COMMERCIAL ITEM DESCRIPTION

SOLDERING IRON, NON-ELECTRIC (SOLDERING COPPERS)

The General Services Administration has authorized the use of this commercial item description.

Abstract. This description covers non-electric soldering irons, commonly referred to as soldering coppers to be used for applying heat to melt solder and to heat metal that is to be joined by soldering.

Classification. The soldering irons shall be of the following styles and sizes. The style and size to be furnished shall be as specified.

Style I - Pointed (pyramid) tip
Style II - Flat (wedge) tip

Size 1 -	4 ounces	Size 7 -	2-1/2 pounds
Size 2 -	8 ounces	Size 8 -	3 pounds
Size 3 -	12 ounces	Size 9 -	4 pounds
Size 4 -	1 pound	Size 10 -	5 pounds
Size 5 -	1-1/2 pounds	Size 11 -	6 pounds
Size 6 -	2 pounds	Size 12 -	7 pounds

Note. Size is defined as the total weight for each soldering iron (copper) including the handle rod. The weight shall be within a tolerance of 0 to +15 percent of the weight for the size specified.

Salient characteristics. The soldering irons shall meet the following minimum requirements.

1. Materials. The body shall be manufactured from copper which shall be not less than 99.9 percent pure. The handle rod shall be manufactured from corrosion resistant steel.

Beneficial comments recommendations, additions, deletions, clarifications, etc. and any data which may improve this document should be sent to: Defense Industrial Plant Equipment Center, ATTN: DIPIC-SSG, 2163 Airways Blvd., Memphis TN 38114-5051.

AMSC N/A FSC 3439

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

Check the source to verify that this is the current version before use.

2. Body. The body shall be free of cracks, blow-holes, seams, and any other imperfections. The tip of the Style I soldering iron shall be pyramid shaped and the Style II soldering iron wedge shaped. The dimensions of the body shall conform to the manufacturers standard product as specified on their part drawings.

3. Handle rod. The handle rod shall be of sufficient strength and rigidity to support the forces exerted in normal soldering operations. The length and diameter of the handle shall conform to the manufacturers standard product as specified on their part drawings. The handle rod shall have one end pointed for insertion into a handle and the other end shall be securely attached to the body.

4. Handle. When specified in the contract, the soldering iron shall be furnished with a wooden handle. The handle shall be proportioned and contoured for a comfortable grip. The handle shall be securely attached to the body.

Contractor certification. The contractor shall certify and maintain substantiating evidence that the product offered meets the salient characteristics of this commercial item description, and that the product conforms to the producer's own drawings, specifications, standards, and quality assurance practices. The government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Metric products. Products manufactured to metric dimension will be considered on an equal basis with those manufactured using inch-pound units, provided they fall within specified tolerances using conversion tables contained in the latest revision of FED-STD-376, and all other requirements of this commercial item description are met.

If a product is manufactured to metric dimensions and those dimensions exceed the tolerances specified in the inch-pound units, a request shall be made to the contracting officer to determine if the product is acceptable.

The contracting officer has the option of accepting or rejecting the product.

Regulatory requirements. In accordance with section 23.403 of the Federal Acquisition Regulations, the Government's policy is to acquire items composed of the highest percentage of recovered materials practicable, consistent with maintaining a satisfactory level of competition without adversely affecting performance requirements or exposing suppliers' employees to undue hazards from the recovered materials.

Environmental protection. During the manufacture of the soldering irons, materials hazardous to the ecological system as prohibited by Federal, state, or local statutes in effect on the date of the contract shall not be used.

Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the contractor is responsible for the performance of all inspection, examination, and test requirements specified herein. Except as otherwise specified in the contract or purchase order, the contractor may use his own or any other facilities suitable for the inspection requirements specified

herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections, examinations, or tests set forth in this description where such inspections, examinations, and tests are deemed necessary to assure supplies and services conform to prescribed requirements.

Responsibility for compliance. All items shall meet all requirements of salient characteristics paragraphs. The inspection set forth in this description shall become a part of the contractors overall inspection system or quality program. The absence of any inspection requirements in the description shall not relieve the contractor of the responsibility of ensuring that all products or supplies submitted to the Government for acceptance comply with all requirements of the contract. Sampling inspection, as part of manufacturing operations, is an acceptable practice to ascertain conformance to requirements, however, this does not authorize submission of known defective material, either indicated or actual, nor does it commit the Government to accept defective material.

Sampling inspection. As a minimum sampling inspection, the supplier shall randomly select the number of samples in table I that is applicable to the quantity of items being purchased. Each sample item shall be inspected to determine conformance with the examination and the test. Should any of the sample items fail to meet either the examination or test, the entire lot shall be considered defective and unsuitable for acceptance. A lot is defined as all items presented at one time for acceptance.

TABLE I. Sampling plan.

Quantity of items being purchased	Sample size	Quantity of items being purchased	Sample size
2 to 8	2	151 to 280	32
9 to 15	3	281 to 500	50
16 to 25	5	501 to 1,200	80
26 to 50	8	1201 to 3,200	125
51 to 90	13	3201 to 10,000	200
91 to 150	20		

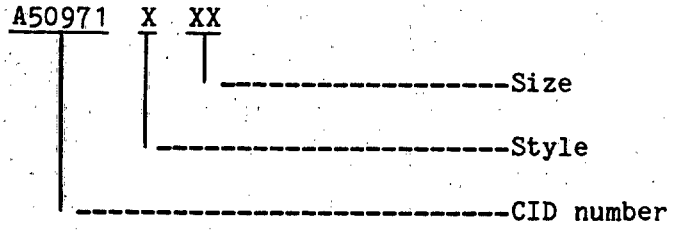

Examination. With the exception of the weight test, each soldering iron submitted for sample inspection shall be visually examined to determine conformance with all requirements of this description.

Weight test. Each soldering iron submitted for sample inspection shall be weighed to assure conformance with the classification paragraph.

Preservation, packaging, packing, and marking. Unless otherwise specified in the contract or purchase order preservation, packing, and marking shall be in accordance with ASTM D 3951. When specified, preservation, packing, and marking shall be in accordance with MIL-W-45562 level as specified in the contract.

CID based part identification number. The following part identification numbering procedure is for Government purposes and does not constitute a requirement for the contractor. Where applicable Arabic numbers shall be substituted for Roman numerals.

Notes.

Ordering data. Purchasers should select the preferred options permitted herein, and include the following information in procurement documents:

a. Title, number, and date of this commercial item description.

b. Style, size, and quantity required.

c. Handles, if required.

d. Packaging in accordance with MIL-W-45562, if required specify level.

STANDARDIZATION DOCUMENT IMPROVEMENT PROPOSAL

INSTRUCTIONS

1. The preparing activity must complete blocks 1, 2, 3, and 8. In block 1, both the document number and revision letter should be given.
2. The submitter of this form must complete blocks 4, 5, 6, and 7.
3. The preparing activity must provide a reply within 30 days from receipt of the form.

NOTE: This form may not be used to request copies of documents, nor to request waivers, or clarification of requirements on current contracts. Comments submitted on this form do not constitute or imply authorization to waive any portion of the referenced document(s) or to amend contractual requirements.

I RECOMMEND A CHANGE:	1. DOCUMENT NUMBER	2. DOCUMENT DATE *(YYMMDD)*
3. DOCUMENT TITLE		

4. NATURE OF CHANGE *(Identify paragraph number and include proposed rewrite, if possible. Attach extra sheets as needed.)*
