Data Item Description

Title: INTEGRATED VERIFICATION PLAN

Number: DI-SESS-82537
AMSC Number: N10658
DTIC Applicable: N/A
Preparing Activity: AS
Applicable Forms: N/A

Approval Date: 20260428
Limitation: N/A
GIDEP Applicable: N/A
Project Number: SESS-2026-021

Use/relationship: The plan documents the approach for verifying changes to a configuration item. It takes the requirements and maps them into all verification activities.

This DID contains the format, content, and intended use information for the data product resulting from the work task described in the contract SOW.

Requirements:

1. Reference documents.

2. Format. The plan shall be in contractor's format.

3. Content. The plan shall contain the following:

3.1. Brief description of the system under test and change driving verification.

3.2. Requirement to verification activity traceability.

3.2.1. For verification via inspection, include:

3.2.1.1. Standard, documentation, or drawing against which inspection will be performed.

3.2.2. For verification via analysis include:

3.2.2.1. Assumptions.

3.2.2.2. Rationale for approach.

3.2.3. For verification via test include:

3.2.3.1. Assumptions and constraints.

3.2.3.2. Facilities required.

Check the source to verify that this is the current version before use.

3.2.3.3. Data required.

3.2.3.4. Test Equipment required.

3.2.3.5. Configuration of item under test.

3.2.4. For verification via demonstration include:

3.2.4.1. Assumptions and constraints

3.2.4.2. Facilities required

3.2.4.3. Configuration of item under test

3.2.5. For verification via similarity include:

3.2.5.1. Previous verification activity being leveraged

3.2.5.2. Rationale on why design change does not invalidate previous verification

3.2.6. For verification via modeling and simulation include:

3.2.6.1. Assumptions and constraints

3.2.6.2. Verification, validation, and accreditation approach for simulations

3.2.6.3. Limitations of M&S

3.3. Verification activity to anticipated resultant documentation traceability

3.4. Organization leading each verification activity.

3.5. Flow of all verification activities

3.6. Notional scheduling and locations of all verification activities

End of DI-SESS-82537
