COMMERCIAL ITEM DESCRIPTION

COAL TAR AND MINERAL OIL, LANOLATED, WATER-DISPERSIBLE, BATH OIL

The General Services Administration has authorized the use of this commercial item description.

The Commercial Item Description covers Coal Tar and Mineral Oil, Lanolated, Water-Dispersible, Bath Oil for use a heratoplastic agent.

Salient characteristics:

Shall be a Coal Tar Solution containing 2.5 percent (w/w) Coal Tar, USP, in a base consisting of mineral oil and the fat soluble, dewaxed fraction of Lanolin, USP. The Coal Tar Solution may contain surfactant solvents, venicles and emolients, as necessary.

The solution shall assay to contain not less than 90.0 percent and not more than 130.0 percent of required amount of Coal Tar when assayed by a suitable, accurate and reproducible method.

Globules of Oil shall not appear in less than 20 minutes when the following test on the solution is conducted:

Weigh 2.0 grams of product into a glass container containing 1000 ml of water at 95°F and mix. Do not disturb the solution after mixing. Observe the length of time after mixing for globules of oil to appear on the surface of the solution.

Not more than 6 months shall have elapsed from the date of manufacture of the product to the date of delivery to the Government.

Workmanship. Product shall be free from defects which detract from its appearance or impair its serviceabilty.

Unit. Bottle (BT). One bottle containing 8 fl oz (237 ml), as specified, constitutes one unit.

Contractor certification. The contractor shall certify that the product offered meets the salient characteristics of this description and conforms to the producers' own drawings, specifications, standards, and quality assurance practices. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.
