COMMERCIAL ITEM DESCRIPTION

DESSERT POWDER, IMITATION GELATIN, ARTIFICIALLY COLORED, NONCHILL SET

The U.S. Department of Agriculture has authorized the use of this Commercial Item Description in preference to Federal Specification C-D-221.

This Commercial Item Description (CID) covers imitation gelatin dessert powder processed into approved commercially acceptable containers, suitable for use by the Federal Government.

Salient characteristics.

The product shall be of the following types as specified in the solicitation, contract, or purchase order.

Type I - Raspberry flavor
Type II - Strawberry flavor
Type III - Orange flavor

Dessert powders shall be uniformly blended dry mixtures prepared from food grade materials and compounded using good manufacturing procedures. The ingredients shall be Food Chemicals Codex purity as appropriate for hydrocolloids, flavors, acidulants, buffers, and dextrose. Sucrose shall be a fine granular sugar. Artificial colors shall be FD&C certified. Natural flavors may be used. The dessert powders shall be free-flowing, homogenous, and free from lumps. The imitation gelatin dessert shall set within 45 minutes at 80°F when prepared according to the manufacturer's directions. The prepared imitation gelatin dessert shall be firm but slightly soft. It shall not be runny, tough, or rubbery. The prepared imitation gelatin dessert shall have a color, flavor, and aroma characteristic of the flavor it represents and shall comply with the following:

	Dessert powder	Prepared dessert
Sucrose, percent of total sweeteners	82.0	-
Moisture, percent	1.0	-
Soluble Solids, percent	-	14.0 - 17.0
pH	-	3.0 - 4.5

Analytical requirements.

Analytical requirements shall be determined by a sample size of eight 24-ounce cans. The sample unit shall be one 24-ounce can. Product shall be rejected if the contents of any can fails to meet the analytical requirements. Results will be reported to the nearest 0.1 percent. Analysis shall be in accordance with the Official Methods of Analysis of the Association of Official Analytical Chemists as follows:

Test	Chapter & Section	Method
Sucrose	Gelatin, Dessert Preparations, and Mixes; Gelatin Dessert Powders	Sucrose
Moisture	Sugars and Sugar Products; Sugars and Sirups	Moisture - Vacuum Drying
Soluble Solids	Sugars and Sugar Products; Sugars and Sirups	Refractometer
pH	Beverages: Malt Beverages and Brewing Materials; Beer	Hydrogen-Ion Activity (pH)

Contractor's certification.

By submitting an offer, the contractor certifies that the product offered meets the specified salient characteristics and requirements of this CID; conforms to the producer's own specifications and standards, including product characteristics, manufacturing procedures, quality control procedures, and storage and handling practices; has a national or regional distribution from storage facilities located within the United States, its territories, or possessions; and is sold on the commercial market. The Government reserves the right to determine proof of such conformance prior to the first delivery from point of origin and any time thereafter, up to and including delivery at final destination, as may be necessary to determine conformance with the provisions of the contract.

Regulatory requirements.

The delivered product shall comply with all applicable Federal and State mandatory requirements and regulations relating to the preparation, packaging, labeling, storage, distribution, and sales of the product in the commercial marketplace. All deliveries shall conform in every respect to the provisions of the Federal Food, Drug, and Cosmetic Act and regulations promulgated thereunder.

Quality assurance.

When required in the solicitation, contract, or purchase order, the Processed Products Branch, Fruit and Vegetable Division, U.S. Department of Agriculture, will determine the quality assurance of the imitation gelatin dessert powder according to Processed Products Branch procedures. The product shall be examined and/or analyzed in accordance with applicable provisions in the CID, and when applicable, the United States Standards for Condition of Food Containers currently in effect on the date of the solicitation.

Preservation, packaging, packing, labeling, and marking.

The imitation gelatin dessert powder shall be preserved, packaged, packed, labeled, and case marked in accordance with good commercial practice. Commercial labeling and packaging, as may be augmented by the solicitation, contract, or purchase order, shall be acceptable. Shipping containers shall comply with the National Motor Freight Classification or Uniform Freight Classification, as applicable.

For Department of Defense procurements.

The following requirements are applicable when specified by the contracting officer:

A. Commercial packaging. Twenty-four ounces of product shall be packaged in cans in accordance with good commercial practice.

B. Commercial packing. Cans shall be packed in a fiberboard box complying with the Uniform Freight Classification or National Motor Freight Classification.

C. Export packaging. Twenty-four ounces of product shall be packaged in a size 401 X 411 open-top style, round, metal can with soldered or welded side seam and compound-lined, double-seamed ends. The can shall be made throughout from not less than 0.25 pound-per-base box electrolytic tin plate. The can shall have sufficient base plate weight temper to protect the product during shipment and storage.

D. Export packing. Twenty-four cans of product of one flavor only shall be packed in a snug-fitting fiberboard box constructed and closed in accordance with Style RSC, Grade V3c, V3s, or V4s of PPP-B-636. The cans shall be packed on end, four in length, three in width, and two in depth within a container. The tiered cans shall be separated with a full length and width fiberboard pad made of the same material as the box.

E. Unit loads. Shipping containers shall be arranged in unit loads in accordance with MIL-L-35078. When unit loads are strapped, the strapping shall be limited to nonmetallic strapping, except for Type II, Class F loads.
