(Application for copies should be addressed to the Official Classification Committee, 1 Park Avenue at 33rd Street, New York, N. Y. 10016.)

AMERICAN TRUCKING ASSOCIATION

National Motor Freight Classification Rules

(Application for copies should be addressed to the American Trucking Association, 1616 P Street NW, Washington, D. C. 20036.)

3. REQUIREMENTS

3.1 Materials. Materials shall be as specified herein and in the applicable specifications. Materials not specified shall be selected by the supplier and shall be subject to all provisions of this specification. Materials shall be free from defects affecting serviceability.

3.2 Preservation and packaging (see 6.3).

3.2.1 Level A.

3.2.1.1 Components. Each net shall be folded with the ropes and corner loops on the inside of the bundle. The components of the set shall be packaged in the bags, boxes, and carrying cases as shown on Drawings D7522-A, D9120-A, D9203-A, D9204-A, D10728-1, and D10730-1, as applicable.

3.2.1.2 Erection procedure drawings and drawings of components. Erection procedure drawings and drawings of components for each set shall be preserved in accordance with MIL-P-116, method IC-1, and placed as shown on the applicable drawings.

3.3 Packing. Packing shall be level A, B, or C as specified (see 6.2).

3.3.1 Level A. Each complete set, packaged in the bags, boxes, and carrying cases, as required, shall be packed as follows: Sets not exceeding the weight limitations of the box specification shall be packed in a close-fitting box conforming to PPP-B-621, class 2, style 2, or PPP-B-601, overseas type, style optional. For sets exceeding 250 pounds, the boxes shall be modified by the installation of skids in accordance with the box specification. Strapping shall be zinc coated and placed adjacent to the skids on modified boxes. Each set exceeding the weight limitations of a wood box shall be packed in a crate conforming to MIL-C-104, type I, class 1 or 2, style a. Blocking, bracing, anchoring, closure, and strapping shall be in accordance with the appendix to the applicable box or crate specification and in accordance with MIL-STD-1186. Strapping shall be zinc coated.

Check the source to verify that this is the current version before use.

3.3.2 Level B. Packing shall be as specified in 3.3.1 for level A except boxes shall be domestic type or class as applicable and strapping is not required to be zinc coated. Crates shall conform to PPP-C-650, style B, type V, class 1, covered.

3.3.3 Level C. Each complete set, packaged in the bags, boxes, and carrying cases, as required, shall be packed to assure carrier acceptance and safe delivery to destination at lowest rates in compliance with Uniform Freight Classification Rules, National Motor Freight Classification Rules, or other carrier rules applicable to the mode of transportation.

3.4 Marking. In addition to any special marking required by the contract or order, packages and shipping containers shall be marked in accordance with MIL-STD-129. Shipment marking shall be A/A, A/B, or A/C, as applicable.

4. QUALITY ASSURANCE PROVISIONS

4.1 Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the supplier is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified, the supplier may utilize his own facilities or any commercial laboratory acceptable to the Government. The Government reserves the right to perform any of the inspections set forth in this specification where such inspections are deemed necessary to assure supplies and services conform to prescribed requirements.

4.1.1 Material inspection. The supplier is responsible for insuring that supplies and materials used are manufactured, examined, and tested in accordance with referenced specifications and standards.

4.2 Quality conformance inspection.

4.2.1 Unit of product. For the purpose of inspection, a completed pack of any one level prepared for shipment shall be considered a unit of product.

4.2.2 Sampling. Sampling for examination shall be in accordance with MIL-STD-105.

4.2.3 Examination. Samples selected in accordance with 4.2.2 shall be examined for the following defects. AQL shall be 2.5 percent defective.

| | |
|---|---|
| 101. | Materials not as specified for preservation and packaging and for level A or B packing. Each incorrect material shall constitute one defect. |

102. Nets not folded as specified.
103. Components not packaged in the bags, boxes, and carrying cases in accordance with the applicable drawing.
104. Erection procedure drawings not preserved as specified and placed as shown on the applicable drawing.
105. Containers not as specified for level A or B packing.
106. Boxes containing sets weighing more than 250 lb not modified by by the installation of skids for level A or B.
107. Strapping not zinc coated for level A.
108. Strapping not placed adjacent to the skids on modified boxes for level A or B.
109. Blocking, bracing, anchoring, closure, and strapping not in accordance with the appendix to the applicable box or crate specification and the referenced document for level A or B.
110. Marking missing, illegible, incorrect, or incomplete.

## 5. PREPARATION FOR DELIVERY

(Not applicable to this specification.)

## 6. NOTES

6.1 Intended use. This specification is intended to be used for direct reference in contracts or orders to cover the preservation, packaging, packing, and marking of the following camouflage net drape sets: SM 5-4-1080-S25, SM 5-4-1080-S26, SC 1080-93-CL-E05, SC1080-93-CL-E06, SC 1080-93-CL-E07, and SC 1080-93-CL-E08.

6.2 Ordering data. Procurement documents should specify the following:

(a) Title, number, and date of this specification.
(b) Level of packing required (see 3.3).

6.3 Levels B and C preservation and packaging have not been included, as the packaging detailed on the drawings is the minimum acceptable for all levels of protection.

6.4 Revision changes. Asterisks are not used in this revision to identify changes with respect to the previous issue due to the extensiveness of the changes.
