COMMERCIAL ITEM DESCRIPTION

GENERATOR, GAS ENVELOPE

The General Services Administration has authorized the use of this commercial item description.

This Commercial Item Description covers a transport bag with a carbon dioxide gas generator for anaerobic bacteria.

Salient Characteristics:

Shall be a disposable transport and isolation system for bacteria requiring a carbon dioxide enriched environment for growth.

Shall consist of the following:

One (1) transparent bag that is sealable with a heat sealing appliance (not required to be supplied with the system).

One (1) carbon dioxide generator.

Shall be supplied with instructions on the proper use of the system.

Shall be supplied with a bag that is large enough to hold a standard petri dish that includes a size of 150 millimeters in diameter or square. The bag shall allow for visual inspection of its contents without compromising the carbon dioxide environment after sealing.

Shall generate and maintain a carbon dioxide enriched atmosphere, in accordance with the instructions, for a period of up to 48 hours.

Workmanship. The transportation and isolation system shall be free from defects which detract from its appearance or impair its serviceability.

AMSC N/A FSC 6640

DISTRIBUTION STATEMENT A: Approved for public release; distribution is unlimited.

Unit. Package (PG). One package containing fifty Generators and Gas Envelopes, as specified, constitutes one unit.

Quality Assurance Provisions.

Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the contractor is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract or purchase order, the contractor may use his own or any facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure supplies and services conform to prescribed requirements.

Records. Records of examinations and tests performed by or for the contractor shall be maintained by the contractor and made available to the Government upon the Government's request, at any time, or from time to time, during the performance of the contract and for a period of three years after delivery of the supplies to which such records relate.

Inspection. Inspection, as used herein, is defined as both examination (such as visual or auditory investigation without the use of special laboratory appliances or procedures) and testing (determination by technical means of physical and chemical properties) of the item.

Inspections and tests. Inspections and tests shall be conducted on the transportation and isolation system in accordance with commercial practice to determine compliance with specification requirements. The sampling for inspections and tests shall be conducted in accordance with commercial practice.

Metric products. Products manufactured to metric dimensions will be considered on an equal basis with those manufactured using inch-pound units, providing they fall within the tolerances specified using conversion tables contained in the latest revision of Federal Standard 376, and all other requirements of this document are met. If a product is manufactured to metric dimensions and those dimensions exceed the tolerances specified in the inch/pound units, a request should be made to the contracting officer to determine if the product is acceptable. The contracting officer has the option of accepting or rejecting the product.

Contractor certification. The contractor shall certify that the product offered meets the salient characteristics of this description and conforms to the producers' own drawings, specifications, standards, and quality assurance practices. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Regulatory requirements.

Federal Food, Drug and Cosmetic Act. If the product covered by this document has been determined by the U.S. Food and Drug Administration to be under its jurisdiction, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of the Federal Food, Drug and Cosmetic Act, as amended, and regulations promulgated thereunder. In addition, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of all other applicable Federal, State, and local statutes, ordinances and regulations.

Recovered materials. The offeror/contractor is encouraged to use recovered material in accordance with Federal Acquisition Regulation Subpart 23.4 to the maximum extent practical.

Preservation, packaging, packing, labeling, and marking. Unless otherwise specified, preservation, packaging, and packing shall be to a degree of protection to preclude damage to containers and/or contents thereof under normal shipping conditions, handling, etc., involving shipment from the supply source to the receiving activity, plus reshipment from receiving activity, and shall conform to applicable carrier's rules and regulations. Intermediate and exterior package quantities and labeling and marking shall be as specified in the contract and/or order.

Ordering data. (Expiration dating period required, intermediate/exterior package quantities, labeling, and marking must be specified in the contract and/or order.
