FED. SUP CLASS
6630

USER ACTIVITIES: ARMY, MD, 99
NAVY, CG, MC, OS, YD

REVIEWER ACTIVITIES:

This military standard is approved for use by all Departments and Agencies of the Department of Defense. Selection for all new engineering and design applications and for repetitive use shall be made from this document.

MATERIAL: Balance shall have a cast aluminum base and aluminum balance arm. The chain shall be rhodium plated bronze. Knife edges and bearings shall be of agate. The remaining components may be aluminum, brass, corrosion resisting steel or other suitable material of construction that will enable proper functioning.

DESIGN: Balance shall consist of the following components: A cast base, a pillar, stirrup and beam, balance weight and chain, chain support, a 10 to 30 degree celsius thermometer and plummet, 100 ml glass cylinder with pourout spout, an adjustable platform for the cylinder, a spirit level and leveling screws. Outside dimensions - 35.6 x 32.4 x 17.2 cm.

Purpose: For the determination of specific gravity of liquids with densities from 0.0001 to 2.110.

Notes:

1. Items differing from this military standard by minor variations in design or dimensions are considered standard under this document, provided such variations do not affect performance and are not in conflict with the material requirements as specified herein.

2. For design features purposes, this standard takes precedence over procurement document referenced herein.

3. Referenced documents shall be of the issue in effect on date of invitations for bid.
