COMMERCIAL ITEM DESCRIPTION

SOCKS, EXTREME COLD WEATHER

The General Services Administration has authorized the use of this commercial item description as a replacement for MIL-S-38004 for all Federal agencies.

1. SCOPE. This commercial item description covers one type of felt socks intended for wear with the extreme cold weather boot by personnel of the Department of Defense.

2. CLASSIFICATION. The socks may be one type only and available in the following sizes:

   Sizes: Extra-small (XS) Small (S) Medium (M) (Large (L)

3. SALIENT CHARACTERISTICS

3.1 Description. The socks shall be made of wool felt, natural color and consist of two quarters and a bottom stitched together. The socks shall have a tape stay at the front and a tape pull strap at the back (refer to Figure 1).

3.2 Material.

3.2.1. Felt. Unless otherwise specified the felt for the socks shall be made of 100 percent fleece, 100 percent pulled sheep's wool or a mixture of fleece and pulled sheep's wool. The fleece or wool shall not be lower in grade than the 40's of U.S standard. The finished fabric shall conform to the requirements in Table I. The finished fabric shall be soft and flexible and shall be thoroughly scoured. The wool shall be of suitable staple length to comply with this commercial item description. The face and the back shall be given a good cover nap. Reused wool or any other similar waste shall not be used (see 4.1).

Beneficial comments (recommendations, additions, deletions) and any pertinent data which may be of use in improving this document should be addressed to: Defense Supply Center Philadelphia, Clothing and Textiles Directorate, Attn: DSCP-CRFD, 700 Robbins Ave, Philadelphia, PA 19111-5094

Check the source to verify that this is the current version before use.

3.2.2 Color. Unless otherwise specified, the color of the felt shall be the natural color of white scoured wool.

TABLE I. Basic material requirements

CHARACTERISTICS	REQUIREMENTS	TEST METHODS
Weight oz./sq. ft	4 oz (+/- 5%)	ASTM D3776
Texture: Warp Filling	 35 threads per inch 35 threads per inch	ASTM D3775
Breaking Strength, min. (grab method): Warp Filling	 165 pounds 165 pounds	ASTM D5034

3.3 Tape. The tape at the top of the sock (refer to Figure 1), front and back shall be cotton, bleached white, 5/8 (+/- 1/8) inch wide with a breaking strength (min.) of 115 pounds in accordance with ASTM D5034. The back pull strap shall be securely attached with a loop at top center back and have a 2-1/2 inch opening. The front stay shall be 1-3/4 inches in length, folded across the top of the front seam and box stitched.

3.4 Thread. The thread used for sewing shall be standard commercial thread, 100% cotton plied, with a breaking strength (min.) of 5.3 pounds in accordance with ASTM D5034.

3.5 Finished measurements and weights. The finished measurements shall be in accordance with Table II (refer to Figure 2). The minimum weight per six pairs of socks shall be 4-1/4 pounds for extra small sizes, 4-1/2 pounds for small sizes, 4-3/4 pounds for medium sizes, 5 pounds for large sizes.

3.6 Patterns. Standard patterns shall be furnished for used as a guide to cut working patterns. The standard patterns shall not be altered in any way and the working patterns shall not be modified without prior approval from the procuring activity.

TABLE II. Finished measurements (inches)

Measurement and Location		SIZES				
		X-Small (XS)	Small (S)	Medium (M)	Large (L)	Tolerance
		5 to 7	7-1/2 1/	8 to 10 1/	10-1/2 & over 1/	All Sizes
A	Girth at top	15-1/4	15-1/2	16	16-1/2	(+/-)1/2
B	Girth at ankle (4-1/2 inches below top)	13-1/2	14	14	14-1/2	(+/-)1/2
C	Girth, heel to top of instep	16-1/2	16-1/2	17	17-1/2	(+/-)1/2
D	Girth at ball (widest point)	12	12-1/2	13	13-1/2	(+/-)1/2
E	Length, heel to toe	11-1/4	11-1/2	12-1/2	13-1/2	(+/-)1/2
F	Height, back and front	9-1/2	9-1/2	9-1/2	9-1/2	(+/-)1/2

1/ Corresponding shoe size

3.7 Marking. The letters XS, S, M or L, indicating size, shall be legibly stamped on the pull strap of each sock. Black indelible ink or dry transfer shall be used for the stamping, and the letters shall be 3/8 inch in height and width. In addition, the wool content of the sock shall be stamped adjacent to the size marking. The wool content marking shall be in accordance with the Wool Products Labeling Act.

3.8 Label/tag. The bar coding element shall be a 13 digit National Stock Number (NSN). There shall be a 12-digit unit price code (UPC) number assigned for all NSNs by DSCP. The initials UPC must appear beneath the unit price code (UPC) code. The bar code NSN and UPC types shall be a medium to high code density and shall be located so that it is completely visible on the item when it is folded and/or packaged as specified and so that it causes no damage to the item.

3.9 Pairing. The socks shall be paired and twine passed through the pull straps to hold the pair of socks together.

3.10 Stitches, seams and stitching. Stitches, seams and stitching shall conform to ASTM D6193. The stitches shall be 12 to 14 stitches per inch.

3.11 Workmanship. Socks shall be clean, well made and free of any defects that might affect their appearance or serviceability.

4. REGULATORY REQUIREMENTS. The offeror/contractor is encouraged to use recovered materials to the maximum extent practicable, in accordance with paragraph 23.403 of the Federal Acquisition Regulation (FAR).

5 PRODUCT CONFORMANCE PROVISIONS

5.1 Product conformance. The products provided shall meet the salient characteristics of this commercial item description, and shall conform to the producer's own drawings, commercial item descriptions, standards and quality assurance practices. The Government reserves the right to require proof of such conformance.

5.2 Visual examination. Each sock shall be examined for the defects listed 5.2.1.

5.2.1 Defects. Not specified color or definite variation in color; not soft or flexible; badly shaded or wide variation in color; not secured with twine through the pull straps; any spot stain seriously affecting appearance; any hole, cut or tear seriously affecting serviceability; any smash, float, slub, abrasion, or any other defect affecting serviceability; not napped on either side; tape not white, missing, not securely attached, not completely covering seam as required, not completely box stitched as required, loop on pull strap less than 2 inches or more than 3 inches; edge of seam overlapping or not tightly butted; joining of front and back seams at bottom section not closed and firm; any open seam except front stay or back loop (a seam shall classified as open when one or more stitches joining a seam are broken or when two or more continuous skipped stitches or run-offs occur); any open seam on front stay or back loop; any twist, pleat or pucker seriously affecting serviceability; loose stitch tension resulting in a loosely secured seam; any material defects, distorted parts or poor workmanship; Any component part omitted or not securely attached affecting serviceability; markings missing, incorrect, or illegible or improper location; measurement of item not as specified; bar code omitted or not readable by scanner; human-readable interpretation (HRI) omitted or illegible; bar code not visible on folded, packaged item; bar code causes damage to the item; any items not packaged in accordance with the contract or purchase order.

5.3 Acceptance criteria. Acceptance criteria shall be as specified in the contract or purchase order.

6. PACKAGING

6.1 Preservation, packing, and marking. Preservation, packing, and marking shall be as specified in the contract or order.]
