COMMERCIAL ITEM DESCRIPTION

ADHESIVE TAPE, SURGICAL, 1 inch by 1-1/2 yards, 100s

This commercial item description covers a short length, adhesive tape which shall be suitable for use in medical and surgical procedures.

Salient characteristics:

The tape shall be a hypo-reactive, porous, pressure-sensitive, surgical adhesive tape manufactured entirely of synthetics. The adhesive tape shall be capable of being torn by hand across its width, shall be resistant to water, shall be coated on one side with adhesive and shall not cause adverse reactions with human skin, either physically or chemically. The adhesive tape shall be one inch wide and shall have a useable length of one and one half yards and shall be evenly wound with the adhesive mass to the inside, on a paper core having an inside diameter of one inch. The adhesive tape shall meet the requirements of Adhesive Tape, U.S.P., except for tensile strength and adhesive strength as noted below. The backing material shall be ethylene/vinyl acetate and the backing shall be perforated and clear. The adhesive shall be acrylic and shall be clear.

Performance. The adhesive tape shall comply with the following requirements.

Property	Requirement	Method
Tensile breaking strength, pound/inch of width	3.5 minimum	34.2 1/
Ultimate elongation: percent	50 minimum	34.2 1/
Adhesion to steel, ounces per inch of width	15 minimum	10.2 1/
Porosity, seconds	500 maximum	D726-59-A 2/
Unwind (oz./in.)	20 maximum	80.2 1/

1/ Federal Test Method Standard 147.
2/ American Society for Testing and Materials.

Resistance to water. After rolls of adhesive tape are soaked in water for 72 hours then dried for 24 hours at room temperature the tape shall comply with the unwind and adhesion to steel requirements.

Inspection/test dating period. The inspection test dating period shall be 36 months. Not more than 3 months shall have elapsed from the date of manufacture of the adhesive tape to the date of delivery to the Government.

Workmanship. The end item shall be uniform in quality and free from foreign matter and any defects that will affect life, serviceability, or appearance.

Packaging and packing quantities. Unit. Box (BX). One box containing one hundred wound strips of tape, as specified, constitutes one unit. Shipping container shall contain five units.

Contractor certification. The contractor shall certify that the product offered meets the salient characteristics of the description and conforms to the producers' own drawings, specifications, standards, and quality assurance practices, and is the same as the product offered for sale in the commercial marketplace. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Regulatory requirements. The offeror/contractor shall comply, and be responsible for compliance by their subcontractors/suppliers, with the requirements of the Federal Food, Drug and Cosmetic Act and regulations promulgated thereunder, and the requirements of all other applicable Federal and State statutes and regulations.

Recovered materials. Offerors/contractors are encouraged to use recovered material in accordance with Public Law 94-580 to the maximum extent practical.

Preservation, packaging, and packing. Unless otherwise specified, preservation, packaging, and packing shall be to a degree of protection to preclude damage to containers and/or contents thereof under normal shipping conditions, handling, etc., involving shipment from the supply source to the receiving activity, plus reshipment from receiving activity, and conforms to applicable carrier's rules and regulations.

For information only. The following product, as of the date of this document, are purported by the following company to meet the salient characteristics of the item described herein:

Minnesota Mining and Manufacturing Company
