DATA ITEM DESCRIPTION

Form Approved
OMB No. 0704-0188

Public reporting burden for the collection of information is estimated to average 110 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate of any other aspect of this collection of information, including suggestions for reducing this burden, to Washington Headquarters Services, Directorate for Information Operations and Reports, 1215 Jefferson Davis Highway, Suite 1204, Arlington, VA 22202-4302, and to the Office of Management and Budget, Paperwork Reduction Project (0704-0188), Washington, DC 20503.

1. TITLE	2. IDENTIFICATION NUMBER
INHERENT TESTABILITY DESIGN & ASSESSMENT REPORT	DI-ATTS- 81272

3. DESCRIPTION/PURPOSE

3.1 This report documents the results of the inherent testability design of a system or item under development. These data are to be used to evaluate the level of testability incorporated in a design.

4. APPROVAL DATE (YYMMDD)	5. OFFICE OF PRIMARY RESPONSIBILITY (OPR)	6a. DTIC APPLICABLE	6b.GIDEP APPLICABLE
920612	SH		

7. APPLICATION/INTERRELATIONSHIP

7.1 This DID contains the format and content preparation instructions for data resulting from the work task described by Task 202 of MIL-STD-2165A.

7.2 This DID may be applicable for all system and equipment development programs.

7.3 This DID supersedes DI-T-7199.

8. APPROVAL LIMITATION	9a. APPLICABLE FORMS	9b. AMSC NUMBER
		N6745

10. PREPARATION INSTRUCTIONS

10.1 Reference documents. The applicable issue of the documents cited herein, including the approval dates of any applicable amendments, notices, and revisions, shall be specified in the contract.

10.2 Format. The Inherent Testability Design and Assessment Report shall be in the contractor's format.

10.3 Content Requirements. The content of the Inherent Testability Design & Assessment Report shall be prepared in accordance with MIL-STD-2165A, Task 202, and shall include the following:

10.3.1 A brief description of the functional operation of the system and of each item.

10.3.2 A description of system maintenance and support concept.

10.3.3 Specific Content Requirements. The specific content requirements shall include:

10.3.3.1 Description of system built-in test (BIT) functional design and system partitioning used to enhance testing.

(Continued on page 2)

11. DISTRIBUTION STATEMENT

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

Check the source to verify that this is the current version before use.

BLOCK 10. PREPARATION INSTRUCTIONS (Continued)

10.3.3.2 For each item to be included in this analysis, a description of testability features incorporated (compatibili observability, controllability, partitioning, etc.); BIT functional design; BIT interfaces to system BIT and to external test; recommend weighting factors and scoring method for each testability criteria in the checklist; and a filled-in checklist and the calculated inherent testability.

10.3.3.3 Description of completed or planned improvements to meet inherent testability thresholds or justification for not doing so.
