COMMERCIAL ITEM DESCRIPTION

CLEANER, AUTOMATIC FILM PROCESSOR

(Two Part Cleaner)

The General Services Administration has authorized the use of this Commercial Item Description

This Commercial Item Description covers a dental x-ray processor chemical tank cleaner

Salient Characteristics

The cleaner shall be a two part chemical system suitable for cleaning the developer section and the fixer section of an automatic dental x-ray film processor. One part of the chemical cleaner shall be formulated specifically for the tank, rollers, gears, and drive chains of the developer section. The other part of the chemical cleaner shall be formulated specifically for the tank, rollers, gears, and drive chains of the fixer section. The cleaning shall be done by running the processor in the cleaning solution without scrubbing of the processor parts.

The developer tank and fixer rack cleaner shall be a liquid concentrate consisting of a mixture of sulfuric acid and a sodium salt. It shall be furnished as a liquid in a one pint plastic container. The mixture shall be specifically formulated to remove silver and emulsion from the developer tank and transport system when added to the developer tank.

The fixer tank and fixer rack cleaner furnished shall be a solid sodium salt to be mixed with water in a one pint plastic container. The resulting solution shall be specifically formulated to remove salts and bromides from the fixer tank and transport system when added to the fixer.

AMSC N/A FSC 6525

DISTRIBUTION STATEMENT A: Approved for public release, distribution is unlimited.

tank

The two cleaners shall be capable of cleaning the rollers, gears drive chains, and all other moving parts where contamination may collect, in ninety minutes or less The cleaner shall be capable of achieving a level of cleanliness such that no roller marks or related film defects are evident for a period of at least five working days following cleaning

The cleaner shall be completely compatible with the contacted structural components of the automatic film processor so as not to cause damage or deterioration when used in accordance with manufacturer's instructions The cleaner shall produce no harmful vapors to be inhaled and shall require no additional ventilation

Each unit of issue shall include complete and detailed instructions for use

Workmanship The automatic film processor cleaner shall be free from defects which detract from its appearance or impair its serviceability

Unit Package (PG) One package containing 12 processor cleaner treatments, as specified, constitutes one unit

Quality Assurance Provisions

Responsibility for inspection Unless otherwise specified in the contract or purchase order, the contractor is responsible for the performance of all inspection requirements as specified herein Except as otherwise specified in the contract or purchase order, the contractor may use his own or any facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure supplies and services conform to prescribed requirements

Records Records of examinations and tests performed by or for the contractor shall be maintained by the contractor and made available to the Government upon the Government's request at any time during the period of the performance of the

contract and for a period of three years after delivery of the supplies to which such records relate

Inspection Inspection, as used herein, is defined as both examination (such as visual or auditory investigation without the use of special laboratory appliances or procedures) and testing (determination by technical means of physical and chemical properties) of the item

Sampling for examination. Sampling for examination shall be conducted in accordance with MIL-STD-105, with an AQL of 4.0 (percent defective) and inspection level of II The unit of product for examination purposes shall be one automatic film processor cleaner

Sampling for tests Sampling for tests shall be conducted in accordance with MIL-STD-105, with an AQL of 2.5 (percent defective) and an inspection level of S-3 The unit of product for test purposes shall be one automatic film processor cleaner package

Tests Tests shall be conducted to determine compliance with specification requirements. Where feasible, the same sample shall be used for the determination of two or more test characteristics

Metric products Products manufactured to metric dimensions will be considered on an equal basis with those manufactured using inch-pound units, providing they fall within the tolerances specified using conversion tables contained in the latest revision of Federal Standard 376, and all other requirements of this document are met

If a product is manufactured to metric dimensions and those dimensions exceed the tolerances specified in the inch-pound units, a request should be made to the contracting officer to determine if the product is acceptable

The contracting officer has the option of accepting or rejecting the product

INSTRUCTIONS. In a continuing effort to make our standardization documents better, the DoD provides this form for use in ubi g comments and suggestions for improvements. All users of military standardization documents are invited to provide suggestions. This form may be detached, folded along the lines indicated, taped along the loose edge *(DO NOT STAPLE)*, and mailed. In block 5, be as specific as possible about particular problem areas such as wording which required interpretation, was too rigid, restrictive, loose, ambiguous, or was incompatible, and give proposed wording changes which would alleviate the problems. Enter in block 6 any remarks not related to a specific paragraph of the document. If block 7 is filled out an acknowledgement will be mailed to you within 30 days to let you know that your comments were received and are being considered.

NOTE. This form may not be used to request copies of documents, nor to request waivers, deviations, or clarification of specification requirements on current contracts. Comments submitted on this form do not constitute or imply authorization to waive any portion of the referenced document(s) or to amend contractual requirements.
