SMUFA C3820, 11 Dec 64	C	17	22	.50	Basic
SMUFA C3821, 11 Dec 64	D	22	34	.50	Basic
SMUFA C3822, 11 Dec 64	F	28	40	.50	Basic

*Horizontal Margin .38-inch, Vertical Margin .25 inch

2. APPLICABLE DOCUMENTS

2.1 The following document of the issue in effect on the date of invitation for bids or request for proposal forms a part of this specification to the extent specified herein.

SPECIFICATION

Federal

L-P-00519 Plastic Sheet, Tracing, Glazed and Matte Finish

(Copies of the specification required in connection with specific procurement of the formats covered by this specification should be obtained from the procuring activity or as directed by the contracting officer.)

3. REQUIREMENTS

3.1 General. The contract or order will identify the specific forms in accordance with paragraph 1.2 and the quantities to be delivered in accordance with the requirements herein. Unless otherwise specified the formats will be produced from the format masters supplied.

Check the source to verify that this is the current version before use.

3.2 Sheet material. The formats shall be printed on plastic sheet .004 thick conforming to Type I - Matte drafting surface, glazed back; Class 1 - Material with strength, durability, and dimensional stability of Specification L-P-00519 of the following specific dimensions.

3.3 Dimensions. The width and length of the finished format sheets shall be as indicated for each form under paragraph 1.2 and identical with the format masters supplied.

3.3.1 Dimension tolerances. All dimensions required on the formats are subject to commercial printing tolerances.

3.4 Blocks and information on formats. Unless otherwise specified, blocks and information to be printed on the formats shall be identical with format masters supplied.

3.5 Weight of lines. Unless otherwise specified, printed lines shall be identical with those on the format masters supplied.

3.6 Line quality. Lines shall be opaque, continuous, and of uniform width throughout.

3.7 Lettering. Unless otherwise specified, lettering shall be identical with format masters supplied.

3.8 Ink. The format blocks and other printed data shall be printed with black conventional offset or letterpress inks. Additional dryer must be added to these inks. Two ounces of "No Scratch Dryer" to a pound of conventional black ink shall be used to accelerate drying and improve scuff resistance.

3.9 Prevention of offsetting. Offsetting on the reverse side of formats shall be prevented.

3.10 Workmanship. The finished forms shall be free from warpage, cracks, scratches, soil marks, and other defects which affect appearance and serviceability.

4. QUALITY ASSURANCE PROVISIONS

4.1 Responsibility for inspection. Unless otherwise specified, the contractor is responsible for all inspection necessary to assure conformance to the prescribed requirements. The Government reserves the right to perform any inspection(s) where such inspections are deemed necessary to assure conformance to the prescribed requirements, and to reject any lot of formats that does not conform to requirements.

4.1.1 Lot. As defined herein, a lot is 50 sheets as required in a package under paragraph 5.

4.2 Certification. At a time specified prior to delivery, the contractor shall submit to the contracting officer a written certification that the plastic sheet used in producing the formats conforms to the requirements of Type I, Class 1, of Specification L-P-00519 and that the other requirements for the formats have been met.

5. PREPARATION FOR DELIVERY

5.1 General requirements. Packaging and packing as specifically stated in the following conform to the requirements of Specification L-P-00519.

5.2 Packaging of finished formats. Finished formats shall be packaged by one form number and size only per container. The sheets shall be packaged flat, faced top and bottom with a sheet of paperboard or chipboard of commercial quality and grade, 50 sheets per package, wrapped in 50-pound kraft paper, ends of wrap neatly folded and secured by adhesive tape.

5.3 Packing. Unless otherwise specified, packages shall be packed in containers of the type, size and kind commonly used for the purpose in a manner that will insure acceptance by common carrier and safe delivery at destination. Shipping containers shall comply with the carrier rules and regulations applicable to the mode of transportation.

5.4 Marking. Each (50) sheet package shall be market with the: SMUFA FORM No.; letter size, format size and purpose as appropriate. Example:

SMUFA FORM No. C3819, 11 Dec 64; B Size 11 x 17; Basic.

This same information shall be marked on the packing container. The above marking for the package or container is in addition to any special marking required in the purchase order or contract.

6. NOTES

6.1 Intended use. Formats covered by this specification are intended for original drawings.

6.2 Order data. Ordering date for formats should specify the following as necessary:

(a) Number, title and date of this specification.
(b) Quantity by specific SMUFA FORM No., letter size and purpose (see 1.2).
(c) The format masters supplied (see 3.1).
(d) Additional requirements, if necessary (see 3.1).
(e) Other inspection responsibility, if any (see 4.1).
(f) Additional or other packing (see 5.3).
(g) Additional marking instructions (see 5.4).
(h) Other requirements, if any.
