COMMERCIAL ITEM DESCRIPTION

BASE, CIRCUIT BREAKER, AUTOMOTIVE TYPE

The General Services Administration has authorized the use of this commercial item description (CID) for all federal agencies.

1. SCOPE. This CID covers the general requirements for circuit breaker base for automotive type circuit breakers. Circuit breaker bases covered by this CID are intended for commercial/industrial applications.

2. CLASSIFICATION. This CID uses a classification system which is included in the Part or Identification Number (PIN) as shown in the following example (see 7.1).

3. SALIENT CHARACTERISTICS

3.1 Design and construction. Circuit breaker bases supplied to this CID shall be as specified herein (see figure 1).

3.2 Material. The material for this circuit breaker base shall be 20 gauge (0.914 millimeter (mm) (036 inch)) cold rolled steel (CRS), half-hard in accordance with ASTM A 109.

3.3 Finish. The finish for this circuit breaker base shall be a nickel zinc alloy with a minimum thickness of 0.0012 mm (.00004 inch).

3.4 Salt spray. This circuit breaker base shall be salt spray tested in accordance with ASTM B 117 for a minimum of 24 hours.

3.5 Marking. Circuit breaker bases supplied to this CID shall be marked with the manufacturer's standard commercial PIN.

4. REGULATORY REQUIREMENTS. This section is not applicable to this CID.

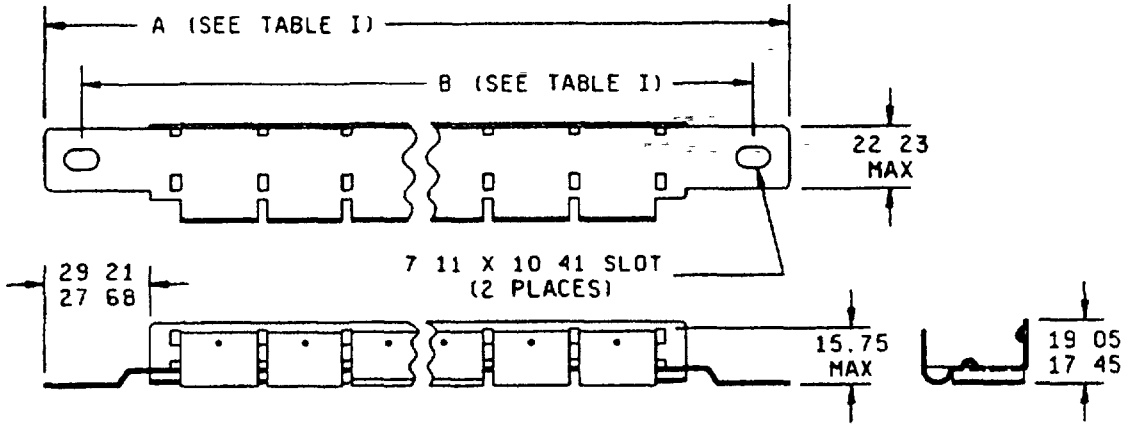

Beneficial comments, recommendations, additions, deletions, clarifications, etc., and any data which may improve this document should be sent to: Defense Electronics Supply Center, ATTN: DESC-ELDM, 1507 Wilmington Pike, Dayton, OH 45444-5765, or telephone (513) 296-6189, or facsimile (FAX) (513) 296-8868.

Check the source to verify that this is the current version before use.

mm	Inches	mm	Inches
7.11	.280	19 05	.750
10.41	.410	22.23	.875
15.75	.620	27.68	1.090
17.45	.687	29.21	1.150

NOTES:
1. Dimensions are in millimeters.
2. Tolerance is ±0.25 millimeter (.010 inch).
3. The US government preferred system of measurement is the metric SI system. However, this item was originally designed using inch-pound units of measurement. In the event of conflict between the metric and inch-pound units, the inch-pound units shall take precedence.

011	11	329.18	12.96	308.61	12.15
012	12	352.30	13.87	331.72	13.06

5. QUALITY ASSURANCE PROVISIONS

5.1 Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the contractor is responsible for the performance of all inspection, examination, and test requirements specified herein. Except as otherwise specified in the contract or purchase order, the contractor may use his own or any other facilities suitable for the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections, examinations, or tests set forth in this description where such inspections, examinations, and tests are deemed necessary to assure supplies and services conform to prescribed requirements.

5.2 Contractor certification. The contractor shall certify and maintain substantiating evidence that the product offered meets the salient characteristics of this CID, and that the product conforms to the producer's own drawings, specifications, standards, and quality assurance practices, and is the same product offered for sale in the commercial marketplace. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

5.3 Certificate of compliance. Each contractor desiring to be listed as a suggested source of supply shall submit a DESC certificate of compliance to DESC-ELDM. This certificate shall state that the contractor's product meets all the requirements of this CID. In addition, a certificate of compliance shall accompany all circuit breaker bases supplied to this CID.

5.4 Market acceptability. The following market acceptability criteria are necessary to document the quality of the product to be provided under this CID.

a. The company producing the item must have been producing a product meeting the requirements of this CID for at least 2 years.

b. The company must have sold 1,000 units meeting this CID in the commercial market place over the past 2 years.

6 PACKAGING

6 1 Preservation, packing, and marking. Preservation, packing, and marking shall be as specified in the contract or purchase order.

7 NOTES

7 1 PIN The PIN should be used for Government purposes to buy commercial products to this CID See 2 for PIN format example.

(Industry association specifications and standards are generally available for reference from libraries. They are also distributed among technical groups and using Federal agencies.)

7.3 Automotive type circuit breaker accommodation. This circuit breaker base shall accommodate automotive type circuit breakers supplied to CID A-A-55490-001 through -012 and A-A-55491-001 through -011.

7.4 Government users. To acquire information on obtaining these circuit breaker bases from the Government inventory system, please contact Defense Electronics Supply Center, ATTN: DESC-EOM, 1507 Wilmington Pike, Dayton, OH 45444-5270, or telephone (513) 296-5106.

7.5 Ordering data. The contract or purchase order should specify the following:

a. CID document number, revision, and CID PIN.

b. Quality assurance provisions.

c. If a bid sample is required.

d. Packaging requirements.
