INTERIM COMMERCIAL ITEM DESCRIPTION

COLLAGEN IMPLANT

The General Services Administration has authorized the use of this Interim Commercial Item Description which was developed by the Defense Personnel Support Center, Directorate of Medical Materiel, DPSC-ATT, 2800 South 20th Street, Philadelphia, PA 19101, based currently available technical information.

This Interim Commercial Item Description covers a Collagen Implant.

Salient Characteristics:

Shall be a sterile 1 ml plastic Tuberculin Syringe containing 35 mg/ml of purified injectable Dermal Bovine Collagen in Physiological Saline with 0.3% Lidocaine.

Shall be suitable for intrademal injection for restoring skin contour.

Workmanship. The units shall be free from defects which detract from their appearance or impair their serviceability.

Unit. Package (PG). Six filled syringes shall be packaged together with 8 individually packaged 30 gage, 3/8 inch (0.95 cm) hypodermic needles. One package containing 6 syringes and 8 needles, as specified, constitutes one unit.

Contractor certification. The contractor shall certify that the product offered meets the salient characteristics of this description and conforms to the producers' own drawings, specifications, standards, and quality assurance practices. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

AMSC/NA FSC 6505

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.
