MILITARY SPECIFICATION

SEMICONDUCTOR DEVICE, DIODE, SILICON, VOLTAGE-REGULATOR
TYPES (TX AND NON-TX) 1N3993A THROUGH 1N4000A AND THE RA

This amendment forms a part of Military Specification MIL-S-19500/272C, dated 26 November 1968, and is approved for use by all Deparments and Agencies of the Department of Defense.

PAGE 4

4.2, delete and substitute:

"4.2 Qualification inspection. Qualification inspection shall consist of the examinations and tests specified in tables I, II, and III. Qualification for a voltage group shall require testing of the highest and lowest nominal voltage units in the group. Ten samples of each intermediate type shall be subjected to subgroup 2 of group A and subgroup 1 of group C. The manufacturer has the option of submitting samples individually to subgroups 4 and 5 of group B, and subgroups 4 and 5 of group C inspection or of submitting to the tightened combination of these tests using a sample size under the $\lambda = 7$ column (see table C-I, appendix C, MIL-C-19500) and a test duration of 1,000 hours. Qualification inspection of device types of either polarity in the above tests is sufficient to obtain qualification approval of device types of both polarities providing that structural similarity can be demonstrated."

4.7.5, delete and substitute:

"4.7.5 Breakdown voltage. The $I_Z$ test current (column 5 of table IV) shall be applied until thermal equilibrium is attained prior to reading the breakdown voltage. During this test, the case temperature ($T_C$) of the diode shall be equal to 30° ±3°C."

PAGE 8

TABLE V, Burn-in test measurements, Reverse current, in Unit column: Delete "Adc" and substitute "μAdc".

PAGE 11

4.9.7.2: Delete "$\Delta Z$ = 10% of initial value." and substitute "$\Delta Z$ = 10% of column 4 of table IV."

NOTE: The margin of this amendment is marked with an asterisk to indicate where the change from the previous amendment was made. This was done as a convenience only and the Government assumes no liability whatsoever for any inaccuracies in these notations. Bidders and contractors are cautioned to evaluate the requirements of this document based on the entire content irrespective of the marginal notations and relationship to the last previous amendment.
