Delete present 3.6.1 and substitute the Yellowing:

3.6.1 Reliability. The contractor shall develop and submit to the Government testing activity for approval a reliability program integrated with the maintainability, human factors and safety programs. The program shall provide for the continuous monitoring and analysis throughout the design and construction of the test vehicle and its related instrumentation, of the reliability of materials, structures and electronic systems to perform their intended function. The program, in addition, shall provide for periodic reliability design reviews,"
