DATA ITEM DESCRIPTION

Form Approved
OMB No. 0704-0188

1. TITLE	2. IDENTIFICATION NUMBER
MASTER ENGINEERING DOCUMENT LISTS (MEDL)	DI-MISC-81189

3. DESCRIPTION/PURPOSE

3.1 Provide information necessary for preparation, maintenance and delivery of Master Engineering Document Lists (MEDL).

4. APPROVAL DATE (YYMMDD)	5. OFFICE OF PRIMARY RESPONSIBILITY (OPR)	6a. DTIC APPLICABLE	6b. GIDEP APPLICABLE
910425	A/AMSTA-GDD		

7. APPLICATION/INTERRELATIONSHIP

7.1 This Data Item Description (DID) contains the format and content preparation instructions for the data product generated by the specific and discrete task requirement as delineated in the contract.

7.2 The MEDL shall be used to provide a master list cf part numbers to engineering documents (drawings, lists, specifications, etc.) number relationship and detail/subassembly to next higher assembly or end item document relationship.

(Continued on Page 2)

8. APPROVAL LIMITATION	9a. APPLICABLE FORMS	9b. AMSC NUMBER
		A6113

10. PREPARATION INSTRUCTIONS

10.1 Format. The MEDL shall be in contractor's format. Figure 1 shall be used as a sample guideline.

10.2 Content. The MEDL shall include the following:

10.2.1 Contractor engineering documents applicable to deliverable item(s) or services of this contract plus any additional data deliverables cited by the Contract Data Requirements List (CDRL), DD Form 1423.

10.2.2 Subcontractor, vendor, or supplier of engineering documents that are obtainable by the contractor in support of deliverable items.

10.2.3 Government/industry association specifications, standards, etc. which are referenced on contractor/vendor engineering documents.

10.3 Preparation instructions.

10.3.1 Size, Format, and Entry of Information. The size and format of the list shall be at the contractor's discretion unless otherwise defined by the procuring agency. The requirements contained in 10.3.3 shall be followed for the entry of information in the various blocks and columns of the list.

(Continued on Page 2)

11. DISTRIBUTION STATEMENT

DISTRIBUTION STATEMENT A: Approved for public release; distribution is unlimited.

Check the source to verify that this is the current version before use.

Block 7, Application/Interrelationship (Continued)

7.3 It will be used to record the total number of engineering documents required to support contract end items and as a cross reference to parts lists prepared for individual items and associated drawings, specifications, etc. for the item.

Block 10, Preparation Instructions (Continued)

10.3.2 Sequence. The engineering documents (drawings, lists, specifications, standards, etc.) required for a complete system or end item, shall be sequenced by main-group or main-assembly as follows:

System or End Item Drawing

. Documentation applicable to only the system or end items

. Assembly drawing number X

.. Documentation applicable only to assembly drawing number X

... Subassembly drawing Y referenced on assembly drawing number X

.... Documentation (specifications, standards, etc.) applicable only to subassembly drawing Y

.... Detail documentation for parts referenced on drawing Y

. Assembly drawing number Z

(Same breakdown as drawing X above)

The indenturing of these documents and the use of indenture codes shall be in accordance with 10.3.3.13.

10.3.3 Required Information and Sample Format:

10.3.3.1 Block 1, Contract Number. On each sheet, enter the contract number pertinent to the procurement of the complete system or end item which is identified by the top document number in 10.3.3.6.

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T10:44Z
Check the source to verify that this is the current version before use.

Block 10, Preparation Instructions (Continued)

10.3.3.2 Block 2, Revision Letter. When the list is initially prepared, enter a hyphen (-) on each sheet of the list. Each time any sheet of the list is revised, enter the appropriate revision letter (alphabetical sequence) on the revised sheet.

10.3.3.3 Block 3, Revision Date. When the list is initially prepared, enter a hyphen (-) on each sheet of the list. Each time any sheet of the list is revised, enter the appropriate revision on the revision sheet.

10.3.3.4 Block 4, Contractor. On each sheet, enter the name and address of the contractor (design/preparing activity).

10.3.3.5 Block 5, Commercial and Government Entity Code (CAGE). On each sheet, enter the CAGE Code assigned to the contractor/ vendor, as applicable, whose name is entered in block 4.

10.3.3.6 Block 6, End Item-System Designator. On each sheet, enter the end item/system designator (i.e., M915, XM1006, M1000, STE-R) to which the MEDL applies. When a designator has not been assigned, the top assembly drawing number of the item shall be entered in this block.

10.3.3.7 Block 7, Sheet Number. On each sheet, enter the appropriate sheet number (i.e., 1, 2, 3, etc.). When only one sheet is required for a list, "Sheet 1 of 1" will be entered. When two or more sheets are required for a list (i.e., 10 sheets), the total number of sheets shall be included on the first sheet only and "Sheet 1 of 10" shall be entered in this block. When a sheet is revised and additional sheets are required, the additional sheets shall be numbered in alpha sequence (i.e., Sheet "1", 1A", "1B", etc.).

10.3.3.8 Block 8, Type of Document Code. Enter the type of document code which identifies the document whose number is entered in block 9. The type of document codes are as follows:

CODE	TYPE OF DOCUMENT
AL	Application List
BM	Bill of Materials
CC	Classification Characteristics
CL	Connection List
DL	Data List
EL	Inspection Equipment List

Check the source to verify that this is the current version before use.

Block 10, Preparation Instructions (Continued)

FL	Functional List
GL	Gage List
IL	Index List
LD	Logic Diagram
ML	Material List/List of Material
NC	Numerical Control Data
PD	Program Data/Document
PL	Parts List
QA	Quality Assurance Data
QL	Qualified Source/Approved List
RL	Running List
SL	Schematic List or Specification List
SP	Company (Contractor) Specification
ST	Company (Contractor) Standard
TD	Tool Drawing or Tool Drawing List
TL	Tabulating List
TP	Test Procedures
TS	Test Specification
UL	Drawing Usage List
WD	Wiring Diagram
WL	Wiring List/List of Wire
WT	Wire Table or Wire Tabulation
1L	Procurement Data List
2L	Maintenance Data List
3L	Procurement/Maintenance Data List
4L	Procurement Data Package List (PDL)
LN	Revision Notice to a Basic Document

NOTE: Contractor may substitute their codes, along with definition, at the discretion of the procuring agency.

10.3.3.9 Block 9, Document Number. Enter the number of each document (drawing, list, specification, etc.) in accordance with 10.3.3.9.1 or 10.3.3.9.2, as applicable.

10.3.3.9.1 Prime Contractor/Vendor Numbers. The document numbers of all procured and used vendor items shall be entered. Only those document numbers which identify the vendor item used (assembly number for an assembly, part number for a detail part, etc.) are required.

10.3.3.9.2 Additions and deletions of document numbers shall be reflected in this block as follows:

a. Addition. Entry of new document number to this list shall be identified by a single asterisk (*) to the immediate right of affected document number. This asterisk shall only appear on the revised list implementing a new document number.

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T10:44Z
Check the source to verify that this is the current version before use.

Block 10, Preparation Instructions (Continued)

b. Deletion. A document number being deleted shall reflect a double asterisk (**) to the immediate right of affected document numbers. Subsequent revision shall not reflect a deleted document number which was shown on the previous list.

c. In lieu of 10.3.3.9.2.a and 10.3.3.9.2.b above, a separate addition/deletion list(s) may be provided as a supplement to the basic list.

10.3.3.10 Block 10, Sheet Number. Each sheet of a multisheet drawing shall be individually listed if each may be revised and issued independently. When the first sheet of drawing, reflected in block 10, contains the revision status of all sheets, only one entry will be required, and this will be the total number of sheets for that drawing.

10.3.3.11 Block 11, Commercial and Government Entity Code (CAGE). Enter the appropriate CAGE assigned to the contractor, subcontractor, vendor, supplier, etc., whose document number appears in block 9.

10.3.3.12 Block 12, Revision Letter(s). Enter the latest revision letter(s) applicable to the document whose number is entered in block 9.

10.3.3.13 Block 13, Indenture Number. Enter the indenture number applicable to the document whose number is entered in block 10. The number entered in this column shall indicate the relationship of engineering documents to the subassembly, assembly, main group, complete system, or end item, e.g.

1. Drawing for a complete system or end item.
2. Drawing for a main group or assembly.
2. Assembly drawing.
3. Drawing for attaching parts used on the assembly.
3. Parts list referenced on assembly drawing.
3. Detail drawings referenced on the assembly drawing.
3. Subassembly drawing referenced on the assembly drawing.
4. Detail drawings referenced on subassembly drawing.
4. Drawings for attaching parts used on the subassembly drawing.
2. Assembly drawing.
3. Detail drawings referenced on assembly drawing.
3. Specification referenced on assembly drawing.
3. Subassembly drawings referenced on the assembly drawing.

Check the source to verify that this is the current version before use.

Block 10, Preparation Instructions (Continued)

10.3.3.14 Block 14, Source Code. When items are source coded, the source code assigned to the hard item, delineated on the document shall be entered in this column. These codes are as follows:

A. Nonprocurable assembly which can be built up from details at any maintenance level.
A1. Same as A, but depot only.
M. Field manufacture, procurement not justified.
M1. Same as M, but depot manufacture.
P6. Parts which may be procured by open competition.
P7. Parts procurable only from selected sources.
P8. Parts which must be procured sole source.
U. Drawings, instruction sheets, parts not of maintenance significance, including obsolete parts.

10.3.3.15 Block 15, Rights Information. Enter the code which identifies the rights status of the information on the document whose number appears in block 10. The rights status codes are as follows:

a. "U" signifies that the Government has an unlimited right to use the document so coded.

b. "L" signifies that the Government has only a limited right to use the document so coded.

10.3.3.16 Block 16, Part Numbers. The part numbers, assigned to all parts used in the fabrication of the complete system or end item identified in block 5, shall be entered in this block. When parts are delineated on documents identified in block 10, the part numbers shall be entered as follows:

a. When only one part is delineated on a document, the applicable part number shall be entered. When the document and part number are the same, the part number shall be entered.

b. When two or more parts are delineated on a document (tabulated numbers), each part number assigned to the parts used in the end item or system shall be entered.

10.3.3.17 Block 17, Remarks.
