* 3.20.5, delete in its entirety and substitute:

"3.20.5 Infrared (IR) filter for type I, type II, type III, type IV, and type V flashlights. The IR filter for the type I, type II, and type IV flashlights shall have a configuration similar to figure 12 and shall be fabricated from plastic. The IR filter for the type III and type V flashlights shall have a configuration similar to the lenses furnished with type III and type V flashlights, respectively, and shall be fabricated from plastic. When tested as specified in 4.6.7.4, the IR filter shall have the following spectral transmission qualities:

a. The light emitted when using the IR filter shall be no more visible than the light emitted when not using the IR filter.

b. Ninety-five percent (95%) of all energy emitted between wavelengths of 300 and 1100 nanometers shall be concentrated between 400 and 700 nanometers.

In addition to the above requirements, the letters "IR" shall be molded onto the IR filter for the type I, type II, type III, and type IV flashlights."
