COMMERCIAL ITEM DESCRIPTION
SPECIFICATION SHEET

HOLDERS, ELECTRICAL CARD, WEDGE RETAINERS, 3 PIECE, SCREW ACTUATED DRIVE, .500 X .450 INCH BODY SIZE, WITH VISUAL LOCK INDICATION

The General Services Administration has authorized the use of this commercial item description (CID) for all federal agencies.

The complete requirements for procuring electrical card holders described herein shall consist of this document and the latest issue in effect of A-A-59590.

SCOPE. This CID specification sheet covers 3 piece card holders with a visual locking indicator feature that use screw actuated wedges to hold circuit card assemblies into their installed positions in heat sinking devices (cold plates, heat exchanger) or other applications. Card holders covered by this CID are intended to provide 60g/6ms resistance to shock, withstand 25 G-rms of vibration and provide 1 to 2 degrees C/W/inch thermal resistance between the circuit card assemblies and the heat sink surfaces. Items covered by this CID specification sheet are intended for commercial/industrial applications.

CLASSIFICATION. This CID specification sheet uses a classification system which is included in the Part Identification Number (PIN) as shown in the following example (see notes).

AA59590/	22	C, B ,H	N, J, T, V	* *	W, D, E
CID number	Applicable CID sheet	Finish	Mounting	Length	Options

SALIENT CHARACTERISTICS.

Performance. Card holders shall hold the circuit card firmly in place providing high resistance to shock and vibration while providing maximum thermal transfer when properly installed. The recommended installation torque for the card holder is 31 inch-pounds (3.5 N-m) for the standard screw and 35 inch-pounds (4.0 N-m) for screws with self-locking element . Card holders shall have a visual indicator to show when the assembly is in its relaxed (unlocked) state.

Interface and physical dimensions. The card holders supplied to this CID specification sheet shall be as specified herein and the general CID.

Finish options. The finish options C, B or H, shall be as specified in A–A–59590.

Mounting options. The mounting options N, J, T or V shall be as specified in A–A–59590. When specified, two mounting holes are required on card holders less than 6.00 inches (152.4 mm) in length. See table I and figure 1 for mounting hole spacing requirements.

Length, expanded and relaxed dimensions. The length, expanded and relaxed dimensions shall be as specified in figure 1. The length designator shall be as specified in A–A–59590 and the available lengths are listed in table I.

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

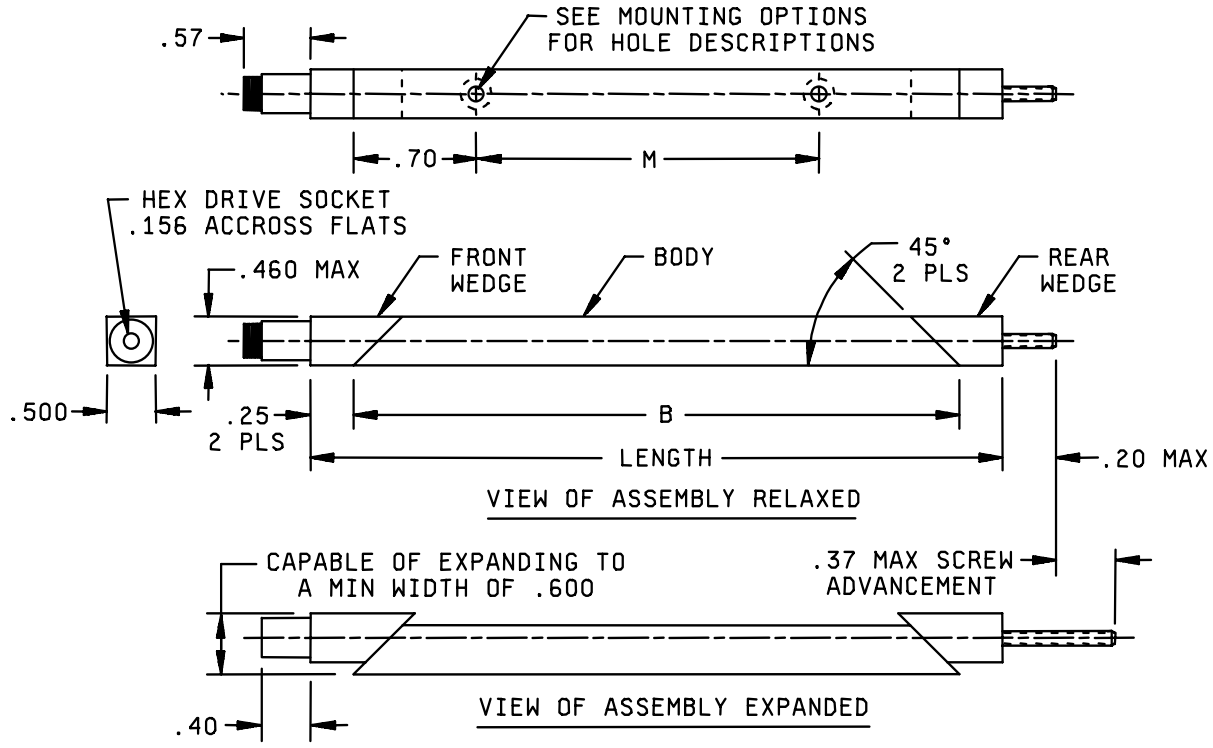
Check the source to verify that this is the current version before use.



Inches	mm	Inches	mm	Inches	mm	Inches	mm	Inches	mm
.156	3.96	.25	6.4	.40	10.2	.500	12.70	.600	15.24
.20	5.1	.37	9.4	.460	11.68	.57	14.5	.70	17.8

NOTES:
1. Dimensions are in inches. Metric equivalents are given for information only.
2. Unless otherwise specified, tolerances are ±.02 (0.5 mm), for 2 places and ±.010 (0.25 mm), for 3 places.

FIGURE 1. Assembly configuration and dimensions.

TABLE I. Additional assembly dimensions (see figure 1).

PIN length designator	Dimension “LENGTH” ± .02	Dimension “B” ± .03	Dimension “M” ± .005
28	2.8 (71)	2.30 (58.4)	.90 (22.9)
38	3.8 (97)	3.30 (76.2)	1.90 (48.3)
48	4.8 (122)	4.30 (101.7)	2.90 (73.7)
58	5.8 (147)	5.30 (127.0)	3.90 (99.1)

Check the source to verify that this is the current version before use.

Visual lock indicator (see figure 2). When the card holder is in the unlocked (relaxed) state, the end of the actuating screw shall display a red band on the side of the screw. When the actuating screw on the card holder has been tightened (assembly expanded) so that the assembly is in the locked position, this red band shall be concealed.

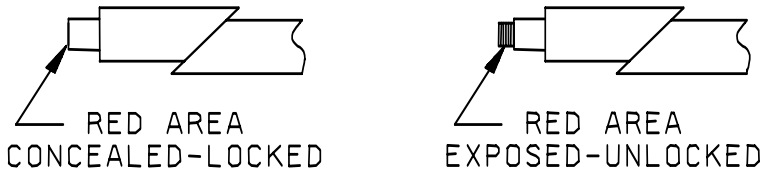

FIGURE 2 Visual lock indicator.

Options. Card holders can have the following options. Card holders not requiring one of the following options shall leave the options position in the PIN blank.

Lockwasher and flat washer (see figure 3). A lockwasher and flat washer located under the screw head will provide for additional resistance to loosening from shock and vibration. Card holders requiring a lockwasher and flat washer option shall include a suffix “W” in the PIN (see classification and notes).

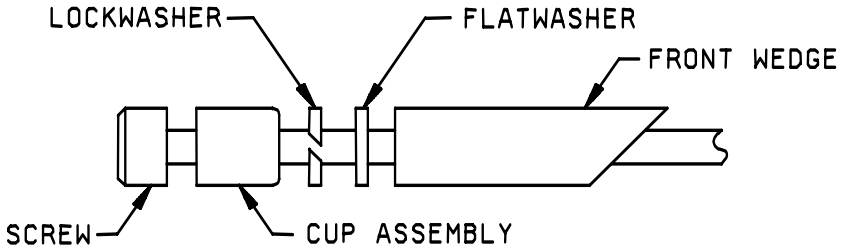

FIGURE 3. Lockwasher and flat washer details.

Screw self-locking element (see figure 4). The use of a screw self-locking element will provide prevailing torque for resistance to loosening from shock vibration. Card holders requiring a screw self-locking element shall include a suffix “E” in the PIN (see classification and notes).

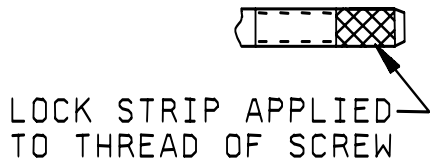

FIGURE 4. Screw self-locking element details.

Lockwasher, flat washer, and screw self-locking element. Card holders requiring a lockwasher, flat washer, and screw self-locking element option shall include a suffix “D” in the PIN (see classification and notes).

NOTES.

PIN. The PIN should be used for government purposes to buy commercial products to this CID specification sheet. See the classification section for PIN format example.

Commercial products. As part of the market analysis and research effort, this CID specification sheet was coordinated with the following manufacturers of commercial products. At the time of CID specification sheet preparation and coordination, these manufacturers were known to have commercial products that would meet the requirements of this CID specification sheet. (NOTE: This information should not be considered as a list of approved manufacturers or be used to restrict procurement to only the manufacturers shown.)

1/ CID PINs listed only with length designator “28”.
2/ The manufacturer's part number shall not be used for procurement to the requirements of this CID specification sheet. At the time of preparation of this CID specification sheet, the aforementioned commercial products were reviewed and could be replaced by the CID PIN shown. For actual part marking requirements, see the marking paragraph of the basic CID.
