MATERIAL: The exterior wall shall be heavy-gauge steel, reinforced at all stress points. Interior shall be heavy gauge solid aluminum, aluminized steel, or stainless steel. The door shall have the same basic construction with swing pivot hinges, magnetic catch and heat resisting handle.

FINISH: The exterior shall be finished in durable baked enamel over a suitable primer coating.

DESIGN: Oven shall be of the gravity convection or radiant heat type, rectangularly shaped with double walled construction and equipped with one door, shelves, a thermometer, indicator light, variable thermostat control, heater power input switch(es) and heating elements.

Shelves shall be removable, adjustable, and so constructed as to allow proper air circulation throughout the inner chamber.

Cabinet shall have an intake and exhaust vent for proper ventilation and shall have an opening in the top to accommodate a graduated glass thermometer.

Insulation shall be a minimum of 76 mm thick and shall completely envelop the inner chamber of the oven, including the door.

Ovens shall be in accordance with the requirements as specified in ASTM E145.

Heating unit shall operate at 120/208 volts, 50/60 Hz, single phase, as specified at invitations for bid.

All electrical components and insulations shall conform to the standards of Underwriters Laboratories, Incorporated.

NOTES:

1. Overall dimensional limitations and color of exterior shall be specified on date of invitations for bid.
2. Items differing from this military standard by minor variations in design or characteristics are considered standard under this document, provided such variations do not affect performance and are not in conflict with the material requirements specified herein.
3. Referenced documents shall be of the issue in effect on date of invitations for bid.
4. FSCM: 15488, 22527, 48619, and 99632.
