DETAIL SPECIFICATION

COAT, MAN'S - SCARLET, DRUM AND BUGLE CORPS, MUSICIANS

This specification is approved for use by U.S. Marine Corps, Department of the Navy, and is available for use by all Departments and Agencies of the Department of Defense.

1. SCOPE

1.1. Scope. This specification covers requirements for musician's scarlet wool drum and bugle corps coats.

1.2. Classification. The coats will be one type in the following sizes as specified (see 6.2):

Beneficial comments (recommendations, additions, deletions) and any pertinent data which may be of use in improving this document should be addressed to the Commander (PSE-D), Marine Corps Systems Command, Quantico, VA 22134-5010 by using the Standardization Document Improvement Proposal (DD Form 1426) appearing at the end of this document or by letter.

AMSC N/A FSC 8405

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

Schedule of sizes

(Short, Regular, Long, Extra Long)

34 35 36 37 38 39 40 41 42 44 46

1.3. Individual orders. When the coat is custom tailored to an individual order, this specification will govern except that the detail requirements of Section 3, Table I, may be modified to the extent necessary for good custom tailoring practices.

2. APPLICABLE DOCUMENTS

2.1. General. The documents listed in this section are specified in sections 3 and 4 of this specification. This section does not include documents cited in other sections of this specification or recommended for additional information or as examples. While every effort has been made to ensure the completeness of this list, document users are cautioned that they must meet all specified requirements documents cited in sections 3 and 4 of this specification, whether or not they are listed.

2.2. Government documents.

2.2.1 Specifications, standards, and handbooks. The following specifications, standards, and handbooks form a part of this document to the extent specified herein. Unless otherwise specified, the issues of these documents are those listed in the issue of the Department of Defense Index of Specifications and Standards (DoDISS) and supplement thereto, cited in the solicitation (see 6.2).

2.4. Order of precedence. In the event of a conflict between the text of this document and the references cited herein, the text of this document takes precedence. Nothing in this document, however, supersedes applicable laws and regulations unless a specific exemption has been obtained.

3. REQUIREMENTS

3.1. Standard sample. Standard samples are furnished solely for guidance and information to the contractor (see 6.3). Variation from this specification may appear in the sample, in which case the specification shall govern.

3.2. First article. When specified (see 6.2), a sample shall be subjected to first article inspection in accordance with 4.3.

3.3. Materials.

3.3.1 Basic material. The basic material shall be cloth, wool, tropical, scarlet, shade 2502 (see 6.3), 10.5 ounces, conforming to type I, class 1 of MIL-C-21115.

3.3.2 Lining. The material for lining the coat and collar and for making the underarm shields, collar eyelet covers, coat hanger, straps to secure the lining to the bottom edge of the coat, and the front eyelet cover shall be cloth, satin rayon twill, scarlet, shade 2506 (see 6.3), conforming to class 1 of MIL-C-368.

3.3.3 Cloth, twill or plain weave. The stays for the armhole and shoulder seams; the reinforcement pieces for the collar eyelets; and the binding for the neck edge of the coat front interlining and the lower edge of the collar interlining shall be cut from cloth, twill or plain weave, polyester or polyester

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T04:39Z
Check the source to verify that this is the current version before use.

blend conforming to A-A-52106, except the requirement for non-fibrous material and seam efficiency shall not apply. The color of the cloth shall be natural, for the armhole and shoulder seam stays, the collar eyelet reinforcement pieces, and the binding for the neck edge of the coat front interlining; and black for the binding for the lower edge of the collar interlining.

3.3.4 Collar interlining. The material for interlining the collar shall be cloth, cotton buckram, double texture, laminated starch finish, natural color, conforming to type IV of A-A-50186. The weight of the laminated cloth shall be 21 to 23 ounces per square yard.

3.3.5 Reinforcement discs. The reinforcement discs for the buttons secured to the back side seam, with ring toggles, shall be punched from cloth, cotton, buckram specified in 3.3.4. The reinforcement discs shall be 7/8 inch in diameter with a 1/8 inch diameter hole at the center.

3.3.6 Padding for collar. The material for padding the collar shall be suitable cotton felt, white, weight 4.25 to 4.75 ounces per square yard.

3.3.7 Coat fronts. The coat fronts shall conform to class 1 of MIL-DTL-82114.

3.3.8 Shoulder pads. The shoulder pad shall conform to the requirements of type I, class 2 of MIL-P-15064.

3.3.9 Sleeve-head pads. The sleeve-head pads shall conform to type IV of MIL-P-15064.

3.3.10 Stay tape. The stay tape for armholes shall be cotton, unbleached 1/4 inch wide, conforming to type II, class 1 of A-A-52071, except the requirements for non-fibrous material shall not apply.

3.3.11 Piping. The material for piping shall be cloth, polyester/wool blend, black, shade 2607 (see 6.3), conforming to type III of MIL-C-21115, cut 5/8 to 3/4 inch wide for the piping for shoulder straps, lower edge of collar, and ornamental sleeve patches; and 1 inch wide for piping the front and bottom edges of the coat.

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T04:39Z
Check the source to verify that this is the current version before use.

3.3.11.1.Vinyl piping. The white vinyl piping for the upper edge of the collar shall be tubular, with 7/16 inch wide welt and serrated edges.

3.3.12 Bias binding. The binding for the underarm shields shall be bias cut out of the material specified in 3.3.2. The binding shall be 5/8 to 7/8 inch wide and have sized edges.

3.3.13 Wigan. The material for reinforcing the bottom edge of the sleeves shall be cloth, cotton wigan, 2.5 ounces, conforming to type I of A-A-52097.

3.3.14 Thread.

3.3.14.1.Silk thread. The silk thread shall conform to A-A-50196 as follows, except the requirements for extractable matter shall not apply.

Use	Type	Class	Ticket No.	Ply
Bartacks and all outside seaming and stitching.	I	-	A	-
Machine felling.	-	-	O	-
Making buttonholes in coat.	I	-	B and F	3
Hand felling and hand selling.	III	3	C	2

3.3.14.2.Cotton thread. The cotton thread shall conform to A-A-52094 as follows:

Use	Type	Ticket No.	Ply
All inside seaming and stitching.	III	A	3
Serging and overedge stitching.	I	70	2
Machine tacking armholes.	I	40	3

The thread for basting shall be good commercial grade cotton. As an alternate to the cotton thread, a polyester core, cotton or polyester covered thread conforming to A-A-50199, ticket No. 70, 2-ply or ticket No. 50, 2-ply may be used.

3.3.14.3.Color and colorfastness. All thread shall be dyed scarlet, shade W, cable No. 66040, except the cotton thread for basting and machine tacking armholes may be white, and the cotton thread for overedge stitch the piping at the bottom edge of the

Source: https://assist.dla.mil -- Downloaded: 202610-26T04:39Z
Check the source to verify that this is the current version before use.

coats shall be black. The colored threads shall show the following colorfastness when tested as specified in the applicable thread specification:

Thread	Color	Wet (dry) Cleaning	Light
Cotton	Scarlet	Good	--
Silk	Scarlet	Fair	Fair
Silk	Black	Good	Good

NOTE: See DoD Standard Color Card of Standardized Shades for Sewing Threads 1968.

3.3.15 Gimp. The buttonhole gimp shall be cotton, ticket No. 8, soft or glazed finish, conforming to type I or II of A-A-50198. The color of the gimp shall be scarlet, shade W, cable No. 66040, and shall show good fastness to wet (dry) cleaning.

3.3.16 Buttons.

3.3.16.1. Insignia buttons. The insignia buttons shall be metal, gold plated, 27-line for shoulders, belt loops and ornamental sleeve patches and 40-line for fronts, conforming to type I, style 3, class A, subclass 1 of MIL-DTL-3461.

3.3.16.2. Ring toggles. Ring toggles for securing the 27-line insignia buttons to the belt loops, ornamental sleeve patches and shoulder straps shall conform to MIL-DTL-3461.

3.3.17 Collar closure hook and eye. The hook and eye for closing the collar shall be brass, black, japanned finish or black chemical finish, followed by a clear lacquer coating and conform to the requirements of Figure 6.

3.3.17.1. Eyelets. The eyelets for the collar shall be brass, rolled flange type, with the barrel scored with six to eight scores. The eyelets shall conform to MIL-E-20652, sheet 1A-BE108 and be enameled a black shade.

3.3.18 Labels. Each coat shall have a combination identification/instruction label and size label conforming to DDD-L-20. The coats are intended to be wet (dry) cleaned and the label shall show fastness to wet (dry) cleaning.

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T04:39Z
Check the source to verify that this is the current version before use.

3.3.18.1.Combination identification/instruction label. The combination identification/instruction label shall conform to type VI, classes 1 and 3 (combined) of DDD-L-20, except all printing and the space between lines of printing shall be minimum 10 point (approximately 1/8 inch). The content and format shall be as follows:

Nomenclature:
Contract number:
Name of contractor:
Wool Products Act information:
DRY CLEAN ONLY

3.3.18.2.Size label. The size label shall be type VI, class 2 of DDD-L-20. The label shall consist of the numerical size designation specified in 1.2 followed by the letter S (short), R (regular), L (long), or XL (extra long) as shown by the following example:

40R

3.4. Design. The coat shall be the U.S. Marine Corps design shown on Figures 1 through 4. The coat shall be seven button, single breasted, form-fitting, fully lined having a one-piece front; waist and chest darts; a four-piece back without a center vent; belt loops to button; ornamented at sleeve ends; shoulder straps to button; and a stand up collar with hook and eye for front closure and a metal eyelet at each end for removable branch of service insignia. The top and bottom edges of the collar; the front and bottom edges of the coat; the top, bottom, and scalloped back edges of the ornamental sleeve patches; and the edges of the shoulder straps shall be piped with the material specified in 3.3.11.

3.5. Patterns. Standard patterns will be furnished to the contractor by the Government. The standard patterns shall not be altered in any way and shall be used only as a guide for cutting the contractor's working patterns. The contractor's working patterns shall be identical to the standard pattern. The standard patterns shall provide 5/8 inch allowance for center back, 3/4 inch allowance for side seams, and 3/8 inch allowance for all other seams except as otherwise specified in Table I. Standard patterns show size and are marked and notched for proper cutting, placement and assembly of component parts.

3.6. Construction.

3.6.1 Manufacturing requirements. The coat shall be manufactured in accordance with the operations and the stitch, seam, and stitching types specified in Table I.

3.6.1.1. Operations. The contractor is not required to follow the exact sequence of the operations as listed in Table I, but all operations specified shall be used to manufacture the coats.

3.6.1.2. Stitches, seams and stitching. The stitch, seam and stitching types specified in Table I shall conform to FED-STD-751. The number of stitches per inch as specified in Table I indicates the minimum and maximum number permitted. All overedge stitching shall be done on serging machine with a knife attachment properly set to trim the raveled edge without cutting the material.

3.6.1.2.1 Tacking and backstitching. Ends all seams and stitching (stitch type 301), except ends of a continuous line of stitching, when not caught in other seams or stitches, shall be backstitched not less than 1/4 inch. The ends of a continuous line of stitching shall be overlapped not less than 1/2 inch. Thread breaks shall be secured back of the break not less than 1/2 inch.

3.6.1.3. Shade markings. The component parts of the coat cut from one piece of wool and lining materials, including pairs of sleeve linings and underarm shields when cut from ends, shall be shade marked to ensure a uniform shade and size throughout the garment. Any method of shade marking may be used except:

a. Corrosive metal fastening devices.
b. Sew-on shade tickets.
c. Adhesive type tickets where adhesive causes discoloration or whose adhesive mass adheres to the material upon removal of the tickets.

TABLE I. Manufacturing requirements.

NO	OPERATION	STCH TYPE	SEAM/ STCH TYPE	STCH/IN	NDL	BOB/ LPR
1	Cutting. a. Cut coats in strict accordance with the patterns furnished by the Government. b. Cut all materials in the direction of the warp as indicated by the directional lines on the patterns. c. Cut all scarlet wool parts of the coat from one piece of basic material, except the following parts may be cut from ends: under ply of shoulder straps and under ply of ornamental sleeve patch. Parts cut from ends shall harmonize with the shade of the coat. d. Cut the body and collar linings, the front eyelet covers, and the top ply of the underarm shields from one piece of rayon lining material. All other rayon lining parts may be cut from ends. When pairs of sleeve linings are cut from ends, the shade of the sleeve linings shall match. Cut the strips for coat hanger and lining securing straps 1-1/8 inches wide. e. Cut twill or plain weave stays for the armhole and shoulder seams on the bias 3/8 inch wide and 4 ± 1/4 inches long. Cut the twill or plain weave for binding the neck edge of the coat front interlining on the bias, 3/4 inch wide and approximately 5 inches long. Cut the twill or plain weave reinforcement pieces of collar eyelets not less than 2 inches long by 1-3/4 inches wide. f. Cut the cotton buckram for interlining the collar on the straight in accordance with the pattern furnished. g. Cut the cotton felt, for padding the collar, 1-1/4 inches wide and of sufficient length to fold over the ends of the interlining for each size collar.

TABLE I. Manufacturing requirements - Continued.

NO	OPERATION	STCH TYPE	SEAM/ STCH TYPE	STCH/IN	NDL	BOB/ LPR
1	Cutting. (cont'd) h. Cut the piping material (see 3.3.11) for piping the front and bottom edges of coats, the edges of the shoulder straps, lower edge of collar, and ornamental sleeve patch, on the straight. The piping shall but cut 5/8 to 3/4 inch wide for shoulder straps, and ornamental sleeve patches, and 1 inch wide for front and bottom edges of coat. Cut the binding material specified in 3.3.12 for the top and bottom edges of the collar interlining 1-1/8 inches wide on the straight. i. Cut the wigan for reinforcing the bottom of the sleeves on the bias in accordance with the pattern. j. Punch the reinforcement discs for buttons secured to the side seam from cloth, cotton buckram. The reinforcement discs shall be 7/8 inch in diameter with 1/8 inch diameter hole at the center.					
2	Replacement of damaged parts. a. At the time of cutting replace any part, of coat containing holes; seriously weakening defects, such as smashes, multiple floats, loose or weakening slubs, etc. expected to develop into holes; shade bars and dye streaks; or unsightly slubs etc., affecting appearance. b. Replace any part damaged during the manufacturing process by needle chews which may be expected to develop into holes, scissor or knife cuts, tears, mends or burns, in the material, affecting appearance.					
3	Shade marking. a. Mark or ticket (see 3.6.1.3) all component parts cut from one piece of basic and lining materials, and pairs of sleeve joinings when cut from ends, to ensure uniform shade and size through the coat.

NO	OPERATION	STCH TYPE	SEAM/ STCH TYPE	STCH/IN	NDL	BOB/ LPR
3	Shade marking. (cont'd)					
	b. The use of tickets with any metal fastening devices is prohibited on the rayon lining.					
4	Make coat hanger and lining securing straps.					
	Finished appearance. The coat hanger and lining securing straps shall finish 1/4 to 3/8 inch wide.					
	a. Fold the 1-1/8 inch wide strip of lining material in half lengthwise, turn the edges to the inside and seam 1/16 inch from the turned edges.	301	EFp-1	12-16	A	A
	b. Cut the coat hanger 3-3/4 ± 1/4 inches long.					
	c. Cut the lining securing straps 4-1/2 ± 1/4 inches long.					
5	Make collar eyelet covers.					
	Finished appearance. The collar eyelet covers shall finish 1-3/4 ± 1/8 inches wide.					
	a. Turn under the side edges of the collar eyelet cover and stitch 1/16 to 1/8 inch from folded edges, catching the turned under portions in the stitching.	301	EFa-1 (each side edge)	12-16	A	A
	b. Fold each cover in half across the width and seam 1/16 to 1/8 inch from the folded side edges.	301	SSa-1	12-16	A	A
6	Make underarm shields.					
	Finished appearance. The shields shall be made from one ply of basic material and shall finish smooth and flat without puckers, pleats, gathers, or other distortions.					
	a. Bind the rounded edge of shield with bias binding, turning under the outside raw edge of the binding only, and catching the turned under portion in the stitching 1/16 inch from the folded edge.	301	SSa-1	12-16	A	A

TABLE I. Manufacturing requirements - Continued.

NO	OPERATION	STCH TYPE	SEAM/ STCH TYPE	STCH/IN	NDL	BOB/ LPR
7	Make front eyelet cover.					
	a. Fold front eyelet cover in half lengthwise, turn in the raw top and bottom edges and seam 1/16 to 1/8 inch from the raw edge and folded top and bottom edges.	301	SSa-1 (raw edge) SSc-1 (top and bottom edges)	12-16	A	A
8	Make belt loops.					
	Finished appearance. The belt loops shall be uniform in appearance and shall finish smooth and flat without puckers, pleats, gathers, or other distortions. The buttonholes shall be clean cut, well made and well worked over gimp to fit a 27-line insignia button. The gimp and thread shall be pulled through to the underside of the loops. The purling of the buttonholes shall be on the outside.					
	a. Fold the belt loops in half lengthwise, face to face, forming two plies.					
	b. Seam the two plies together along the side and pointed edges, 3/16 inch from the raw edges.	301	SSe-2 (a)	12-16	A (silk)	A (silk)
	c. Trim the corners and point for proper turning. Turn loops, working out completely the point and seamed edges.					
	d. Edge stitch the loops uniformly 1/16 to 1/8 inch from folded and seamed edges.	301	SSe-2 (b) (seamed edges) OSf-1 (folded edges)	12-16	A (silk)	A (silk)
	e. Make a horizontal, eyelet end, square-bar type buttonhole, cut 3/4 inch long, in each loop midway between the back and front edges, with the inside edge of the eyelet end of the buttonhole finishing 5/8 inch from pointed end of the loop.	Button-holes		60 per button-hole (not incl. bartack)	B (silk)	F (silk)

TABLE I. Manufacturing requirements - Continued.

NO	OPERATION	STCH TYPE	SEAM/ STCH TYPE	STCH/IN	NDL	BOB/ LPR
8	Make belt loops. (cont'd)					
	f. Securely bartack the end of the buttonholes, catching the ends of the gimp and thread in the bartack. Trim the ends of the gimp and thread.	Bartack		21 per bartack	A (silk)	A (silk)
9	Make shoulder straps.					
	Finished appearance. The shoulder straps shall be uniform in appearance and shall finish smooth and flat, without twists, gathers, puckers, pleats, or other distortions. The piping shall be evenly worked out and shall extend uniformly 1/8 inch beyond the seamed edges of the shoulder straps. The buttonholes shall be clean cut, well made and well worked over the gimp to fit a 27-line insignia button. The gimp and thread shall be pulled through to the underside of the straps. The purling of the buttonholes shall be on the outside.					
	a. The shoulder straps shall be made of two plies of basic material, piped with a 5/8 to 3/4 inch wide strip of piping material specified in 3.3.11.					
	b. Turn under one edge of the piping 5/16 inch and seam the turned under portion to the body of the piping 1/8 inch from the turned raw edge.	301	EFa-1	10-14	A	A
	c. Position the right side of the top ply of the shoulder strap on the hemmed piping with the raw edges of shoulder strap in line with the piping stitching line.					
	d. Join shoulder strap to piping along the back, front and collar end, 1/8 inch from the inner edge of piping.	301	SSe-2 (a)	10-14	A (silk)	A (silk)
	e. Trim and notch the piping in accordance with good manufacturing practices in order to prevent pulling and to eliminate gathers and bulges around the collar end.

NO	OPERATION	STCH TYPE	SEAM/ STCH TYPE	STCH/IN	NDL	BOB/ LPR
10	Make ornamental sleeve patches. Finished appearance. The ornamental sleeve patch shall be uniform in appearance and shall finish smooth and flat, without twists, gathers, puckers, or other distortions. The piping shall be evenly worked out and shall extend uniformly 1/8 inch beyond the seamed edges of the sleeve patch. The eyelet shall be well worked with the purling on the outside of the sleeve patch and shall finish with a 1/8 to 3/16 inch diameter opening.					
10	Make ornamental sleeve patches. (cont'd) a. The ornamental sleeve patch shall be made of two plies of basic material, piped with a 5/8 to 3/4 inch wide strip of piping material specified in 3.3.11.					
	b. Turn under one edge of the piping 5/16 inch. Seam the turned under portion to the body of the piping 1/8 inch from the folded edge.	301	EFa-1	12-16	A	A
	c. Position the right side of the top ply of sleeve patch on the hemmed piping, with the raw edges of the sleeve patch in line with the piping stitching line.					
	d. Join sleeve patch to the piping along the top, bottom and scalloped edge 1/8 inch from the inner edge of the piping.	301	SSe-2 (a)	12-16	A (silk)	A (silk)
	e. Trim and notch the outer edge of piping along the scalloped edge in order to prevent pulling and bulges on the edges.					
	f. Position the top ply of sleeve patch on the under ply, face to face, with the outer edge of piping and raw edge of the under ply even.

TABLE I. Manufacturing requirements - Continued.

NO	OPERATION	STCH TYPE	SEAM/ STCH TYPE	STCH/IN	NDL	BOB/ LPR
	g. Stitch along the top, bottom and scalloped edge, through all plies, 3/16 inch from the inner raw edge of the piping. Trim any excess material if necessary.	301	SSk-1 (a) (without cord)	12-16	A (silk)	A (silk)
	h. Turn the sleeve patches, working the piping out completely and forming smooth corners and point at the scalloped side edge.					
	i. Topstitch the sleeve patches uniformly, 3/16 inch from the folded edge of the piping.	301	SSk-1 (b) (without cord and top-stitched)	12-16	A (silk)	A (silk)
10	Make ornamental sleeve patches. (cont'd)					
	j. Press the sleeve patches smooth and flat with a heated pressing iron or pressing machine.					
	k. Mark each sleeve patch as indicated by the marks on patterns, for the location of three eyelets.					
	l. Make one eyelet at each mark through all plies of the sleeve patch for attaching insignia button.	Eyelet		22 per eyelet	A (silk)	A (silk)
11	Stitch and press dart in under sleeves.					
	a. Fold the under sleeve, matching the cut edges of the sleeve dart. Stitch the entire length of the dart 1/4 inch from the cut edges of the armhole, tapering the line of stitching to zero at the lower folded edge.	301	SSa-1 (cut edges) OSf-1 (folded edge)	12-16	A	A
	b. Turn the cut edges of the dart toward the forearm edge and press the entire dart smooth and flat with a heated pressing iron.					
12	Seam sleeves at forearm.					
	Finished appearance. The forearm seam shall finish smooth and flat without twists, gathers, puckers, or pleats and shall start and finish evenly.

TABLE I. Manufacturing requirements - Continued.

NO	OPERATION	STCH TYPE	SEAM/ STCH TYPE	STCH/IN	NDL	BOB/ LPR
	a. Position the top sleeve with the upper forearm edge in line with the notch in the armhole edge of the under sleeve and with the notches in the lower forearm edge of top and under sleeves matching. Seam the top and under sleeves together 3/8 inch from forearm edge of the top sleeve, forming a tapered outlet on the under sleeve.	301	SSbd-1 and SSa-1	12-16	A	A
	b. Spread open the seam and press flat with a heated pressing iron.					
12	Seam sleeves at forearm. (cont'd)					
	c. Mark the sleeve end for turnup and mark the top sleeve for positioning the ornamental sleeve patch with pattern marker.					
13	Baste wigan reinforcement to sleeve.					
	a. Position the sleeve on the wigan reinforcement piece with marks and notches matching.					
	b. Baste the sleeve and wigan piece together at the mark for the bottom turnup.	Hand or 101				
14	Join ornamental sleeve patches to top sleeves.					
	Finished appearance. The ornamental sleeve patch shall be uniformly stitched to the top sleeve without twists, gathers, puckers, pleats or raw edges. The folded front edge of the patch shall not be topstitched. The dimensions and position of the ornamental sleeve patch shall be as shown in Figure 4. The scalloped edge of sleeve patch shall be stitched to the sleeve at the corners and point only, in order to facilitate removal of insignia buttons when pressing coat.

TABLE I. Manufacturing requirements - Continued.

NO	OPERATION	STCH TYPE	SEAM/ STCH TYPE	STCH/IN	NDL	BOB/ LPR
23	Assemble collar interlining.					
	Finished appearance. The interlining is made of one ply of plastic (mylar), one ply of laminated buckram and one ply of polyester twill or plain weave cloth. The interlining shall be constructed without twists, pleats or distortions.					
	a. Position the plastic, buckram and twill or plain cloth together and join with a 1/8 inch seam on the upper and lower edges. The interlining shall finish with the twill cloth on the inside and the plastic on the outside (see Figure 5).	301	BSa-1 (each edge)	12-16	A	A
	b. Lap the raw edge of the collar eyelet cover 1/2 to 5/8 inch on the top inside edge of collar interlining. Seam the covers to the interlining 1/4 inch from the raw edge of the cover. In the finished coat, the collar eyelet covers shall be centered over the collar eyelet.					
24	Pipe outer ply of collar.					
	Finished appearance. The piping shall extend at upper, lower, and side edges of the outer ply. It shall be uniformly stitched without twists, gathers, puckers or pleats.					
	a. The outer ply of the collar shall consist of two plies of basic material, piped at the upper edge with the vinyl cord and lower edge with 5/8 to 3/4 inch wide strip of the piping material specified in 3.3.11.					
	b. Position the two plies of the collar face up and edges even. Stitch them together from end to end, 1/8 inch from the upper and lower edges.

Secure the front turned under portion of the polyester and cotton to the body of the interlining with three rows of stitches 1/4 inch apart. Place the first row 1/8 inch from folded front edge and catch the upper turned under portion in the stitching.	301	EFa-1	12-16	A	A
48	Bind top neck edge of interlining.					
	Finished appearance. The polyester and cotton binding shall be uniformly stitched to the top edge of the coat front interlining from the collar notch to the shoulder point.					
	a. Lap the 3/4 inch wide binding on the outside of the coat front interlining, from the collar notch to the shoulder point, approximately 1/4 inch. Stitch the binding to the interlining, 1/8 inch from the raw edge of the binding.	301	LSa-1	12-16	A	A
	b. Smoothly fold the free edge of the binding over the top edge and to the underside of the interlining. Secure the free edge of binding to the interlining with a row of stitches 1/8 inch from the raw edge of the binding.	301	BSa-1	12-16	A	A
49	Fell piping to coat front interlining.					
	a. Place the inner edge of the piping on the outside of the interlining at the top, front, and bottom edges. Baste piping to the interlining through the fronts.	101				
	b. Fell the upper front and lower inner edge of the piping to the coat front interlining.	301 or Hand	EFc-1	4-6 4-6	A (silk) A	C (silk)
	c. Pull tab and remove basting stitches from the piping.

TABLE I. Manufacturing requirements - Continued.

NO	OPERATION	STCH TYPE	SEAM/ STCH TYPE	STCH/IN	NDL	BOB/ LPR
49	Fell piping to coat front interlining. (cont'd)					
	d. Press the left and right fronts on a suitable type pressing machine. The chest to conform to the shape of the body.					
50	Set belt loops.					
	Finished appearance. The belt loops shall finish vertically straight.					
	a. Center the belt loops vertically on the side seam with the pointed end towards the bottom of the coat and with the raw edge of the loop in horizontal alignment with the mark for the bottom buttonhole as indicated by the pattern.					
	b. Seam the loops to the coat 1/4 inch from the raw edge.	301	LSq-2 (a)	12-16	A (silk)	A (silk)
	c. Turn the loop at the seam, with the pointed end towards the top edge of coat, and secure the loop to the coat with a row of stitches 1/4 inch from the raised edge.	301	LSq-2 (b)	12-16	A (silk)	A (silk)
51	Join facing to fronts.					
	a. Position the left and right fronts to the respective front facings (face to face) with the waistline notch of the front in line with the notch on the facing and with the front piped edge approximately 3/8 inch from the front edge of facing. Mark the facing along the top, front, and bottom edge of the coat.					
	b. Lap the front edge of the right and left fronts on the outside of the facing at the respective marks. Join the front and facing as close as possible to, but not on top of, the stitching, joining the piping to the front. The stitching shall extend from top to bottom edge of coat front edge only.	301	LSa-1	12-16	A (silk)	A (silk)
	c. Trim excess facing material where necessary.

TABLE I. Manufacturing requirements - Continued.

NO	OPERATION	STCH TYPE	SEAM/ STCH TYPE	STCH/IN	NDL	BOB/ LPR
52	Join front eyelet cover to right facing.					
	a. Mark the outside of the right facing 1/2 inch from the seam joining facing to the front. Mark the upper edge of facing in such a manner that the front corner of the eyelet cover shall finish approximately 1/4 inch down from the folded edge of piping.					
	b. Lap the front raw edge of the eyelet cover on the outside of the right facing at the marks. Seam the eyelet cover to the facing only, 1/4 inch from raw edge of eyelet cover.	301	LSq-1 (a)	12-16	A (silk)	A (silk)
	c. Turn back the eyelet cover at the seam and topstitch the cover through the facing only, 1/8 to 3/16 inch from the raised edge.	301	LSq-1 (a)	12-16	A (silk)	A (silk)
53	Baste front edges.					
	a. Turn the facing-lining assemblies to the inside of fronts. Baste along the front edge of the left and right fronts, working the facing back from the folded edge of the piping.	101				
54	Baste facing (second time).					
	a. Baste the facing to the fronts approximately 1-1/4 inches from the top, front, and bottom edges of the coat, holding the lower corner of the coat in such a manner as to cause the lower front edge of the fronts to roll inward towards the back edge of the facing.	Hand or 301	Hopper			
	b. Turn under and baste the top edge of the facing to the fronts from the collar notch to the front edge, catching the turned under portion of the facing to the basting.	Hand or 301	Hopper

TABLE I. Manufacturing requirements - Continued.

NO	OPERATION	STCH TYPE	SEAM/ STCH TYPE	STCH/IN	NDL	BOB/ LPR
54	Baste facing (second time). (cont'd)					
	c. Baste the facing to the fronts as close as possible to the facing-lining seam, placing the fullness over the chest and distributing the fullness in the facing in accordance with good commercial practice. The basting shall extend approximately 3 inches from shoulder edge of the facings to approximately 1-1/4 inches from the lower edge of the facing.	Hand or 301	Hopper			
	d. Turn under the bottom edge of the facing at the mark and baste along the folded edge.	Hand or 301	Hopper			
55	Tack facings to interlining.					
	a. Tack the right and left facing-lining seam allowance to the respective coat front interlining from approximately 2-1/2 inches from bottom edge of coat to approximately 3 inches from the shoulder edge.	Hand or 103	SSm-1	2-6 4-6	C (silk) A (silk)	
56	Baste linings to coat.					
	a. Fold the front lining in accordance with the notches, forming the chest pleat, and baste along the entire center of the pleat. The folded edge of the pleat on the outside of the lining shall be towards the armhole.	Hand or 301	Hopper			
	b. Baste the front lining to the coat, starting at the lower end of chest pleat, continuing along the lower edge of armhole approximately 2 inches from the edge, and ending at the side seam. Match the side seams of coat and lining. Continue basting as close as possible to the side seam and then across the bottom towards the front, approximately 4 inches from piped bottom edge of coat.	Hand or 301	Hopper

TABLE I. Manufacturing requirements - Continued.

NO	OPERATION	STCH TYPE	SEAM/ STCH TYPE	STCH/IN	NDL	BOB/ LPR
56	Baste linings to coat. (cont'd)					
	c. Fold the back lining, forming an approximately 1 inch wide pleat at the center back. Baste the back lining to the coat along the center pleat from the top end to approximately 4 inches from the bottom finished edge of coat.	Hand or 301	Hopper			
	d. Baste back lining to coat. Start at side seam and continue approximately 3 inches from the armhole and shoulder edges.	Hand or 301	Hopper			
57	Hem bottom edge of lining.					
	Finished appearance. The hem shall be uniformly stitched and shall finish smooth and flat without twists, gathers, puckers or pleats. The hem shall be 3/4 ± 1/8 inch wide. The lining securing straps shall be positioned on the side seam outlets of the lining with one edge even with the serged edge.					
	a. Hem the bottom edge of body lining with the raw edge turned under and with one end of the securing straps positioned and caught in the stitching, 1/16 inch from the upper folded edge of hem.	301	EFb-1	12-16	A	A
58	Tack the lining securing straps to bottom of coat.					
	Finished appearance. The lining securing straps when tacked to the bottom edge of coat shall not cause twists or other distortions to either the coat or the lining. The end of the securing straps shall finish between the piping at bottom edge of coat and side seam allowance. In the finished coat, the lining shall not be visible below the bottom edge of coat.					
	a. Position and securely tack the free end of the securing straps to the piping at the bottom edge of coat through the side seam allowance.	301	SSbh-3	12-16	A	A

TABLE I. Manufacturing requirements - Continued.

NO	OPERATION	STCH TYPE	SEAM/ STCH TYPE	STCH/IN	NDL	BOB/ LPR
58	Tack the lining securing straps to bottom of coat. (cont'd)					
	b. Position the bottom edge of the lining so that, in the finished coat, the lining shall not be visible below the bottom edge of the coat. Fold the lining securing straps across the width and stitch approximately 1/4 inch from the folded end in order to hold the lining in position.	301	OSf-1	6-10	A	A
59	Fell facings.					
	a. Fell the facing to the piping at the bottom edge of the coat. Start at the bottom edge of the lining and continue along the back and bottom edges of the facing to the front edge of the coat.	Hand		8-10	C (silk)	
	b. Fell the folded edge of the facings to the piping along the top edge from the collar notch to front edge of the coat.	Hand		8-10	C (silk)	
60	Trim lining and interlining.					
	a. Trim the excess coat front interlining and front lining at the armhole.					
	b. Trim back lining even at the neck.					
	c. Trim the shoulder edge of the front and back lining to approximately 3/4 inch from shoulder at the armhole edge and taper the trimming to 3/8 inch at the neck.					
61	Baste shoulder pad to coat.					
	a. Insert shoulder pads between interlining and chest padding of coat fronts. Securely tack the pads to the interlining and chest padding only.	Hand or 301	Hopper			
62	Seam shoulders.					
	Finished appearance. The shoulder seam shall finish without a distorted appearance.

TABLE I. Manufacturing requirements - Continued.

NO	OPERATION	STCH TYPE	SEAM/ STCH TYPE	STCH/IN	NDL	BOB/ LPR
62	Seam shoulders. (cont'd)					
	a. Join the back to the fronts at the shoulders with a 3/8 inch seam, working in the fullness on the back in accordance with good manufacturing practice.	301	SSa-1	12-16	A	A
	b. Spread open the shoulder seam and press flat, holding the shoulders short and exercising much care in pressing in order not to effect a distorted appearance in the finished seam. The pressing shall be accomplished with a heated pressing iron or pressing machine over a suitable block.					
	c. Position the front lining and coat front interlining at the neck, shoulder and armhole edges of the fronts. Baste all plies together along the front edge of armhole. Continue along the shoulder seam and gorge, catching the shoulder pad in the basting.	Hand or 301	Hopper			
63	Set shoulder straps.					
	Finished appearance. The shoulder straps shall be uniformly stitched to the coat without twists, puckers, pleats or other distortion. On the finished coat, the straps, including the piping, shall be 2-3/8 ± 1/8 inches wide at the armhole seam and shall taper to 1-3/4 ± 1/8 inches wide at the buttonhole eyelet end.					
	a. Position the shoulder straps with the back edge 1/4 to 1/2 inch to the back of the shoulder seam at the armhole and with the rounded end of the straps, on the finished coat, 1/4 to 3/8 inch from lower edge of the collar.					
	b. Seam the shoulder straps to the coat 3/8 inch from the armhole edge. Trim the shoulder straps even with the armhole where necessary. Turn the coat on the inside.	301	SSa-1	12-16	A (silk)	A (silk)

TABLE I. Manufacturing requirements - Continued.

NO	OPERATION	STCH TYPE	SEAM/ STCH TYPE	STCH/IN	NDL	BOB/ LPR
64	Baste back lining and facing-lining assembly at shoulders.					
	a. Turn under and lap the shoulder edge of the back lining on the facing-lining assembly. Baste the lining to the coat along the folded edge of the back lining with the top end of the chest pleat caught in the basting.	Hand				
65	Seam neckline with size label and coat hanger:					
	Finished appearance. The neckline shall finish smooth and flat, without twists, pleats or puckers. The size label shall be positioned between the ends of the coat hanger and the ends of the coat hanger shall be positioned so that, in the finished coat, the hanger opening shall be 2 ± 1/8 inches long when measured along the lower edge of the collar lining.					
	a. Join the facings and back lining to coat at the neckline, from collar notch to collar notch, with a 1/4 inch seam and with the upper edge of the size label and the ends of the hanger positioned and caught in the stitching at the inside center back.	301	SSa-1	12-16	A	A
	b. Press the neckline of the coat smooth and flat with a heated pressing iron or pressing machine.					
66	Set collar with lining.					
	Finished appearance. The collar shall be carefully joined to the coat without distortion of the collar.					
	a. Mark the neckline on the inside, 3/8 to 1/2 inch from top edge, for proper positioning of collar.					
	b. Position the collar with the lower edge lapped on the outside top edge of the coat at the mark.

TABLE I. Manufacturing requirements - Continued.

NO	OPERATION	STCH TYPE	SEAM/ STCH TYPE	STCH/IN	NDL	BOB/ LPR
66	Set collar with lining. (cont'd)					
	c. Seam the collar, from end to end, to the coat as close as possible to, but not on top of, the stitching for the piping at the lower edge of the collar. The stitching shall not be through the collar lining.	301	LSa-1	12-16	A	A
67	Make buttonholes.					
	Finished appearance. The buttonholes shall be clean cut, well made, well worked over gimp to fit 40-line insignia buttons. The stitching of the buttonholes shall be securely caught in the basic material. The gimp and thread shall be pulled through to the underside of the front. The purling of the buttonholes shall be on the outside of the fronts. The inside edge of the eyelet end of the buttonhole shall be 5/8 inch from the front edge of coat. The buttonholes shall be cut-first type.					
	a. Mark the left front for the location of seven buttonholes. The marks for the top and bottom buttonholes shall be in accordance with the patterns. The marks for the remaining five buttonholes shall be evenly spaced.					
	b. Make one horizontal, eyelet end, square-bar type buttonhole, cut 1-1/4 inches long, at each of the marks.	Button-hole		60 per button-hole (not incl. bartack)	B (silk)	F (silk)
	c. Securely bartack the end of each buttonhole, catching the ends of the gimp and thread in the bartack. Trim the ends of the gimp and thread.	Bartack		21 per bartack	A (silk)	A (silk)
68	Set sleeves.					
	Finished appearance. The armhole-sleeve seam shall finish without twists, gathers, puckers or pleats.

TABLE I. Manufacturing requirements - Continued.

NO	OPERATION	STCH TYPE	SEAM/ STCH TYPE	STCH/IN	NDL	BOB/ LPR
68	Set sleeves. (cont'd)					
	a. Position the sleeve on outside of coat at the armhole, with backarm seam of sleeve matching the side back seam, and with notch in the top sleeve and the front matching.					
	b. Join the sleeve to the coat with a 3/8 inch seam, catching the end of the shoulder straps in the stitching.	301	SSa-1	12-16	A	A
	c. Press the entire armhole smooth and flat with a heated pressing iron. Exercise care not to stretch the armhole. Spread open upper part of the armhole-sleeve seam from the backarm seam of sleeve to approximately midway between shoulder seam and notch at front edge of armhole. Press smooth and flat with a heated pressing iron.					
	d. Fold the excess material at the armhole pit up to the line of the stitching of the armhole sleeve seam, forming a hinge effect. The fold shall extend from the armhole notch to approximately 4 inches from the backarm seam.					
	e. Press the fold smooth and flat with a heated pressing iron.					
69	Baste armhole.					
	a. Baste around the entire armhole on the inside, holding the back lining, shoulder pad and front lining in place and distributing fullness evenly. Turn the coat on the outside.	Hand				
	b. Baste around the outside armhole adjacent to the armhole seam, forcing out the armhole in the basting. The basting shall extend from the backarm seam of the sleeve to the front notch of coat.	Hand				
70	Set underarm shields.					
	a. Baste or tack underarm shields at the base of the armhole.	Hand or 301

NO	OPERATION	STCH TYPE	SEAM/ STCH TYPE	STCH/IN	NDL	BOB/ LPR
71	Stitch sleeve-head pads and linings at armhole.					
	Finished appearance. The armhole shall not be distorted or puckered due to stitching the sleeve-head pads and linings at the armhole.					
	a. Position the sleeve-head pad on the sleeve with the folded edge of the pad approximately 1/8 inch back from the raw edge of the armhole-sleeve seam and with the one end of the pad matching the notch in the fronts.	Hand or 301				
	b. Stitch the sleeve-head pad to the sleeve front, end to end, through the armhole-sleeve seam allowance, 1/8 inch from the folded edge of the pad, catching the front and back linings and the shoulder pad in the stitching. Continue stitching the linings around the remainder of the armhole, catching the underarm shields in the stitching and trimming away the excess material.	301	SSa-1	4-6	A	A
	c. The underarm shield may be basted to the armhole prior to stitching.	301	SSa-1	4-6	24/4	24/4
72	Tack underarm shield to lining.					
	Finished appearance. The tacking for the underarm shield shall finish approximately 1/2 inch from the seamed edges.					
	a. Tack the underside of the underarm shields to the body lining along the side and bottom edges.	Hand		4-6	C (silk)	
73	Fell back lining and facing-lining assembly at shoulders.					
	a. Fell the back lining and facing-lining assembly together at the shoulders. Place the stitching over the folded edge of back lining and secure the top end of the chest pleat in the felling.	Hand		8-10	C (silk)	
	b. Fell the folded edge of facing to the piping along the top edge from collar notch to front edge of coat.	Hand		8-10	C (silk)

NO	OPERATION	STCH TYPE	SEAM/ STCH TYPE	STCH/IN	NDL	BOB/ LPR
75	Mark for eyelets in shoulders.					
	a. Mark each shoulder for the location of one eyelet for removable insignia buttons to align with the eyelet of buttonhole in the shoulder strap. On the finished coat, the shoulder strap shall lie smooth and flat without twisting or bulging.					
76	Make eyelets.					
	Finished appearance. The eyelet shall be well worked with purling of the eyelet on the outside of the shoulder. The eyelets shall finish with a 1/8 to 3/16 inch diameter opening.					
	a. Make one eyelet at the mark on each shoulder through all plies.	Eyelet		22 per eyelet	A (silk)	A (silk)
77	Sew hook and eye to collar.					
	Finished appearance. The hook and eye shall be positioned to properly engage each other, effecting a flat, smooth closure at the front of the collar without misalignment.					
	a. Position and securely sew the hook to the right end and the eye to the left end of the collar. The hook and eye shall be positioned with their front edges even with the respective front ends of the collar and securely sewn to the collar at the top and bottom edge of the hook and eye. The stitching on each side shall not be more than 3/8 inch from the front end of the collar through the individual holes at the rear of the hook and eye.	Hand		12 per hook and 12 per eye	C (silk) (double thread)	
78	Finish collar.					
	a. Securely tack the lower corners of the collar to the coat.	Hand		8-10	C

81	Sew on buttons.					
	a. Sew on 40-line insignia button at each of the marks on the right front through all plies.	Hand		8 per button (double thread)	24/4	
	b. The insignia buttons on the front shall be sewn with the head of the eagle upright.					
82	Clean coat.					
	a. Pull any basting thread and trim and remove any loose ends of thread. Remove any spots, stains and tickets without injury to the material.					
83	Press coat.					
	a. The coat shall be well pressed throughout with a heated pressing iron or pressing machine of a type suitable to obtain the desired shape and appearance in accordance with good manufacturing practices.					
	b. Press the fronts smooth and flat, straightening and shaping the front edges and working fullness towards the chest. Care shall be exercised in pressing the fronts so that the bottom edges are even.					
	c. Press the entire collar smooth and flat.					
	d. Press the fronts on a body machine, shrinking and properly shaping the chest.					
	e. Press the sides, working the fullness towards the back.					
	f. Press the back smooth and flat, removing all fullness.					
	g. Press the sleeves smooth and flat, creasing at the backarm and forearm seam. The backarm crease shall be on the backarm seam. The forearm and backarm crease shall extend uniformly to a point approximately 3 to 3-1/2 inches below the base of the armhole.

1/ Tolerance for all measurements shall be ± 3/8 inch.

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T04:39Z
Check the source to verify that this is the current version before use.

2/ Breast measurement shall be taken with coat buttoned, from folded edge to folded edge in line with the pit of the armhole; multiply by 2.

3/ Back length measurement shall be taken along the center back seam, from the lower edge of the collar to the piped bottom edge of the coat.

4/ Sleeve length measurement shall be taken along the forearm seam from the pit of the armhole to the bottom edge of the sleeve.

3.8. Workmanship. The finished coats shall conform to the quality and grade of product established by this specification.

3.9. Recycled, recovered, or environmentally preferable materials. Recycled, recovered, or environmentally preferable materials should be used to the maximum extent possible provided that the material meets or exceeds the operational and maintenance requirements, and promotes economically advantageous life cycle costs.

4. VERIFICATION

4.1. Classification of inspection. The inspection requirements specified herein are classified as follows:

a. First article inspection (see 4.3).
b. Conformance inspection (see 4.4).

4.2. Inspection conditions. Unless otherwise specified, all inspections shall be performed in accordance with the test conditions specified in Table III.

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T04:39Z
Check the source to verify that this is the current version before use.

Table III. Test methods.

Components	Characteristics	Reqmt. para.	Test method	No. det. per S/unit	Results reported as
Hook and eye	Tackiness	3.3.17	4.5.2	1	Pass of fail
Padding felt (for collar)	Material identification	3.3.6	1200	1	Pass or fail
	Weight, oz per sq yd	3.3.6	5041	5	Avg. of the 5 det. to nearest 0.1 oz.
	Color	3.3.6	Visual	1	Pass or fail

4.3. First article inspection. When a first article is required (see 6.2), it shall be examined for the defects specified in 4.4.2.1 and 4.4.2.2.

4.4. Conformance inspection.

4.4.1 Component and material testing. Components and materials shall be tested in accordance with all the requirements of reference specifications, figures, and standard unless otherwise excluded, amended, modified or qualified in this specification or applicable purchase document. In addition to the testing provisions contained in subsidiary specifications, figures, and standards, testing shall be performed on the components listed in Table III for the characteristics noted. Wherever applicable, tests shall be conducted in accordance with ASTM E1282 and FED-STD-191. When the "Results reports as" columns are not indicated, they shall be reported as required by the referenced test method. All test reports contain individual values utilized in expressing the final results.

4.4.1.1. Sampling for testing. Unless otherwise specified in subsidiary specifications, sampling shall be in accordance with ANSI/ASQC Z1.4. The unit for expressing lot sizes and sample unit fore testing each component shall be in accordance with applicable subsidiary specifications and as follows:

Component	Expressed as	Sample unit for testing
Hook and eye	100 each	two each, hook and eye
Padding for collar	yards	1/4 yard full width

4.4.1.2. In-process inspection. An inspection shall be performed during manufacture of the end item to ascertain that the

Check the source to verify that this is the current version before use.

operations are performed as specified herein. The Government reserves the right to determine the acceptability of construction methods not performed in accordance with the specified requirements for operations or subassemblies.

4.4.2 Examination of end item. The defects found during examination of the end item shall be classified in accordance with 4.4.2.2 through 4.4.2.5. The sample unit shall be one coat.

4.4.2.1. Classification of defects. All defects shall be classified as indicated, except those numbered 1 through 23 in the major classification column, which shall be classified as follows:

Major defect - When seriously affecting appearance or serviceability.
Minor A defect - When not seriously affecting appearance or serviceability.

4.4.2.2. General defects. General defects shall be classified as indicated below.

Examine	Defects	Classification		
		Major	Minor A	Minor B
Buttonholes (construction)	a. One or more omitted or added.	101		
	b. Wrong type or uncut.		201	
	c. Not corresponding to size of button:			
	- too small, not permitting button to enter buttonhole.	102		
	- too large, 3/8 inch or more longer than the diameter of button (measured at inside of purling).		202	
	d. Buttonhole not securely caught on fabric, causing stitching to pull away from fabric.	103		
	e. Bartack missing or loose on:			
	- one buttonhole.		203	
	- two or more buttonholes.	104

Examine	Defects	Classification		
		Major	Minor A	Minor B
Buttonholes (construction) (cont'd)	f. Bartack misplaced not serving intended purpose on:			
	- one buttonhole.			301
	- two or more buttonholes.		204	
	g. One or more broken stitches in:			
	- one buttonhole.		205	
	- two or more buttonholes.	105		
	h. More than two skipped stitches in:			
	- one buttonhole.			302
	- two or more buttonholes.		206	
	i. Ragged edges, affecting appearance.			303
	j. Gimp omitted in one or more buttonholes.		207	
	k. Stitches per buttonhole (not including bartack) less than the minimum specified:			
	- one or two stitches.			304
	- three or more stitches.		208	
	l. One or more buttonholes finished with purling on the underside.	106		
	m. Ends of gimp not pulled through the underside on one or more buttonholes.			305
Buttons or ring toggles	a. Missing, loose, broken, or defective:			
	- one button or ring toggle.		209	
	- two or more buttons or two or more ring toggles.	107		
	b. Not specified type, size, color or finish.		210	
	c. One or more buttons right front sewn with the head of the eagle in other than upright position.			306

Check the source to verify that this is the current version before use.

Examine	Defects	Classification		
		Major	Minor A	Minor B
NOTE: Buttons shall be considered defective if they have sharp, rough, cracked, or split edges; unsound soldering, scratches; dents, blemishes or imbedded foreign matter on face side of button; loose shanks; or are badly shaded.				
Cleanness	a. One or more removable spots or stains clearly noticeable outside of the coat.		211	
	b. One or more removable spots clearly noticeable on the inside of the coat.			307
	c. One or more spots or stains of an obvious permanent nature.	1		
	d. Thread ends not trimmed, loose thread ends, two or more shade markings, or bastings not removed throughout garment (to be scored when the condition exists on major portion of coat).		212	
Components and assembly	a. Any defective component or defect of assembly (not herein classified).	2		
	b. Any component part or required operation omitted (not herein classified).	3		
Cutting	a. Any component part of basic wool material not cut in accordance with directional lines on patterns or in accordance with the specification requirements.	108		
	b. Piping or binding material cut on bias		213	
	c. Any lining part not cut in accordance with directional lines on patterns.		214	
Eyelet (construction)	a. One or more omitted or added.	109		
	b. Wrong type.		215

Examine	Defects	Classification		
		Major	Minor A	Minor B
	c. Eyelet not securely caught on fabric, causing stitching to pull away from fabric.	110		
	d. Diameter of inside opening less than 1/8 inch or more than 1/4 inch.			308
	e. One or more eyelets uncut.		216	
	f. One or more broken stitches in: - one eyelet. - two or more eyelets.		 217	309
	g. More than two skipped stitches in one or more eyelets.			310
	h. One or more eyelets finished with the purling on the underside.		218	
Metal eyelet (collar)	a. Any omitted.		219	
	b. Defective eyelet.		220	
	c. Not specified type or size.		221	
Hook and eye	a. Not specified type or size.		222	
	b. Not aligned, causing collar ends to be uneven by 1/4 inch or more when front is buttoned and hook and eye are fastened.		223	
	c. Hook and eye not securely tacked to ends of collar.		224	
	d. Hook and eye misplaced, i.e., hook positioned on left end, eye positioned on right end of the collar.		225	
Material defects and damages	a. Any weakening defects, such as smash, multiple float, and loose slub, etc., that may develop into a hole.	4		
	b. Any hole (including drill holes).	5		

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T04:39Z
Check the source to verify that this is the current version before use.

Examine	Defects	Classification		
		Major	Minor A	Minor B
	c. Shade bar, unsightly slub, etc.:			
	- on outside.	6		
	- on inside.		226	
	d. Needle chews which may develop into a hole.	7		
	e. Scissors or knife cut, tear, mend, or burn.	8		

NOTE: Material defects and workmanship damages are to be classified as indicated above only when the condition is one which definitely weakens the fabric or when it is so conspicuously located as to be clearly noticeable. Weakening or nonweakening conditions which are inconspicuous and have negligible effect on serviceability are to be classified as follows:

Material defect - No defect
Workmanship damages - Minor B defect

Pressing	a. Burned or scorched.	9		
	b. Pressing omitted (entire garment).		227	
	c. Poorly pressed (unless otherwise indicated).		228	
	d. Armhole stretched, affecting appearance.		229	
	e. Basting or pressing impressions not removed on major portion of the coat.			311
	f. Gloss not removed throughout coat, affecting appearance.			312
	g. Armholes not blocked or blocked poorly.		230	
Pressing (cont'd)	h. Inside of armholes not pressed solid.		231	
	i. Edges bulky, i.e., not pressed solid, affecting appearance.			313

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T04:39Z
Check the source to verify that this is the current version before use.

Examine	Defects	Classification		
		Major	Minor A	Minor B
	j. Sleeve not creased as required on forearm and backarm seam.			314
	k. Armhole sleeve seam not pressed open from backarm seam of sleeve and across top as specified.		232	
	l. Linings not pressed smooth.			315
Seams and stitching	a. Accuracy of seaming:			
	1. Any seam twisted, puckered or pleated, affecting appearance.		233	
	2. Part of garment caught in any unrelated operation or stitching.	10		
	3. Unsightly hand felling or blind stitching exposed on outside of coat, affecting appearance.		234	
	4. Ends of all stitching (when not caught in other seams or stitching) not backtacked or backstitched as required.			316
	5. Wrong color of thread or two shades of thread used on outside of coat, affecting appearance.	11		
	b. Gage of stitching (edge or raised stitching):			
	1. Irregular, i.e., unevenly gated; or various stitching not uniform, affecting appearance.		235	
Seams and stitching (cont'd)	2. Beyond range of width specified; or varies more than 1/16 inch when no range is specified.			317

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T04:39Z
Check the source to verify that this is the current version before use.

Examine	Defects	Classification		
		Major	Minor A	Minor B
	c. Open seams:			
	1. On outside:			
	- up to 1/4 inch inclusive.			318
	- more than 1/4 inch but not more than 1/2 inch.		236	
	- more than 1/2 inch.	111		
	2. On inside:			
	- more than 1/2 inch (except machine felling).		237	
	- up to 1/2 inch inclusive (except machine felling).			319
	- up to 1 inch inclusive (machine felling).			320
	- more than 1 inch (machine felling).		238	
NOTE: One or more broken stitches or two or more continuous skipped or runoff stitches constitute an open seam.				
	d. Raw edges:			
	1. On outside:			
	- up to 1/8 inch inclusive.			321
	- more than 1/8 inch but not more than 1/4 inch.		239	
	- more than 1/4 inch.	112		
	2. On inside:			
	- more than 1/8 inch but not more than 1/4 inch.			322
	- more than 1/4 inch.		240	
NOTE: Raw edges shall be classified as such when they occur at places where an edge is required to be turned under. Raw edges not caught in stitching shall be classified as open seams.				
	e. Runoffs (see classification of open seams).			
Seams and stitching (cont'd)	f. Stitch tension:			
	1. Loose tension resulting in loose seam.	113

Check the source to verify that this is the current version before use.

Examine	Defects	Classification		
		Major	Minor A	Minor B
	2. Loose tension on raised or edge stitching, resulting in loosely exposed bobbin or top thread.		241	
	3. Tight tension (stitches break when normal strain is applied).	114		
NOTE: Puckering is evidence of tight tension. When puckering is evident, the inspector shall test the seam by exerting pull in lengthwise direction of seam.				
	g. Stitches per inch (excluding labels):			
	1. Less than minimum specified:			
	- one or more stitches.			323
	- three stitches.		242	
	- four stitches or more.	115		
NOTE: To be scored only if condition exists on a major portion of seam.				
	h. Wrong stitch and seam type.		243	
	i. Stitching skipped or broken (on edge or raised stitching when seam is seamed, turned and stitched):			
	- 1/4 inch or more but not more than 1/2 inch.			324
	- more than 1/2 inch.		244	
Shaded parts	a. On outside.	12		
	b. On inside:			
	1. Any lining part badly shaded (except sleeve lining).		245	
	2. Any lining part badly shaded; or pairs not matching each other.			325

Check the source to verify that this is the current version before use.

4.4.2.3. Detailed defects (outside of coat). Detailed defects on outside of coat with coat buttoned on form shall be classified as follows:

Examine	Defects	Classification		
		Major	Minor A	Minor B
Collar (construction and setting)	a. Interlining omitted.	116		
	b. Interlining tight or twisted, causing puckers on collar, affecting appearance.		246	
	c. Tight at joining to front or back, causing puckers or pleats at neck of coat, affecting appearance.	13		
	d. Piping irregular, affecting appearance.		247	
	e. Collar ends overlapping when fastened.		248	
	f. Collar ends spread open more than 3/8 inch when fastened.		249	
	g. One ply of outer basic material.	117		
	h. Binding strip at top or bottom edge of interlining omitted.		250	
	i. Binding strip at top or bottom edge of interlining other than material specified.		251	
	j. Center of eyelets from finished ends of collar less than 1-1/4 inches or more than 1-3/4 inches.		252	
	k. One or both eyelets off-center with top and bottom edges of collar by more than 1/4 inch.		253	
	l. Collar off-center by more than 3/8 inch.			326

Check the source to verify that this is the current version before use.

Examine	Defects	Classification		
		Major	Minor A	Minor B
Collar (construction and setting) (cont'd)	m. Binding strip at top edge of interlining positioned more than 1/8 inch beyond top edge of piping on outer ply of collar.		254	
	n. Binding strip at top edge of interlining irregular in width, affecting appearance; or not exposed beyond top edge on outer ply of collar.		255	
	o. Collar irregular in width by 1/4 inch or more.	118		
	p. Front finished ends of collar uneven in width by 3/16 inch or more.	119		
Alignment of front buttons and buttonholes	a. Not aligned, causing a noticeable bulge or twist on fronts when buttoned, affecting appearance.		256	
Length of fronts	a. Left front at corner shorter than right front at bottom by: - more than 1/8 inch but not more than 1/4 inch.		257	
	- more than 1/4 inch.	120		
	b. Left front at corner longer than right front by: - more than 1/4 inch but not more than 3/8 inch.			327
	- more than 3/8 inch.		258	
	c. Right front at corner exposed beyond edge of left front by more than 1/8 inch.		259	
Shoulder (construction)	a. Improperly joined or set, causing shoulder or back to twist.	14		
Shoulder pads	a. Not completely caught in armhole tacking.		260	

Source: https://assist.dla.mil -- Downloaded: 202610-26T04:39Z
Check the source to verify that this is the current version before use.

Examine	Defects	Classification		
		Major	Minor A	Minor B
Shoulder pads (cont'd)	b. Misplaced not serving the intended purpose; i.e., too far back or too far forward.		261	
	c. One or both pads omitted.		262	
Shoulder straps (construction and setting)	a. Misplaced; i.e., one strap further forward or back from position of other strap, affecting appearance.		263	
	b. Misplaced; so that it will not lie flat when buttoned, causing bulge or twist on strap.	15		
	c. Poorly shaped.			328
	d. Shoulder seam exposed beyond back edge of shoulder strap (except rounded end).		264	
	e. Width of shoulder strap at armhole seam (including piping) less than 2-1/8 inches or more than 2-5/8 inches.		265	
	f. Width of shoulder strap across center of buttonhole eyelet (including piping) less than 1-1/2 inches or more than 2 inches.		266	
	g. Rounded end of shoulder strap positioned less than 1/4 inch or more than 3/8 inch from collar edge.			329
	h. Piping irregular in width, affecting appearance.		267	
	i. Upper side of strap full or twisted, affecting appearance.			330
	j. Back edge of strap less than 1/4 inch or more than 1/2 inch from shoulder seam at armhole.			331

Check the source to verify that this is the current version before use.

Examine	Defects	Classification		
		Major	Minor A	Minor B
Shoulder strap buttonhole and button	a. Button not aligned with buttonhole, causing a bulge or twist on strap or puckers on shoulders, affecting appearance.		268	
	b. Buttons not uniformly set by more than 1/4 inch.		269	
	c. Buttonhole 1/4 inch or more off center.		270	
	d. Buttonhole from outer edge of piping at the collar end of the strap:			
	- less than 5/8 inch but not less than 1/2 inch, or more than 3/4 inch.			332
	- less than 1/2 inch.		271	
Armholes (construction)	a. Badly stretched, affecting appearance.	16		
	b. Taped too tight, causing puckering around armhole seam, affecting appearance.	17		
	c. Crooked seam, affecting appearance.		272	
	d. Tape stitching exposed and visible to outside surface.			333
	e. Sleeve-head pads not completely tacked to armholes; or misplaced, not serving intended purpose.		273	
	f. One or both sleeve-head pads omitted.		274	
Sleeves	a. Setting and hang:			
	1. Sleeve fullness misplaced, affecting appearance.		275

Check the source to verify that this is the current version before use.

Examine	Defects	Classification		
		Major	Minor A	Minor B
Sleeves (cont'd)	2. Backarm seam of sleeve not matching side back seam by: - more than 1/4 inch but not more than 1/2 inch.		276	
	- more than 1/2 inch.	121		
	3. Hang of sleeves on the same coat in opposite direction by more than 2 inches.		277	
	4. Sleeve tight in armhole; i.e., roll effect not present.		278	
	b. Sleeve lining:			
	1. Twisted, tight, or short, causing bulge, twist, or puckering on outside of sleeve.	18		
	2. Sleeve lining too long, causing lining to sag at bottom more than 1/2 inch.			334
	3. Sleeve lining seams out of alignment more than 3/4 inch with sleeve seams at armhole or at bottom of sleeve.			335
	4. Cut dart on lining under sleeve omitted.			336
	5. One or both lining darts not pressed flat.			337
	c. Construction of sleeves:			
	1. Wigan twisted, tight or pleated, causing ridges or puckering on outside of bottom of sleeves, affecting appearance.		279	
	2. Tacking on bottom turnup to wigan omitted or insecure.		280	
	3. Sleeve bottom edge uneven by more than 1/4 inch.			338
	4. Tacking on one or both sleeve lining seams to sleeve seams omitted, or insecure.			339

Check the source to verify that this is the current version before use.

Examine	Defects	Classification		
		Major	Minor A	Minor B
Sleeves (cont'd)	10. Ornamental piece stitched to sleeve with pointed ends toward forearm seam of sleeve.	122		
	e. Position of buttons on ornamental pieces (measurements made from center of button):			
	1. Front top and bottom edges (including piped edges):			
	- less than 3/4 inch but not less than 1/2 inch.			342
	- more than 1 inch but not more than 1-1/4 inches.			343
	- less than 1/2 inch or more than 1-1/4 inches.		291	
	2. Top or bottom button from scalloped edge (including piped edge):			
	- less than 5/8 inch but not less than 3/8 inch.			344
	- more than 7/8 inch but not more than 1-1/8 inches			345
	- less than 3/8 inch or more than 1-1/8 inches.		292	
	3. Center button from pointed edge (including piped edge):			
	- less than 7/8 inch but not less than 5/8 inch.			346
	- more than 1-1/8 inches but not more than 1-3/8 inches.			347
	- less than 5/8 inch or more than 1-3/8 inches.		293	
	4. Center button not in line with pointed edge by more than 1/4 inch.		294	
Body (outside)	a. Fitting of body linings tight, short, or twisted, causing fullness or twist on outside of coat, affecting appearance.	19

Examine	Defects	Classification		
		Major	Minor A	Minor B
Body (outside) (cont'd)	b. Fitting of front interlining:			
	1. Tight, short, or twisted, causing fullness or twist on outside of coat, affecting appearance.	20		
	2. Too full, causing coat front to have a wavy appearance.	21		
Chest darts	a. One or both omitted.	123		
	b. End of one or both darts not properly tapered, causing bulge of fullness, affecting appearance.		295	
	c. Equal length of darts not uniform by 1/4 inch or more.			348
	d. Cut edges of dart not turned towards armhole.			349
	e. Not pressed smooth and flat.		296	
Waist darts	a. One or both omitted.	124		
	b. Top or lower end of one or both darts not properly tapered, causing bulge or fullness, affecting appearance.		297	
	c. Equal length of darts not uniform in length by 1/4 inch or more.			350
	d. Alignment of both waist darts: - top or bottom end out of horizontal alignment by 1/4 inch or more.			351
	e. Folded edge not pressed toward side seam.			352
	f. Not pressed smooth and flat.		298	
	g. Top or lower end of one or both darts not securely backstitched.		299

Examine	Defects	Classification		
		Major	Minor A	Minor B
Front and bottom edges	a. Front edges stretched, affecting appearance.		201a	
	b. Piping set on tight, causing puckering on front, affecting appearance.		202a	
	c. Front or bottom piping irregular, affecting appearance.		203a	
	d. Bottom edge stretching, puckered, or uneven, affecting appearance.			353
	e. Bottom corner or left front poorly shaped, affecting appearance.		204a	
	f. Left front rolling outward below bottom button.	22		
	g. Front edge irregular, affecting appearance.		205a	
	h. Piping tight on front or bottom edge, causing puckering outside of coat, affecting appearance.		206a	
	i. Left front not dressed as specified.		207a	
Front facings	a. Short, tight or twisted, causing fullness or twists on fronts, affecting appearance.	23		
Back side panel seams	a. Curved panel seam on back of coat stretched or distorted, affecting appearance.		208a	
Belt loops (construction and position)	a. Poorly shaped or not of uniform shape, affecting appearance.		209a	
	b. Bottom end of one or both loops out of horizontal alignment with bottom front buttonhole by: - more than 3/4 inch below or more than 3/8 inch above.		210a

4.4.2.4. Detailed defects (inside of coat). Detailed defects on inside of coat shall be classified as follows:

Examine	Defects	Classification		
		Major	Minor A	Minor B
Right front eyelet cover	a. Front raw edges not stitched together prior to seaming to right facing.		229a	
	b. Upper or lower seamed edge not hand felled to facing.		230a	
	c. Upper or lower seam edge not securely hand stitched to facing.			358
	d. Omitted.	127		
	e. Front corner of eyelet cover exposed beyond upper edge of right front.			359
	f. Front edge of cover positioned less than 1/4 inch or more than 3/4 inch in from front edge of right front.		231a	
Labels	a. Any required label missing, incorrect, or illegible; or size label not securely caught in stitching.	128		
	b. Identification label not stitched on all four sides.		232a	
	c. Bottom edge of identification label less than 3 inches or more than 5 inches from bottom finished edge of coat.			360
	d. Identification label not stitched to outside of right facing.			361
Hanger	a. Hanger omitted or ends not securely stitched.	129		
	b. Less than 1-7/8 inches or more than 2-1/8 inches long measured along the lower edge of the collar lining.		233a	

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T04:39Z
Check the source to verify that this is the current version before use.

Examine	Defects	Classification		
		Major	Minor A	Minor B
Hanger (cont'd)	c. Hanger not stitched to neck of coat prior to seaming collar to neck of coat.		234a	
	d. Finished width less than 1/4 inch or more than 3/8 inch wide.			362
Front facings	a. Fullness or pleats on facings between eyelets; buttonholes; or between front edge and eyelet or buttonholes.		235a	
	b. Tacking on back edge to one or both interlinings: - omitted. - insecure or incomplete for a distance of more than 4-1/2 inches below shoulder seams, or more than four inches above bottom edge of coat.		236a	363
	c. Felling at bottom or back edge of front facings omitted or insecure on one or both facings.		237a	
	d. Felling along folded edge of one or both facings at collar notch omitted or insecure.		238a	
Body linings	a. Excessive puckering or pleated.			364
	b. Twisted, not affecting smoothness on outside of coat.			365
	c. One or both chest pleats on shoulder omitted.		239a	
	d. Folded edge of one or both chest pleats facing front edge of coat.			366
	e. Pleat omitted at center of back lining.		240a	
	f. Pleat less than 1/2 inch in depth at center of back lining.			367
	g. Bottom hem less than 5/8 inch or more than 7/8 inch wide.			368

Examine	Defects	Classification		
		Major	Minor A	Minor B
Body linings (cont'd)	h. Lining too long; i.e., exposed beyond bottom edge of coat.		241a	
	i. Facing-lining seam, side seams, and side back seams not towards back or not pressed smooth and flat.		242a	
	j. Waist darts not towards the side seams or not pressed smooth and flat.		243a	
Lining - securing straps	a. One or both omitted or insecure.		244a	
	b. Less than 1/4 inch or more than 3/8 inch wide.			369
	c. One or both positioned more than 1 inch from side seam.			370
	d. End of one or both straps not finished between the piping at the bottom edge of the coat and the side seam allowance.			371
	e. One or both not folded and stitched across width.			372
	f. One or both not properly attached to the lining hem or coat, causing twist or distortion to either the lining or the coat.		245a	
	g. One or both exposed beyond bottom edge of the coat.		246a	
Serge or overedge stitching	a. Omitted where specified on one or more raw edges for seams joining fronts and back.		247a	
Serge or overedge stitching (lining joined seams)	a. Omitted where specified on one or more seams.		248a	
Underarm shields	a. One or both omitted.		249a	
	b. Not two-piece lining construction.		250a

Check the source to verify that this is the current version before use.

Examine	Defects	Classification		
		Major	Minor A	Minor B
	c. Tacking on one or both shields, along side or bottom edge to body lining, omitted or insecure.			373
	d. Top edge not caught in armhole tacking or stitching when tacked by hand.			374
	e. Puckered, pleated, or twisted.			375
	f. One or both shields misplaced, not serving intended purpose.			376
Inside of armhole	a. Backstitching at armpit of armhole, from backarm seam of sleeve to front edge of shield omitted.			377
Collar lining extension piece	a. Omitted.	130		
	b. Extended less than 1/2 inch or more than 1 inch beyond left end of collar.			378
	c. Felling omitted or insecure at end or top edges.		251a	
	d. Stitching at top, front and bottom edges, or across width of collar tab (forming box stitch) omitted.		252a	
Collar lining and eyelet covers	a. Ends of collar lining not securely tacked.		253a	
	b. One or both eyelet covers omitted.		254a	
	c. One or both eyelet covers not covering eyelet.		255a	
	d. Width of collar eyelet less than 1-5/8 inches or more than 1-7/8 inches.			379

Check the source to verify that this is the current version before use.

Examine	Defects	Classification		
		Major	Minor A	Minor B
Collar lining and eyelet covers (cont'd)	e. Felling on front edge and along lower corner of one or both eyelet covers omitted.		256a	
	f. Felling along lower corners of one or both eyelet covers extending for a distance of more than 3/4 inch.			380

4.4.2.5. Finished measurements. Any measurement deviating from the nominal dimensions and tolerance specified in Table II shall be classified as a size measurement defect. Sleeve lengths uneven by more than 1/2 inch shall be scored as a size measurement defect.

4.5. Tests.

4.5.1 Metal composition. Chemical composition shall be determined in accordance with ASTM E1282.

4.5.2 Test for tackiness. At room temperature (60°F to 80°F), press a piece of tissue paper against the lacquered surface for 30 seconds, using any pressure capable of being exerted by the thumb and two fingers. The tissue shall not adhere to the lacquered surface, but shall fall free when pressure is released.

5. PACKAGING

5.1. Packaging. For acquisition purposes, the packaging requirements shall be as specified in the contract or order (see 6.2). When actual packaging of material is to be performed by Department of Defense (DoD) personnel, these personnel need to contact the responsible packaging activity to ascertain requisite packaging requirements. Packaging requirements are maintained by the Inventory Control Point's packaging activity within the Military Department of Defense Agency, or within the Military Department's Systems Command. Packaging data retrieval is available from the managing Military Department's or Defense Agency's automated packaging files, CD-ROM products, or by contacting the responsible packaging activity.

6. NOTES

(This section contains information of a general or explanatory nature that may be helpful, but is not mandatory.)

6.1. Intended use. The coat described herein is intended for wear by enlisted male personnel of the U.S. Marine Corps Drum and Bugle Corps (Drum Major).

6.2. Acquisition requirements. Acquisition documents must specify the following:

a. Title, number, and date of the specification.
b. Issue of DoDISS to be cited in the solicitation, and if required, the specific issue of individual documents referenced (see 2.2).
c. Packaging requirements (see 5.1).
d. Whether first article is required (see 3.2).
e. Number of coats in first article (see 3.2).

6.3. Standard sample. For information regarding the availability of standard sample costs and standard shades specified, address inquiry to the procuring activity issuing the invitation for bids.

6.4. Figures. Figures 1 through 6 are furnished for information purposes only. To the extent of any inconsistencies between the written specification and the figures, the written specification will govern.

6.5. Vinyl piping. Thielex Plastics Company has manufactured vinyl piping meeting the requirements of 3.3.11.1.

6.6. Subject term (keyword) listing.

STANDARDIZATION DOCUMENT IMPROVEMENT PROPOSAL

INSTRUCTIONS

1. The preparing activity must complete blocks 1, 2, 3, and 8. In block 1, both the document number and revision letter should be given.

2. The submitter of this form must complete blocks 4, 5, 6, and 7.

3. The preparing activity must provide a reply within 30 days from receipt of the form.

NOTE: This form may not be used to request copies of documents, nor to request waivers, or clarification of requirements on current contracts. Comments submitted on this form do not constitute or imply authorization to waive any portion of the referenced document(s) or to amend contractual requirements.

I RECOMMEND A CHANGE:	1. DOCUMENT NUMBER MIL-DTL-82156D (MC)	2. DOCUMENT DATE (YYMMDD) 97 10 29

3. DOCUMENT TITLE
COAT, MAN'S - SCARLET, DRUM AND BUGLE CORPS, MUSICIAN'S

4. NATURE OF CHANGE (Identify paragraph number and include proposed rewrite, if possible. Attach extra sheets as needed.)
