* TABLE VIII, subgroup II, delete last two columns under, "AQL (percent defective)".

* 4.7.1.2.1, delete and substitue:

"4.7.1.2.1 Sampling plan. If, during the 100 percent inspection of subgroup I, more than 5 percent of the lot is found to be defective, the lot shall be rejected and not supplied to this specification. For subgroup II, a sample of parts shall be randomly selected from each inspection lot in accordance with table VIII-A. If one or more defects are found, the lot shall be rescreened for the defective characteristic(s) and defects removed.

After screening and removal of the defects, a new sample of parts shall be randomly selected in accordance with table VIII-A. If one or more defects of the same characteristic which caused the initial rejection are found in the second sample, the lot shall be rejected and not supplied to this specification.

Should an additional defective characteristic be found during resubmission, other than the defective characteristic which caused the original rejection, it shall be treated as an initial rejection and subject to rescreening as stated above."

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.
