MATERIAL: The bottles shall be made of borosilicate glass in accordance with Federal Specification, DD-G-541, Type 1, Class A.

DESIGN: Type I bottle shall be cylindrical with a diameter of approximately 27 mm and a height of 70 mm (without stopper). Stopper shall have a 1.6 mm diameter vent hole.

Type II bottle shall be conical with a bottom diameter of approximately 40 mm. Stopper shall have a 1.6 mm diameter vent hole.

Types I and II are for determination of specific gravity in accordance with ASTM D70.

Type III shall be pear shaped with a perforated glass stopper that bears a corresponding identification number with the bottle. The volumes shall be adjusted at 20°C to within reasonable, small tolerances.

NOTE: Items differing from this Military Standard by minor variations in design or dimensions are considered standard under this document, provided such variations do not affect performance and are not in conflict with the material requirements specified herein.

APPROVED 7 JAN 1983 REVISED

This military standard is approved for use by all Departments and Agencies of the Department of Defense. Selection for all new engineering and design applications and for repetitive use shall be made from this document.
