MIL-F-51079D
INT. AMENDMENT 1(EA)
17 February 1988

MILITARY SPECIFICATION

FILTER, MEDIUM, FIRE-RESISTANT, HIGH-EFFICIENCY

This interim amendment is approved for use within the U.S. Army Chemical Research, Development and Engineering Center, Department of the Army, with MIL-F-51079D, dated 14 March 1985.

PAGE 8

4.2.4.4: Delete in its entirety and substitute the following:

"4.2.4.4 Mildew resistance. Unless otherwise specified (see 6.2), mildew resistance tests of the medium shall be conducted in accordance with method 5750 of Fed Test Method No. 191 with the exception that the paragraph entitled 'INOCULUM' in the procedure section shall be changed so that the spore suspension shall be filtered according to the following procedure instead of simply being decanted. Filter the dispersed fungal spore suspension into a flask through a 6 millimeter layer of glass wool contained in a glass funnel. This process shall remove large mycelial fragments and clumps of agar. Centrifuge the filtered spore suspension and discard the supernatent liquid. Resuspend the residue in 50 milliliters of water and centrifuge. Wash the spores obtained from the fungi in this manner three times.
