DEPARTMENT OF DEFENSE
WASHINGTON, D.C. 20301

Listing of Fastener Manufacturers' Identification Symbols

MIL-HDBK-57B(IS)

1. This Military Handbook is approved for use by all Departments of the Department of Defense.

2. Beneficial comments (recommendations, additions, deletions) and any pertinent data which may be of use in improving this document should be addressed to: Commander, Defense Industrial Supply Center, ATTN: DISC-ESA, 700 Robbins Ave., Philadelphia, PA 19111-5096, by using the self addressed Standardization Document Improvement Proposal (DD Form 1426) appearing at the end of this document, or by letter.

3. Copies of this Military Handbook may be obtained from Naval Publications and Forms Center (NPFC), Code 1032, 5801 Tabor Road, Philadelphia, PA 19120, PH. # (215) 697-1187.

FOREWORD

This handbook is a compilation of the identifying symbols of fastener manufacturers as provided by the manufacturers themselves. This issue contains the names, addresses, and the symbols of all fastener manufacturers whose identifying symbols were received by August 31, 1990. For the purpose of this handbook, manufacturer is defined as the source which substantially makes the supplies, either by hand or machinery out of raw materials. Fasteners, as defined for the purpose of this handbook, refer to those threaded items included in Federal Stock Code (FSC) 5305 - Screws, 5306 - Bolts, 5307 - Studs and 5310 - Nuts. As additional manufacturers submit their markings, the handbook will be updated.

All requests to be listed in the handbook shall be addressed to:

Defense Industrial Supply Center
Attention: DISC-ESA
700 Robbins Avenue
Philadelphia, PA 19111-5096
USA

In addition to the alphabetic index of manufacturers (Index A), this revision of the handbook incorporates a listing of manufacturers indexed by their identification symbol (Index B).

At the back of this handbook is Registration Form FL-207. Manufacturers wishing to be listed must complete this form and return it to DISC. The submittal must be accompanied by a reproducible copy of the symbol used on the fastener. All submittals must be in the English language.

DISC does not "approve", "rate", or "endorse" any item, construction, proprietary device, or activity.

DISC is not responsible for the accuracy or completeness of the information contained in this publication.

DISC does not take any position with respect to the validity of any patent rights asserted in connection with any items mentioned in this document, and does not undertake to insure anyone utilizing a code, standard, or guide against liability for infringement of any applicable Letters Patent, nor assume any such liability. Users of a code, standard, or guide are expressly advised that determination of the validity of any such patent rights, and the risk of infringement of such rights, is entirely their own responsibility.

DISC reserves the right to monitor this document to ensure that it contains the listing of only bona-fide fastener manufacturers.

DISC has solicited the assistance of the Defense Contract administration Services (DCAS) and the Defense Contract Management Command International (DCMCI) in an effort to identify non-manufacturers and remove them from the manufacturers' listing. DCAS/DCMCI's evaluation of a company's status is based on an inhouse capability to manufacture fasteners (screws, bolts, studs and nuts), with respect to space, equipment and trained personnel. On an on-going basis, any company identified by DCAS/DCMCI as a non-manufacturer will be removed from the manufacturers' database and MIL-HDBK-57A(IS).

MARYLAND BOLT & NUT CO., INC. (CONT'D)

ASTM A394 Type T-0

Tower bolts: hex head, square head

Head markings also include: T-1 for medium carbon and T-3 for weathering alloy steel. Both require heat treating

NOTE: Round head step bolts require manufacturing head identification and proper markings as above, except length size

SAE J429 Grade 8

ASTM A354 Grade BD

Also (optional) that A354 is exhibited on top of head

MIL-B-857-A Grade 8

NOTE: Also covers round head bolts, i.e., carriage-plow and countersunk styles, etc.

ASTM A325 Type 1

NOTE: Also covers round head bolts, i.e., carriage-plow and countersunk styles, etc.

With line under A325 mark

ASTM A325 Type 3

NOTE: Also covers round head bolts, i.e., carriage-plow and countersunk styles, etc.

No Grade mark — only manufacturer's symbol

SAE J429 Grade 2

ASTM A307 Grades A & B

MIL-B-857-A Type 2 (ADM/5)

NOTE: Also covers round head bolts, i.e., carriage-plow and countersunk styles, etc.

With line under A490 mark

ASTM A490 Type 3

NOTE: Also covers round head bolts, i.e., carriage-plow and countersunk styles, etc.

MARYLAND BOLT & NUT CO., INC. (CONT'D)

Letters B7M on head

ASTM A193 Grade B-7-M

Alloy steel high temperature service bolting

Tempered to 100 ksi tensile strength

NOTE: Also covers SQ head and countersunk styles

Heavy head hex or regular configurations

Heavy hex for type C-3

Regular or heavy for DH3

Manufacturer's symbol and the number 3 or DH3 on face

For Grade C-3 three radial lines are also required

Heavy hex applications for C-3 and heavy or regular for DH3

Nuts for bolt applications

ASTM A325 type 3

ASTM A563 Grade DH3

Also covers square nut configurations

Heavy or regular

Manufacturer's symbol and the 2H or DH marking

Also can be supplied in regular configurations

Suitable for all Grade 8 and A325 or A490 bolts

Nuts for bolt applications

ASTM A194 Grade 2H

ASTM A563 Grade DH

Also covers square nut configurations

Heavy hex only

Manufacturer's symbol and three radial lines

Heavy hex applications only

Nuts for bolt applications

ASTM A563 Grade C

For ASTM A325 bolts

Also covers square nut configurations

SPS TECHNOLOGIES (CONT'D)

The following characters are used alone or in combination with other digits/letters which designate material, size, strength grade, or part number to indicate SPS as the manufacturing source:

C	K	U
CCS	K-5673	U130
EWB ①	KS	UNBRAKO ②
EWN ①	S	UWN
FNF	SPS ①	56878
HI PSI ①	TJB	71838
HI TI ①	TM9	80539

The following distinctive patterns are also used to identify inch socket head cap screws:

Straight knurls with an unknurled band adjacent to the bearing surface on socket heads. The diameter over the straight knurl does not exceed the band. There may be 2 or 3 groves near the band or a diamond knurl band at the top of head.

A raised or depressed triangle pointing from the wrenching flat toward thread on nut products

INSTRUCTIONS: In a continuing effort to make our standardization documents better, the DoD provides this form for use in submitting comments and suggestions for improvements. All users of military standardization documents are invited to provide suggestions. This form may be detached, folded along the lines indicated, taped along the loose edge *(DO NOT STAPLE)*, and mailed. In block 5, be as specific as possible about particular problem areas such as wording which required interpretation, was too rigid, restrictive, loose, ambiguous, or was incompatible, and give proposed wording changes which would alleviate the problems. Enter in block 6 any remarks not related to a specific paragraph of the document. If block 7 is filled out, an acknowledgement will be mailed to you within 30 days to let you know that your comments were received and are being considered.

NOTE: This form may not be used to request copies of documents, nor to request waivers, deviations, or clarification of specification requirements on current contracts. Comments submitted on this form do not constitute or imply authorization to waive any portion of the referenced document(s) or to amend contractual requirements.
