MATERIAL: Tongs shall be of corrosion-resisting steel wire in accordance with ASTM A 313.

DESIGN: Tongs shall be capable of firmly gripping evaporating dishes and similar vessels with the above top outside diameter. Jaws shall fit around the sides of the dish and grip it below the top edge. End of each jaw shall have a prong projecting up and over the top edge of the dish. A third prong shall project from the hinge joint up and over the top edge of the dish. Joint shall be flattened to prevent the oval shaped finger rings from shifting out of alignment.

NOTES:

1. Items differing from this Military Standard by minor variations in design or dimensions are considered standard under this document, provided such variations do not affect performance and are not in conflict with the material requirements as specified herein.
2. In the event of a conflict between the text of this standard and the references cited herein, the text of this standard shall take precedence.
3. Referenced Government documents of the issue listed in that issue of the Department of Defense Index of Specifications and Standards (DoDISS) specified in the solicitation form a part of this standard to the extent specified herein.
4. FSCMs: 11273, 22527, 59728, and 87664.
