1 August 1967

MILITARY SPECIFICATION
COAT, MAN'S: SCARLET, DRUM AND BUGLE CORPS, MUSICIANS

This specification is approved for use by all Departments and Agencies of the Department of Defense.

1. SCOPE.

*1.1. Scope. This specification covers requirements for musician's scarlet wool drum and bugle corps coats.

*1.2 Classification. The coats shall be of one type in the following sizes as specified (see 6.2):

Schedule of sizes
(Short, Regular, Long, Extra Long)

34
35
36
37
38
39
40
41
42
44
46

*1.3 Individual orders. When the coat is custom tailored to an individual order, this specification shall govern except that the detail requirements of Section 3, Table I, may be modified to the extent necessary for good custom tailoring practices.

2. APPLICABLE DOCUMENTS

*2.1 The following documents of the issue in effect on date of invitation for bids or request for proposal, form a part of the specification to the extent specified herein.

SPECIFICATIONS

FEDERAL

R-N-91	- Napthalene, Technical.
V-T-276	- Thread, Cotton
V-T-280	- Thread, Cotton Gimp, Buttonhole.
V-T-301	- Thread, Silk.

DDD-L-20	- Label; For Clothing, Equipage And Tentage (General Use).
DDD-T-86	- Tape, Textile, Cotton, General Purpose (Unbleached, Bleached, Or Dyed).

MILITARY

MIL-C-326	- Cloth, Silesia, Cotton.
MIL-C-368	- Cloth, Satin, Rayon and Cloth, Twill, Rayon.
MIL-B-3461	- Buttons, Insignia, Metal, Uniform And Cap.
MIL-P-15064	- Pad, Shoulder and Sleeve-Head.
MIL-C-16375	- Cloth, Wigan, Cotton.
MIL-C-21115	- Cloth, Tropical, Wool, Polyester/Wool.
MIL-C-43718	- Cloth, Twill, Polyester And Cotton.
MIL-C-82114	- Coat Front For Coats, Musicians.

STANDARDS

FEDERAL

FED-STD-151	- Metal, Test Methods.
FED-STD-191	- Textile Test Methods.
FED-STD-751	- Stitch, Seam And Stitching.

MILITARY

MIL-STD-105	- Sampling Procedures And Tables For Inspection By Attributes.
MIL-STD-129	- Marking For Shipment And Storage.

(Copies of specifications and standards required by suppliers in connection with specific procurement functions should be obtained from the procuring activity or as directed by the contracting officer.)

*2.2 Other publications. The following document forms a part of this specification to the extent specified herein. Unless otherwise indicated, the issue in effect on date of invitation for bids or request for proposal shall apply.

UNIFORM CLASSIFICATION COMMITTEE, AGENT
Uniform Freight Classification Rules

(Application for copies should be addressed to the Uniform Classification Committee, Room 1106, 222 South Riverside Plaza, Chicago, Illinois 60606.)

3. REQUIREMENTS

3.1 Samples. Samples are furnished solely for guidance and information to the supplier (see 6.3). Variation from the specification may appear in the sample, in which case the specification shall govern.

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T04:39Z
Check the source to verify that this is the current version before use.

*3.2 First article approval. Unless otherwise specified (see 6.2), before production is commenced, a first article consisting of the number of finished coats specified by the procuring activity (see 6.2) shall be submitted or made available to the contracting officer or his authorized representative for approval. The approval of the first article authorizes the commencement of production, but does not relieve the supplier of responsibility for compliance with all provisions of this specification. The first article shall be manufactured by the supplier in the same facilities to be used for the manufacture of the production items.

3.3 Materials.

*3.3.1 Basic material. The basic material shall be cloth, wool, tropical, scarlet shade 2502 (see 6.3), 10.5 ounce conforming to type I, class 1 of MIL-C-21115.

*3.3.2 Lining. The material for lining the coat and collar and for making the underarm shields, collar eyelet covers, coat hanger, straps to secure the lining to the bottom edge of the coat and the front eyelet cover shall be cloth, satin rayon twill, scarlet shade 2506 (see 6.3), conforming to class 1 of MIL-C-368.

*3.3.3 Silesia or polyester and cotton. The stays for armhole and shoulder seams; the reinforcement pieces for the collar eyelets; and the binding for the neck edge of the coat front interlining and the lower edge of the collar interlining shall be cut from cloth, cotton silesia, 4.5-ounce conforming to type I of MIL-C-326 or polyester and cotton conforming to MIL-C-43718 except the requirement for nonfibrous material and seam efficiency shall not apply. The color of the silesia or polyester and cotton shall be khaki shade 3707 for the armhole and shoulder seam stays, the collar eyelet reinforcement pieces, and the binding for the neck edge of the coat front interlining, and black for the binding for the lower edge of the collar interlining.

*3.3.4 Collar interlining. The material for interlining the collar shall be cloth, cotton buckram, double texture, laminated, starch finish, natural color, conforming to the following when tested as specified in Section 4, Table III.

*3.3.4.1 Collar buckram. The buckram shall be made of cotton of suitable staple length and grade to meet the requirements of this specification. The cotton buckram shall be thoroughly cleaned, well carded, drawn and evenly spun.

3.3.4.2 Weave. The weave of the single plies of the cloth shall be four harness, 2 up and 2 down herringbone twill, 20 ends right and 20 ends left.

*3.3.4.3 Yarn count. Each ply of cloth shall have a minimum yarn count per inch of 50 in the warp and 20 in the filling.

Source: https://assist.dla.mil -- Downloaded: 202610-26T04:39Z
Check the source to verify that this is the current version before use.

*3.3.4.4 Laminated cloth. The two plies of the cloth shall be thoroughly adhered together with synthetic resin type laminating material which shall not cause any objectionable odor in the finished cloth. The laminated cloth shall show no evidence of delamination after being subjected to wet (dry) cleaning, accelerated aging, and perspiration tests specified in Section 4, Table III.

*3.3.4.4.1 Finish. The cloth shall have a starch finish. The original stiffness of the finished cloth, and the stiffness of the cloth after being subjected to the wet (dry) cleaning, accelerated aging, and perspiration tests shall conform to the following when tested as specified in Section 4, Table III:

Stiffness, inch-pound:	Minimum	Maximum
- original	0.60	0.95
- after accelerated aging	0.70	0.95
- after wet (dry) cleaning	0.50	0.85
- after perspiration	0.50	0.85

*3.3.4.4.2 Weight. The weight of the finished laminated cloth shall be 21 to 23 ounces per square yard when tested as specified in Section 4, Table III.

*3.3.4.4.3 Breaking strength. The breaking strength of the finished laminated cloth shall be 100 pounds minimum in the warp direction and 80 pounds minimum in the filling direction, when tested as specified in Section 4, Table IV. After being subjected to the accelerated aging test, the breaking strength of the cloth shall be not less than the original breaking strength when tested as specified in Section 4, Table III.

3.3.5 Reinforcement discs. The reinforcement discs for buttons secured to the back side seam, with ring toggle, shall be punched from cloth, cotton, buckram specified in 3.3.4.1. The reinforcement discs shall be 7/8 inch in diameter with a 1/8-inch-diameter hole at the center.

*3.3.6 Padding for collar. The material for padding the collar shall be a suitable cotton felt, white, weighing 4.25 to 4.75 ounces per square yard, when tested as specified in Section 4, Table III.

*3.3.7 Coat fronts. The coat fronts shall conform to class 1 of MIL-C-82114.

*3.3.8 Shoulder pads. The shoulder pads shall conform to the requirements of type I, class 2 of MIL-P-15064.

3.3.9 Sleeve head pads. The sleeve head pads shall conform to type IV of MIL-P-15064.

*3.3.10 Stay tape. The stay tape for armholes shall be cotton, unbleached, 1/4 inch wide conforming to type III, class 1 of DDD-T-86, except the requirement for nonfibrous material shall not apply.

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T04:39Z
Check the source to verify that this is the current version before use.

*3.3.11 Piping. The material for piping shall be cloth, polyester-wool blend, black shade 2607 (see 6.3), conforming to type III of MIL-C-21115, cut 5/8 to 3/4 inch wide for piping the shoulder straps, collar and ornamental sleeve patches and 1 inch wide for piping front and bottom edges of the coat.

***3.3.12 Binding. The binding for the collar interlining shall be cut 1 inch wide from the following materials:**

For upper edge of collar interlining - cloth, polyester wool blend black (see 3.3.11).

For lower edge of collar interlining - cloth, cotton, silesia or polyester and cotton black (see 3.3,3).

3.3.13 Wigan. The material for reinforcing the bottom edge of the sleeves shall be cloth, cotton, wigan, 2.5 ounces conforming to type I of MIL-C-16375.

3.3.14 Thread.

***3.3.14.1 Silk thread. The silk thread shall conform to V-T-301** as follows, except the requirements for extractable matter shall not apply:

Use	Type	Class	Ticket No.	Ply
Bartacks and all outside seaming and stitching.	I		A	
Machine felling.			O	
Making buttonholes in coat.	I		B and F	3
Hand felling; and hand sewing.	III,	3	C	2

***3.3.14.2 Cotton, thread. The cotton thread shall conform to V-T-276** as follows:

Use	Type	Ticket No.	Ply
All inside seaming and stitching.	1C2	A	3
Serging and overedge stitching.	1A1	70	2
Machine tacking armholes.	1B3	24	4

The thread for basting shall be good commercial grade cotton.

***3.3.14.3 Color and colorfastness. All thread shall be dyed scarlet shade W, cable No. 66040, except the cotton thread for basting and machine tacking armholes may be white, and the cotton thread for overedge stitching the piping at bottom edge of coats shall be black. The colored threads shall show the following colorfastness when tested as specified in the applicable thread specification:**

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T04:39Z
Check the source to verify that this is the current version before use.

Thread	Color	Wet (dry) Cleaning	Light
Cotton	Scarlet	Good	--
Silk	Scarlet	Fair	Fair
Silk	Black	Good	Good

3.3.15 Gimp. The buttonhole gimp shall be cotton, No. 8, soft or glazed finish, conforming to type I or II of V-T-280. The color of the gimp shall be scarlet W, cable No. 66040, and shall show good fastness to wet (dry) cleaning.

*3.3.16 Buttons.

*3.3.16.1 Insignia buttons. The insignia buttons shall be metal, gold plated, enlisted design, 27-line for shoulders, belt loops and ornamental sleeve patches and 40-line for fronts, conforming to type I, style 3, class A, subclass 2 of MIL-B-3461.

*3.3.16.2 Ring toggles. Ring toggles for securing the 27-line insignia buttons to the coat, belt loops and ornamental sleeve patches shall conform to MIL-B-3461.

*3.3.17 Collar closure hooks and eyes. The hooks and eyes for closing the collar shall be brass, black enameled finish, size No. 16 commercial type. All surfaces and edges of the hooks and eyes shall be clean, smooth, free from burrs, tool marks, sharp edges, and roughness. The hooks and eyes shall be thoroughly and completely lacquered with the best available quality of black japanned lacquer. The dry lacquer film shall be continuous, level, adherent, free from lint, dust or other foreign inclusions that may affect appearance or serviceability, and shall withstand the test for tackiness specified in Section 4, Table III.

*3.3.18 Labels. Each coat shall have a combination personal-clothing identification label and a size label as follows. The coat is intended to be dry cleaned and the label shall show fastness to dry cleaning.

*3.3.18.1 Combination personal-clothing identification label. The combination personal-clothing identification label shall conform to type I, classes 1 and 10 (combined) of DDD-L-20 except all printing and the space between lines of printing shall be minimum 10 point (approximately 1/8 inch). The content and format shall be as follows:

NAME_____

SERVICE NO._____

Source: https://assist.dla.mil -- Downloaded: 202640-26T04:39Z
Check the source to verify that this is the current version before use.

COLLAR SIZE_____
NOMENCLATURE (Item description)_____

_____
CONTRACT NO._____DATE_____
NAME OF CONTRACTOR_____
WOOL PRODUCTS ACT INFORMATION

_____

*3.3.18.2 Size label. The size label shall conform to type I, class 2, of DDD-L-20. The label shall consist of the numerical size designation specified in 1.2 followed by the letter S, R, L, or XL for Short, Regular, Long and Extra Long, as shown by the following example:

40R
Stock number

The stock number may be incorporated in the identification label instead of in the size label.

*3.4 Design. The coat shall be the U.S. Marine Corps design shown on Figures 1 through 3. The coat shall be seven button, single breasted, form-fitting, fully lined having a one-piece front; waist and chest darts; a four-piece back without a center vent; belt loops to button; ornamented at sleeve ends; shoulder straps to button; and a standup collar with hooks and eyes for front closure and a worked eyelet at each end for removable branch of service insignia. The top and bottom edges of collar, front and bottom edges of coat, the top, bottom and scalloped back edges of ornamental sleeve patches, and the edges of shoulder straps shall be piped with the material specified in 3.3.11.

*3.5 Patterns. Standard patterns will be furnished to the supplier by the Government. The standard patterns shall not be altered in any way and shall be used only as a guide for cutting the supplier's working patterns. The supplier's working pattern shall be identical to the standard pattern. The standard pattern shall provide 5/8-inch allowance for center back, 3/4-inch allowance for side seams, and 3/8-inch allowance for all other seams except as otherwise specified in Table I. Standard patterns show size and are marked and notched for proper cutting, placement and assembly of component parts.

*3.5.1 List of pattern parts. Coats shall be cut from the materials specified herein in accordance with the pattern parts indicated below:

Item	Pattern nomenclature Material basic: Cloth, wool, tropical	No. of cut parts
1.	Front	2
2.	Front facing, right	1
3.	Front facing, left	1
4.	Side back	2
5.	Center back	2
6.	Top sleeve	2
7.	Under sleeve	2
8.	Collar, outer ply	2
9.	Shoulder straps, top ply	2
10.	Shoulder straps, under ply	2

3.6 Construction.

3.6.1 Manufacturing requirements. The coat shall be manufactured in accordance with the operations and the stitch, seam, and stitching types specified in Table I.

3.6.1.1 Operations. The supplier is not required to follow the exact sequence of the operations as listed in Table I, but all operations specified shall be used to manufacture the coats.

3.6.1.2 Stitches, seams and stitching. The stitch, seam and stitching types specified in Table I shall conform to FED-STD-751. The number of stitches per inch as specified in Table I indicates the minimum and maximum number permitted. All overedge stitching shall be done on serging machine with a knife attachment properly set to trim the raveled edge without cutting the material.

*3.6.1.2.1 Tacking and backstitching. End of all seams and stitching (stitch type 301), except ends of a continuous line of stitching, when not caught in other seams or stitchings shall be backtacked not less than 1/4 inch. The ends of a continuous line of stitching shall be overlapped not less than 1/2 inch. Thread breaks shall be secured back of the break not less than 1/2 inch.

Source: https://assist.dla.mil -- Downloaded: 202640-26T04:39Z
Check the source to verify that this is the current version before use.

*3.6.1.3 Shade marking. The component parts of the coat cut from one piece of wool and lining materials, including pairs of sleeve linings and underarm shields when cut from ends, shall be shade marked to insure a uniform shade and size throughout the garment. Any method of shade marking may be used except:

(a) Corrosive metal fastening devices.
(b) Sew-on shade tickets.
(c) Adhesive type tickets which show discloration and the adhesive mass which adheres to the material upon removal of the tickets.

TABLE I MANUFACTURING REQUIREMENTS

OPN NO.	OPERATION	Stitch Type	Seam or Stitch'g Type	Stitches Per Inch	THREAD	
					Needle	Bobbin or Looper
1.	Cutting. a. Cut coats in strict accordance with patterns furnished by the Government. b. Cut all materials in the direction of the warp as indicated by directional lines on the patterns. c. Cut all scarlet wool parts of the coat from one piece of basic material, except the following parts may be cut from ends: underply of shoulder straps and underply of ornamental sleeve patch. Parts cut from ends shall harmonize with the shade of the coat. d. Cut the body and collar linings, the front eyelet covers and the top ply of the underarm shields, from one piece of rayon lining material. All other rayon lining parts may be cut from ends. When pairs of sleeve linings are cut from ends, the shade of the sleeve linings shall match. Cut the strips for coat hanger and lining securing straps 1-1/8 inches wide. e. Cut silesia or polyester and cotton stays for armhole and shoulder seams on the bias 3/4 inch wide and 4 ±1/4 inches long. Cut silesia or polyester and cotton for binding the neck edge of the coat front interlining on the bias, 3/4 inch wide and approximately 5 inches long. Cut the silesia or polyester and cotton reinforcement pieces for collar eyelets not less than 2 inches long by 1-3/4 inches wide.

TABLE I MANUFACTURING REQUIREMENTS

OPN NO.	OPERATION	Stitch Type	Seam or Stitch'g Type	Stitches Per Inch	THREAD	
					Needle	Bobbin or Looper
	f. Cut the cotton buckram, for interlining the collar on the straight in accordance with the pattern furnished. g. Cut the cotton felt, for padding the collar, 1-1/4 inches wide and of sufficient length to fold over the ends of the interlining for each size collar. h. Cut the piping material (see 3.3.11) for piping the front and bottom edges of coats, edges of shoulder straps, collar, and ornamental sleeve patch, on the straight. The piping shall be cut 5/8 to 3/4 inch wide for shoulder straps, collar, and ornamental sleeve patches, and 1 inch wide for front and bottom edges of coat. Cut the binding material specified in 3.3.12 for the top and bottom edges of the collar interlining 1-1/8 inches wide on the straight. i. Cut the wigan for reinforcing the bottom of sleeves on the bias in accordance with the pattern. j. Punch the reinforcement discs for buttons secured to the side seam from cloth, cotton, buckram. The reinforcement discs shall be 7/8 inch diameter with a 1/8-inch diameter hole at the center.

TABLE I MANUFACTURING REQUIREMENTS

OPN NO.	OPERATION	Stitch Type	Seam or Stitch'g Type	Stitches Per Inch	THREAD	
					Needle	Bobbin or Looper
2.	Replacement of damaged parts. a. At time of cutting replace any part of coat containing holes, seriously weakening defects, such as smashes, multiple floats, loose or weakening slubs, etc. expected to develop into holes, shade bars and dye streaks or unsightly slubs etc. affecting appearance. b. Replace any part damaged during the manufacturing process by needle chews which may be expected to develop into holes, scissor or knife cuts, tears, holes, mends or burns, in the material, affecting appearance.					
3.	Shade marking. a. Mark or ticket (see 3.6.1. 3) all component parts cut from one piece of basic and lining materials, and pairs of sleeve linings when cut from ends, to insure uniform shade and size throughout the coat. b. The use of tickets with any metal fastening devices is prohibited on the rayon lining.

TABLE I MANUFACTURING REQUIREMENTS

OPN NO.	OPERATION	Stitch Type	Seam or Stitch'g Type	Stitches Per Inch	THREAD	
					Needle	Bobbin or Looper
46.	Trim coat front interlining. a. Trim the top edge of coat interlining even with the top edge of fronts, from the point of shoulder to the collar notch. b. Notch the top edge of the interlining in line with the collar notch. c. Remove stitches joining the front edge of silesia or polyester and cotton to coat front interlining, approximately 1/2 inch back from front and top edge of fronts. d. Trim the interlining only, even with the front and bottom edges of fronts. e. Turn the fronts inside out and trim the interlining only, approximately 1/4 inch back from the front and top edge of fronts. f. Trim the shoulder edge of the coat front interlining to approximately 3/4 inch from shoulder at armhole edge of fronts; taper the trimming to 3/8 inch at the neck.					
47.	Bind front and top edge of interlining. a. Smoothly fold the silesia, or polyester and cotton, at the top and front edge of the interlining, over the respective raw edges to the underside. Secure the front turned under portion of the silesia, or polyester and cotton, to the body of the interlining with three rows of stitches 1/4 inch apart, placing the first row 1/8 inch from folded front edge and catching the upper turned under portion in the stitching.	301	EFa-1	12-16	A	A

TABLE I MANUFACTURING REQUIREMENTS

OPN NO.	OPERATION	Stitch Type	Seam or Stitch'g Type	Stitches Per Inch	THREAD	
					Needle	Bobbin or Looper
48.	Bind top neck edge of interlining.					
	Finished appearance. The silesia or polyester and cotton binding shall be uniformly stitched to the top edge of the coat front interlining from the collar notch to the shoulder point.					
	a. Lap the 3/4-inch-wide binding on the outside of the coat front interlining, from the collar notch to the shoulder point, approximately 1/4 inch. Stitch the binding to the interlining 1/8 inch from the raw edge of the binding.	301	LSa-1	12-16	A	A
	b. Smoothly fold the free edge of the binding over the top edge and to the underside of the interlining. Secure the free edge of binding to the interlining with a row of stitches 1/8 inch from the raw edge of the binding.	301		12-16	A	A
49.	Fell piping to coat front interlining.					
	a. Place the inner edge of piping on the outside of the interlining at the top front and bottom edges . Baste piping to interlining through the fronts.	101				
	b. Fell the upper, front and lower inner edges of the piping to the coat front interlining.	301 or Hand	EFc-1	4-6 4-6	A C (silk)	A
	c. Pull and remove basting stitches from piping.					
	d. Press the left and right fronts on a suitable type pressing machine. The chest shall conform to the shape of the body.

TABLE I MANUFACTURING REQUIREMENTS

OPN NO.	OPERATION	Stitch Type	Seam or Stitch'g Type	Stitches Per Inch	THREAD	
					Needle	Bobbin or Looper
50.	Set belt loops. Finished appearance. The belt loops shall finish vertically straight. a. Center the belt loops vertically on the side seam with the pointed end towards the bottom of the coat with the raw edge of the loop in horizontal alignment with the mark for the bottom buttonhole as indicated by the pattern.					
	b. Seam loops to the coat 1/4 inch from the raw edge.	301	LSq-2 (a)	12-16	A	A (silk)
	c. Turn the loop at the seam with the pointed end towards the top edge of coat, and secure loop to coat with a row of stitches 1/4 inch from the raised edge.	301	LSq-2 (b)	12-16	A	A (silk)
51.	Join facing to fronts. a. Position the left and right fronts to the respective front facings (face to face) with the waistline notch of the front in line with the notch on the facing and the front piping edge approximately 3/8 inch from the front edge of facing. Mark the facing along the top, front and bottom edge of coat.					
	b. Lap the front edge of the right and left fronts respectively on the outside of the facing at the marks and join the front to the facing as close as possible to, but not on top of, the stitching joining the piping to the front. The stitching shall extend from the top to bottom edge of coat front edge only. c. Trim excess facing material where necessary.	301	LSa-1	12-16	A	A (silk)

					Needle	Bobbin or Looper
81.	Press coat. (cont'd) c. Press the entire collar smooth and flat. d. Press the fronts on a body machine, shrinking in and properly shaping the chest. e. Press the sides, working the fullness towards the back. f. Press the back smooth and flat, removing all fullness. g. Press the sleeves smooth and flat, creasing at the backarm and forearm seam. The backarm crease shall be on the backarm seam. The forearm and backarm crease shall extend uniformly to a point approximately 3 to 3-1/2 inches below the base of the armhole. h. Block the shoulders to remove the fullness and press shoulders smooth on a shoulder shaping machine. Press the shoulder strap flat. i. Press the armhole solid from the inside, creasing the armhole at the front and creasing the excess material at the armpit. The armpit and back of the armhole shall be held short while pressing. j. Block the armholes on a pressing buck, shrinking in the top sleeves. k. Press lower edge of coat smooth, flat and even. l. Remove all wrinkles and impressions from under shoulder straps.

TABLE I MANUFACTURING REQUIREMENTS

OPN NO.	OPERATION	Stitch Type	Seam or Stitch'g Type	Stitches Per Inch	THREAD	
					Needle	Bobbin or Looper
81.	Press coat. (cont'd) m. Press body lining throughout, removing all back wrinkles and creases. Press the front and back lining pleats smooth and flat. n. Remove all gloss marks. o. Remove any wrinkles and creases missed by previous pressing operations.					
82.	Mark for belt loop buttons. a. Mark each side seam for the location of one removable 27-line insignia button to properly align with the eyelet buttonhole in the belt loop.					
83.	Cut opening for belt loop buttons. a. Cut a vertical opening, approximately 1/4 inch long, at the mark on each side seam. The opening shall be made through side seam of the wool parts of the coat only. b. Securely tack or bartack each end of the opening.	Hand or 301		2-4 4-6	C (silk) A	 A (silk)
84.	Attach buttons. a. Insert the shank of one 40-line insignia button through each eyelet on the right front . Secure buttons to front on the inside with metal ring toggle. b. Insert the shank of one 27-line insignia button through each eyelet on shoulders, ornamental sleeve patch, and through the openings cut at side seams.

46	47	33-3/4	20-1/2

1/ Tolerance for all measurements ±3/8 inch.
2/ Breast measurement taken with coat buttoned, from folded edge to folded edge in line with pit of armhole; multiply by 2.
3/ Back length measurement shall be taken along center back seam from lower edge of collar to piped bottom edge of coat.
4/ Sleeve length measurement shall be taken along forearm seam from pit of armhole to bottom edge of sleeve.

*3.8 Workmanship. The finished coats shall conform to the quality and grade of product established by this specification. The occurrence of defects shall not exceed the levels set by the applicable acceptable levels (AQL).

4. QUALITY ASSURANCE PROVISIONS

*4.1 Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the supplier is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract or order, the supplier may use his own or any other facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure supplies and service conform to prescribed requirements.

*4.1.1 Certificate of compliance. Where certificate of compliance are submitted, the Government reserves the right to check test such items to determine the validity of the certification.

*4.2 Inspection. Inspection shall be in accordance with the provisions set forth in MIL-STD-105, except where otherwise indicated herein.

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T04:39Z
Check the source to verify that this is the current version before use.

*4.2.1 First article inspection. When first article is required, inspection shall be performed on a completely fabricated coat for conformance to provisions of this specification.

*4.2.2 Component and material inspection. In accordance with 4.1 above, components and materials shall be tested in accordance with all the requirements of reference specifications, figures and standards unless otherwise excluded, amended, modified or qualified in this specification or applicable purchase document. In addition to testing provisions contained in subsidiary specifications, figures and standards, testing shall be performed on components listed in Table III for characteristics noted. Wherever applicable, tests shall be conducted in accordance with FED-STD-191. When the "Results reported as" columns are not indicated, they shall be reported as required by the referenced test method. All test reports shall contain individual values utilized in expressing the final results.

*4.2.2.1 Sampling for testing. Unless otherwise specified in subsidiary specifications, sampling shall be in accordance with the following. The lot shall be unacceptable if one or more sample units fail to meet any test requirement specified herein.

Lot size	Sample size
800 or less	2
801 or 22,000 inclusive	3
22,001 and over	5

The unit for expressing lot sizes and sample unit for testing each component shall be in accordance with applicable subsidiary specifications and as follows:

Component	Lot sizes expressed as	Sample unit for testing
Cloth, cotton, buckram (collar interlining)	yards	2 yards full width
Padding for collar	yards	1/4 yard full width
Hook and eye	100 each	2 each, hook and eye

*4.2.2.2 In-process inspection. Inspection shall be performed during manufacturing of the end item to ascertain that the operations are performed as specified herein. The Government reserves the right to determine the acceptability of construction methods not performed in accordance with specified requirements for operations or subassemblies.

*4.2.3 Examination of end item. The end item shall be examined for defects listed in 4.2.3.2 through 4.2.3.5. The sample unit shall be one coat.

*4.2.3.1 Classification of defects. All defects shall be classified as indicated below, except those with an asterisk (*) in classification column, which shall be classified as follows:

Major defect - When seriously affecting appearance or serviceability.
Minor A defect - When affecting appearance or serviceability but not seriously.

*4.2.3.2 General defects. General defects shall be classified as follows:

Examine	Defect	Classification Major(*)	Minor A	Minor B
Buttonholes (construction)	a. One or more omitted or added.	X		
	b. Wrong type or uncut.		X	
	c. Not corresponding to size of button: - too small, not permitting button to enter buttonhole. - too large, 3/8 inch or more longer than the diameter of button (measured at inside of purling).	X		
	d. Buttonhole not securely caught on fabric causing stitching to pull away from fabric.	X		
	e. Bartack missing or loose on: - one buttonhole. - two or more buttonholes.	X	X	
	f. Bartack misplaced not serving intended purpose on: - one buttonhole. - two or more buttonholes.		X	X
	g. One or more broken stitches in: - one buttonhole. - two or more buttonholes.	X	X	
	h. More than 2 skipped stitches in: - one buttonhole. - two or more buttonholes.		X	X
	i. Ragged edges, affecting appearance.			X
	j. Gimp omitted in one or more buttonholes.		X	
	k. Stitches per buttonhole (not including bartack) less than the minimum specified: - one or two stitches. - three or more stitches.		X	X
	l. One or more buttonholes finished with purling on the underside.	X		

Source: https://assist.dla.mil -- Downloaded: 202610-26T04:39Z
Check the source to verify that this is the current version before use.

Examine	Defect	Classification Major (*)	Minor A	Minor B
	m. Ends of gimp not pulled through to the underside on one or more buttonholes.			X
Button or ring toggles	a. Missing, loose, broken, or defective: - 1 button or ring toggle.		X	
	- 2 or more buttons or 2 or more ring toggles.	X		
	b. Not specified type, size, color or finish.		X	
	c. One or more buttons on right front sewn with the head of the eagle in other than upright position.			X

NOTE: Buttons shall be considered defective if they have sharp, rough or cracked edges; scratches, blemished or imbedded foreign matter on face side of button, loose shanks; or badly shaded.

Cleanness	a. One or more removable spots or stains clearly noticeable outside of coat.		X	
	b. One or more removable spots or stains clearly noticeable, inside of coat.			X
	c One or more spots or stains of an obvious permanent nature.	*		
	d. Thread ends not trimmed, loose thread ends, 2 or more shade markings, or bastings not removed throughout garment (to be scored when the condition exists on major portion of coat).		X	
Components and assembly	a. Any defective component or defect of assembly (not herein classified).	*		
	b. Any component part or required operation omitted (not herein classified).	*

Check the source to verify that this is the current version before use.

Examine	Defect	Classification Major (*)	Minor A	Minor B
Cutting	a. Any component part of basic wool material not cut in accordance with directional lines on patterns, or in accordance with specification requirements.	X		
	b. Piping or binding material cut on the bias.		X	
	c. Any lining part not cut in accordance with directional lines on patterns.		X	
Eyelets (construction)	a. One or more omitted or added.	X		
	b. Wrong type.		X	
	c. Eyelet not securely caught on fabric, causing stitching to pull away from fabric.	X		
	d. Diameter of inside opening less than 1/8 inch or more than 1/4 inch.			X
	e. One or more eyelets uncut.		X	
	f. One or more broken stitches in: - one eyelet. - two or more eyelets.		 X	X
	g. More than two skipped stitches in one or more eyelets.			X
	h. One or more eyelets finished with the purling on the underside.		X	
Hooks and eyes	a. One hook or eye omitted.		X	
	b. Two or more hooks or eyes omitted.	X		
	c. Not specified type or size.		X	
	d. Not aligned, causing collar ends to be uneven by 1/4 inch or more when front is buttoned and hooks and eyes are fastened.		X	

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T04:39Z
Check the source to verify that this is the current version before use.

Examine	Defect	Classification Major (*)	Minor A	Minor B
	e. Hook or eye not securely tacked to ends of collar.		X	
	f. Hooks or eyes misplaced, i.e., hooks positioned on left end eyes positioned on right end of collar.		X	
Material defects and damages	a. Any weakening defect such as smash, multiple float, loose slub, etc., that may develop into a hole.	*		
	b. Any hole (including drill holes).	*		
	c. Shade bar, unsightly slubs, etc: - on outside. - on inside.	*		X
	d. Needle chews which may develop into a hole.	*		
	e. Scissors or knife cut, tear, mend or burn.	*		

NOTE: Material defects and workmanship damages are to be classified as indicated above only when the condition is one which definitely weakens the fabric or when it is so conspicuously located as to be clearly noticeable. Weakening or nonweakening conditions which are inconspicuous and have negligible effect on serviceability are to be classified as follows:

	Material defect Workmanship damages	No defect Minor B defect
Pressing	a. Burned or scorched.	*
	b. Pressing omitted (entire garment).	X
	c. Poorly pressed (unless otherwise classified).	X
	d. Armhole stretched, affecting appearance.	X
	e. Basting or pressing impressions not removed on major portion of coat.	X

Source: https://assist.dla.mil -- Downloaded: 202610-26T04:39Z
Check the source to verify that this is the current version before use.

Examine	Defect	Classification Major (*)	Minor A	Minor B
	f. Gloss not removed throughout coat, affecting appearance.			X
	g. Armholes not blocked or blocked poorly.		X	
	h. Inside of armholes not pressed solid.		X	
	i. Edges bulky, i.e., not pressed solid, affecting appearance.			X
	j. Sleeves not creased as required on forearm and backarm seam.			X
	k. Armhole sleeve seam not pressed open from backarm seam of sleeve and across top as specified.		X	
	l. Linings not pressed smooth.			X
Seams and stitching	a. Accuracy of seaming:			
	1. Any seam twisted, puckered, or pleated, affecting appearance.		X	
	2. Part of garment caught in any unrelated operation or stitching	*		
	3. Unsightly hand felling or blind-stitching exposed on outside of coat, affecting appearance.		X	
	4. Ends of all stitching (when not caught in other seams or stitching) not backtacked or backstitched as required.			X
	5. Wrong color of thread used on outside of coat, affecting appearance.	*		
	b. Gage of stitching (edge or raised stitching).			
	1. Irregular, i.e., unevenly gaged, or various stitchings not uniform, affecting appearance.		X	

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T04:39Z
Check the source to verify that this is the current version before use.

Examine	Defect	Classification Major (*)	Minor A	Minor B
	2. Beyond range of width specified or varies more than 1/16 inch when no range is specified.			X
	c. Open seams			
	1. On outside:			
	- up to 1/4 inch inclusive.			X
	- more than 1/4 inch but not more than 1/2 inch.		X	
	- more than 1/2 inch.	X		
	2. On inside:			
	- more than 1/2 inch (except machine felling).		X	
	- up to 1/2 inch inclusive (except machine felling			X
	- up to 1 inch inclusive (machine felling).			X
	- more than 1 inch (machine felling).		X	

NOTE: One or more broken stitches or two or more continuous skipped or run-off stitches constitute an open seam.

	d. Raw edges			
	1. On outside:			
	- up to 1/8 inclusive.			X
	- more than 1/8 inch but not more than 1/4 inch.		X	
	- more than 1/4 inch.	X		
	2. On inside:			
	- more than 1/8 inch but not more than 1/4 inch.			X
	- more than 1/4 inch.		X	

NOTE: Raw edges shall be classified as such when they occur at places where an edge is required to be turned under. Raw edges not caught in stitching shall be classified as an open seam.

	e. Run-offs (see classification of open seams).

Check the source to verify that this is the current version before use.

Examine	Defect	Classification Major (*)	Minor A	Minor B
	f. Stitch tension:			
	1. Loose tension resulting in loose seam.	X		
	2. Loose tension on raised or edge stitching, resulting in loosely exposed bobbin or top thread.		X	
	3. Tight tension (stitches break when normal strain is applied).	X		
	NOTE: Puckering is evidence of tight tension. When puckering is evident, the inspector shall test by exerting pull in lengthwise direction of seam.			
	g. Stitches per inch (excluding labels) Less than minimum specified:			
	- one or more stitches.			X
	- three stitches.		X	
	- four stitches or more.	X		
	NOTE: To be scored only if condition exists on major portion of seam.			
	h. Wrong stitch or seam type.		X	
	i. Stitching skipped or broken (on edge or raised stitching when seam is seamed, turned and stitched):			
	- 1/4 inch or more but not more than 1/2 inch.			X
	- more than 1/2 inch.		X	
Shaded parts	a. On outside.	*		
	b. On inside			
	1. Any lining part badly shaded (except sleeve lining).		X	
	2. Any lining part badly shaded or pairs not matching each other.			X

Check the source to verify that this is the current version before use.

*4.2.3.3 Detailed defects (outside of coat). Detailed defects on outside of coat with coat buttoned on form shall be classified as follows:

Examine	Defect	Classification Major (*)	Minor A	Minor B
Collar (construction and setting)	a. Interlining omitted.	X		
	b. Interlining tight or twisted, causing puckers on collar, affecting appearance.		X	
	c. Tight at joining to front or back, causing puckers or pleats at neck of coat, affecting appearance.	*		
	d. Piping irregular, affecting appearance.		X	
	e. Collar ends overlapping when fastened.		X	
	f. Collar ends spread open more than 3/8 inch when fastened.		X	
	g. One ply of outer basic material.	X		
	h. Binding strip at top or bottom edge of interlining omitted.		X	
	i. Binding strip at top or bottom edge of interlining other than material specified.		X	
	j. Center of eyelets from finished ends of collar: - less than 1-3/8 inches but not less than 1-1/4 inches.			X
	- more than 1-5/8 inches but not more than 1-3/4 inches.			X
	- less than 1-1/4 inches or more than 1-3/4 inches.		X	
	k. One or both eyelets off-center with top and bottom edges of collar by more than 1/4 inch.			X
	l. Collar off-center by more than 3/8 inch.		X

Examine	Defect	Classification Major (*)	Minor A	Minor B
Shoulder (construction)	Improperly joined or set, causing shoulders or back to twist.	*		
Shoulder pads	a. Not completely caught in armhole tacking.		X	
	b. Misplaced, not serving intended purpose, i.e., too far back or too far forward.		X	
	c. One or both pads omitted.		X	
Shoulder straps (construction and setting)	a. Misplaced, i.e., one strap further forward or back from position of other loop, affecting appearance.		X	
	b. Misplaced, so that it will not lie flat when buttoned, causing bulge or twist on strap.	*		
	c. Poorly shaped.			X
	d. Shoulder seam exposed beyond back edge of shoulder strap (except rounded end).		X	
	e. Width of shoulder strap at armhole seam (including piping):			
	- less than 2-1/4 inches but not less than 2-1/8 inches			X
	- more than 2-1/2 inches but not more than 2-5/8 inches.			X
	- less than 2-1/8 inches or more than 2-5/8 inches.		X	
	f. Width of shoulder strap across the buttonhole eyelet end (including piping):			
	- less than 1-5/8 inches but not less than 1-1/2 inches.			X
	- more than 1-3/8 inches but not more than 2 inches.			X
	- less than 1-1/2 inches or more than 2 inches.		X	

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T04:39Z
Check the source to verify that this is the current version before use.

Examine	Defect	Classification Major (*)	Minor A	Minor B
	g. Rounded end of shoulder strap positioned less than 1/4 inch or more than 3/8 inch from collar edge.			X
	h. Piping irregular in width, affecting appearance.		X	
	i. Upperside of strap full or twisted, affecting appearance.			X
	j. Back edge of strap less than 1/4 inch or more than 1/2 inch from shoulder seam at armhole.			X
Shoulder strap buttonhole and button	a. Button not aligned with buttonhole, causing a bulge or twist on strap or puckers on shoulder, affecting appearance.		X	
	b. Buttons not uniformly set by more than 1/4 inch.		X	
	c. Buttonhole 1/4 inch or more off center.		X	
	d. Buttonhole from outer edge of piping at the collar end of strap: - less than 5/8 inch but not less than 1/2 inch or more than 3/4 inch.			X
	- less than 1/2 inch.		X	
Armholes (construction)	a. Badly stretched, affecting appearance.	*		
	b. Taped too tight, causing puckering around armhole seam, affecting appearance.	*		
	c. Crooked seam, affecting appearance.		X	
	d. Tape stitching exposed and visible to outside surface.			X

Examine	Defect	Classification Major (*)	Minor A	Minor B
	b. One or both eyelet covers omitted.		X	
	c. One or both eyelet covers not covering eyelet.		X	
	d. Width of collar eyelet less than 1-5/8 inches or more than 1-7/8 inches.			X
	e. Felling on front edge and along lower corner of one or both eyelet covers omitted.		X	
	f. Felling along lower corner of one or both eyelet covers extending for a distance of more than 3/4 inch.			X
	g. Top or bottom hook positioned less than 1/4 inch from top or bottom edges respectively of collar.			X
	h. Middle hook not positioned midway between top and bottom hook.			X

*4.2.3.5 Finished measurements. Any measurement deviating from the nominal dimension and tolerance specified in Table II shall be classified as a size measurement defect. Sleeve lengths uneven by more than 1/2 inch shall be classified as a size measurement defect.

*4.2.3.6 Inspection levels and AQL's. Inspection levels and AQL's expressed in defects per 100 units (DHU) shall be as follows:

4.2.3.2 through 4.2.3.4

Inspection Level II of MIL-STD-105

AQL's		
	Major	1.5 DHU
	Major & Minor A (combined)	10.0 DHU
	Total Major, Minor A and Minor B (combined)	40.0 DHU

4.2.3.5

Inspection Level S-3 of MIL-STD-105

One class	4.0 DHU

Source: https://assist.dla.mil -- Downloaded: 202610-26T04:39Z
Check the source to verify that this is the current version before use.

*4.2.4 Examination of preparation for delivery requirements. An examination shall be made to determine compliance with packaging, packing and marking requirements of Section 5 of this specification. Defects shall be scored in accordance with the list below. The sample unit shall be on shipping container fully prepared for delivery with the exception that it need not be sealed. Defects of closure listed below shall be examined on shipping containers fully prepared for delivery. The lot size shall be the number of shipping containers in the end item inspection lot. The inspection level shall be S-2 and the AQL shall be 4.0 DHU.

Examine	Defect
Marking (exterior and interior)	Omitted, incorrect, illegible, of improper size, location, sequence, or method of application.
Materials	Any component missing or damaged
Workmanship	Inadequate application of components, such as incomplete closure of case liners, container flaps, loose strapping, inadequate stapling. Bulging or distortion of containers.
Content	Number of coats per container is more or less than required.

*4.3 Tests.

*4.3.1 Metal composition. Chemical composition shall be determined in accordance with test method III of FED-STD-151.

*4.3.2 Test for tackiness. At room temperature (60° to 80°F) press a piece of tissue paper against the lacquered surface for 30 seconds, using any pressure capable of being exerted by the thumb and two fingers. The tissue shall not adhere to the lacquered surface, but shall fall free when pressure is released.

Check the source to verify that this is the current version before use.

5. PREPARATION FOR DELIVERY

*5.1 Packaging and packing. Unless otherwise specified (see 6.2), the coats shall be packaged in accordance with good commercial practice and packed in a manner to insure carrier acceptance and safe delivery at destination. Not less than 8 ounces of naphthalene, conforming to class B of R-N-91,or equal, shall be uniformly distributed throughout the entire contents of shipping container. Containers shall be in accordance with Uniform Freight Classification Rules or regulations of other carriers applicable to the mode of transportation.

5.2 Marking. In addition to any special marking required by the contract or order, the shipping containers shall be marked in accordance with the requirements of MIL-STD-129.

6. NOTES

*6.1 Intended use. The coat described herein is intended for wear by enlisted male personnel of the U.S. Marine Corps Drum and Bugle Corps.

*6.2 Ordering data. Purchasers should exercise any desired options offered herein, and procurement documents should specify the following:

*6.2.1 Procurement requirements.

(a) Title, number and date of this specification.
(b) Sizes required (see 1.2).
(c) Whether first article is required (see 3.2).
(d) Number of coats in first article (see 3.2).
(e) When coats shall not be packaged and packed in accordance with commercial practice (see 5.1).

*6.2.2 Contract data requirements. Data conforming to Data Item Descriptions DI-R-4803, DI-R-4805, DI-T-4901, DI-T-4902, DI-T-4903 and DI-T-4904 will usually be required for delivery in connection with this specification. When so required, such data will be specified for delivery on a DD Form 1423 included in the contract.

6.3 Samples and shade samples. For information regarding availability of sample coats and standard shades specified, address inquiry to the procuring activity issuing the invitation for bids.

*6.4 First article. First article examination, test and approval shall be as specified by the contracting officer (see 3.2).

*6.5 Moth repellent. The moth repellent requirement (see 5.1) is not applicable when coats are made of moth repellent treated cloth.

Check the source to verify that this is the current version before use.

*6.6 Marginal notations. The margins of this specifications are marked with an asterisk to indicate where changes (additions, modifications, corrections, deletions) from the previous issue were made. This was done as a convenience only and the Government assumes no liability whatsoever for any inaccuracies in these notations. Bidders and contractors are cautioned to evaluate the requirements of this document based on the entire content irrespective of the marginal notations and relationship of the last previous issue.
