices in Boston, New York, Atlanta, Chicago, Kansas City, Mo., Dallas, Denver, San Francisco, Los Angeles, Seattle, and Washington, D. C. Prices of additional copies may be obtained from the GSA Regional Offices.)

3. REQUIREMENTS

3.1 Material. — All material in the unit shall be of high quality throughout, and suitable in all respects for the purpose intended.

3.1.1 *Worktable.* — Worktable shall be made of heavy cast, sandblasted aluminum.

3.1.2 *Flywheel.*—Flywheel shall be made of iron.

3.1.3 *Throwing head.* — Throwing head shall be made of aluminum.

3.1.4 *Shaft.*—Shaft shall be made of solid steel.

3.2 Construction.—The potter's wheel shall be operated by an off-center foot treadle, which, by its vertical action, propels a balanced flywheel; shall have a 12-inch throwing head which shall be connected to the flywheel by a shaft mounted on two bearings, and shall be capable of revolving several minutes when the slightest pressure is applied on the treadle. There shall be a natural drain into a removable water reservoir mounted under the table to permit wheel to be kept clean easily. There shall also be furnished a wedging device including bars and wire and an adjustable arm height rest 12 inches in width. All working mechanism, except flywheel, shall be completely enclosed. Over-all width shall be approximately 30 inches, and over-all height, approximately 36 inches. Worktable shall measure approximately 27 by 20 inches. Flywheel shall weigh approximately 80 pounds.

3.3 **Workmanship.**—Potter's wheel shall be constructed to insure ease and simplicity of operation, and shall be sturdily built and well balanced. Throwing head or wheel shall run on true level. Workmanship shall be first class throughout. The unit shall be free from defects which detract from its appearance or which may impair its serviceability.

4. SAMPLING, INSPECTION, AND TEST PROCEDURES

4.1 **Sampling.**—Unless otherwise specified, at least one potter's wheel shall be taken at random from each lot of 100 or fraction thereof delivered.

4.2 **Inspection.**—Samples shall be inspected for material, construction, workmanship, packaging, packing, and marking.

5. PREPARATION FOR DELIVERY

5.1 **Packaging.** — Unless otherwise specified, each potter's wheel shall be packaged in accordance with accepted commercial practice.

5.2 **Packing.**—The subject commodity shall be prepared for shipment to permit acceptance by carrier for transportation at the lowest applicable rate, and to afford maximum protection from normal hazards of transportation.

5.3 **Marking.**

5.3.1 *Packages.* — Unless otherwise specified, packages shall be marked with the name, type, and size of the commodity, the quantity contained therein, and the names of the manufacturer and contractor.

5.3.2 *Shipping containers.*—Unless otherwise specified, shipping containers shall be marked with the name, type, and size of the commodity as defined by the contract or order under which the shipment is made, the quantity contained therein, the name of the contractor, the number of the contract or order, the name and address of the consignee, and the gross weight.

6. NOTES

6.1 **Ordering data.**—Purchasers should exercise any desired options offered herein. (See 4.1, 5.1, 5.3, 6.2, and 7.2.)

6.2 It is believed that this specification adequately describes the characteristics necessary to secure the desired material, and that normally no samples will be necessary prior to award to determine conformance to the requirements of this specification. If, for any particular purpose, samples with bids are necessary, they should be specifically asked for in the invitation for bids, and the particular purpose to be served by the bid sample should be definitely stated, the specification to apply in all other respects.

6.3 This specification covers the following item appearing in the Armed Services Catalog of Medical Matériel:

11–321–100—Wheel, Kick, Potters.

6.4 This specification does not include all types, classes, grades, sizes, etc., of the commodity indicated by the title of the specification, or which are commercially available, but is intended to cover the type, etc., normally procured for Federal Government requirements.

Patent notice.—When Government drawings, specifications, or other data are used for any purpose other than in connection with a definitely related Government procurement operation, the United States Government thereby incurs no responsibility nor any obligation whatsoever; and the fact that the Government may have formulated, furnished, or in any way supplied the said drawings, specifications, or other data, is not to be regarded by implication or otherwise as in any manner licensing the holder or any other person or corporation, or conveying any rights or permission to manufacture, use, or sell
