MILITARY SPECIFICATION

BOMB, GAS, 500-POUND, MARK 94 MOD 0, GB FILLED; WITHOUT FUZE AND BURSTER

This specification is mandatory for use by all Departments and Agencies of the Department of Defense.

1. SCOPE

1.1 This specification covers the filling of chemical agent in the 500-pound bomb.

2. APPLICABLE DOCUMENTS

2.1 Government documents. The following documents of the issue in effect on date of invitation for bids form a part of this specification to the extent specified herein:

STANDARDS

MILITARY

MIL-STD-105 - Sampling Procedures and Tables for Inspection by Attributes.
MIL-STD-129 - Marking for Shipment and Storage.

DRAWINGS

DEPARTMENT OF THE NAVY - BUREAU OF NAVAL WEAPONS

LD 288793 - Bomb, MK 94 MOD 0 (Chemical - 500 Pounds); Index of Loaded Assemblies, Drawings, and Specifications.

(Copies of specifications, standards, drawings, and publications required by suppliers in connection with specific procurement functions should be obtained from the procuring activity or as directed by the contracting officer.)

Check the source to verify that this is the current version before use.

2.2 Other publications. The following document forms a part of this specification to the extent specified herein. Unless otherwise indicated the issue in effect on date of invitation for bids shall apply.

CODE OF FEDERAL REGULATIONS

49 CFR 171-179 - Department of Transportation Rules and Regulations for the Transportation of Explosives and Other Dangerous Articles.

(The Department of Transportation regulations are a part of the Code of Federal Regulations available from the Superintendent of Documents, Government Printing Office, Washington, D. C. 20402. Orders for the above publication should cite "49 CFR 171-179.")

3. REQUIREMENTS

3.1 Materials and components.

3.1.1 Materials. All materials cited on Drawing 288793, or on the subsidiary drawings, shall conform to the specification listed thereon or to the specific characteristics set forth on the drawings.

3.1.2 Components. All components of the bomb shall conform to the specifications and drawings listed on Drawing 288793 and subsidiary drawings. The rust prevention protection of the bomb body and burster well assembly shall not be removed until just prior to filling.

3.2 Filling, closing and helium leak testing. The bomb shall be filled, closed and helium leak tested as specified on US Navy Bureau of Ordnance Drawing 1380978.

3.3 Agent contamination. The exposed surfaces of the bomb shall be free from GB agent contamination.

3.4 Workmanship. The bomb shall be free from damage which could affect its intended use.

4. QUALITY ASSURANCE PROVISIONS

4.1 Responsibility for inspection.

4.1.1 Supplier's responsibility. Unless otherwise specified in the contract or purchase order, the supplier is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract or order, the supplier may use his own or any other facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure supplies and services conform to specified requirements.

Check the source to verify that this is the current version before use.

4.1.2 Objective evidence. The supplier shall provide objective evidence acceptable to the contracting officer that the requirements of 3.1 and section 5 for which specific inspection has not been provided in this specification have been satisfied.

4.2 Quality conformance inspection.

4.2.1 Lotting. A lot shall consist of the bombs of one interfix number filled, closed, and marked by one manufacturer, at one plant, under essentially the same manufacturing conditions. However, no more than one lot of chemical agent used in a continuous run shall be represented in any one lot of filled bombs.

4.2.2 Sampling for examination. Sampling shall be conducted in accordance with MIL-STD-105.

4.2.3 Inspection procedure.

4.2.3.1 Examination. The sample bombs shall be examined in accordance with the classification of defects and MIL-STD-105.

4.2.3.2 Critical defects. Each bomb in the lot shall be examined for critical defects listed in the classification of defects.

4.2.3.3 Classification of defects.

(a) Bomb, MK 94 MOD 0 (chemical), 500 lbs., loading assembly (Dwg 1380978).

Categories	Defects	Acceptance standards
Critical:		
1	Helium leakage (primary seal)	
2	Filling excessive	
3	Contamination	4.2.4
Major:	AQL 1.0 percent defective	
101	Marking incorrect	
102	Workmanship (3.4)	
Minor:	AQL 2.5 percent defective	
201	Filling insufficient	
202	Marking missing or illegible	
203	Protective finish missing

Check the source to verify that this is the current version before use.

4.2.4 Agent contamination. Agent contamination shall be determined by use of an approved GB agent detector system.

5. PREPARATION FOR DELIVERY

5.1 Level A packing. Unless otherwise specified, the filled and closed bombs shall be packed for shipment or storage in the same manner as the empty bombs were received, and the pack shall conform to the Interstate Commerce Commission regulations.

5.2 Marking. In addition to any special marking required by the contract or order, all shipments shall be marked in accordance with MIL-STD-129 and the Interstate Commerce Commission regulations.

6. NOTES

6.1 Ordering data. Procurement documents should specify the title, number, and date of this specification.

6.2 Precautions. Because of the hazardous nature of filling munitions with GB, suppliers are advised to take all necessary precautions to protect personnel from injury while filling bombs in accordance with this specification.

6.3 Care in filling. Care should be exercised not to score surface "W" (Drawing 1380223) and the top surface around the filling receptacle during the filling operation.

SPECIFICATION ANALYSIS SHEET

Form Approved
Budget Bureau No. 22-R255

INSTRUCTIONS: This sheet is to be filled out by personnel, either Government or contractor, involved in the use of the specification in procurement of products for ultimate use by the Department of Defense. This sheet is provided for obtaining information on the use of this specification which will insure that suitable products can be procured with a minimum amount of delay and at the least cost. Comments and the return of this form will be appreciated. Fold on lines on reverse side, staple in corner, and send to preparing activity. Comments and suggestions submitted on this form do not constitute or imply authorization to waive any portion of the referenced document(s) or serve to amend contractual requirements.
