FEDERAL STANDARD STOCK CATALOG

Section IV

(Part 5)

FEDERAL SPECIFICATION

FOR

BRUSHES; DAUBER, LONG-PADDLE

This specification was approved on the above date by the Director, Bureau of Federal Supply, for the use of all departments and establishments of the Government, and shall become effective not later than February 1, 1948, for use in procurement initiated on or after that date. It may be put into effect, however, at any earlier date after promulgation.

A. APPLICABLE SPECIFICATIONS

A–1. There are no other Federal specifications applicable to this specification.

B. TYPE AND GRADE

B–1. Long-paddle dauber brushes in accordance with this specification shall be furnished in one type and one grade. (See fig. 1.)

C. MATERIAL AND WORKMANSHIP

C–1. *Material.*—

C–1a. *Block.*—The block shall be of close-grained hardwood.

C–1b. *Fiber.*—The fiber shall be medium grade, white Tula Tampico fiber.

C–1c. *Wire.*—The wire for wire-drawn brushes shall be brass not less than 0.015 inch in diameter.

C–1d. *Staples.*—The staples for staple-set brushes shall be made of corrosion-resisting steel wire not less than 0.047 inch in diameter.

C–2. *Workmanship.*—The brushes shall be free from defects which affect their appearance or which may affect their serviceability.

D. GENERAL REQUIREMENTS

D–1. *Standard sample.*—The brushes shall be equal to the standard sample in workmanship and balance; in stiffness, solidity, kind, and quality of the fiber; and in any other respects not specifically covered in this specification. (See pars. I–1 and I–2.)

D–2. *Design.*—The brushes shall be of the general design illustrated in figure 1.

E. DETAIL REQUIREMENTS

E–1. *Physical requirements.*—The brushes shall comply with the physical requirements shown in table I.

TABLE I.—*Physical requirements*

Block:		
Length, over-all	inches	19 ± 1/4
Length, brush part, approximately	do	8
Width, brush part, approximately	do	2
Width, handle part	inch	7/8 ± 1/16
Thickness, over-all	do	7/8 ± 1/16
Holes:		
Number, minimum		27
Diameter, minimum	inch	1/4
Diameter, minimum	do	7/16
Fiber:		
Length clear of block, minimum	inches	3
Weight, minimum	ounces	2.0

E–2. *Block.*—The block shall be one piece, with a smoothly sanded finish. The brush part shall be paddle-shaped, tapering to the handle. The brush end of the block shall be rounded. The edges of the handle part of the block shall be chamfered.

E–2a. *Fiber holes.*—The fiber holes located in the brush part of the block shall be formed so as to provide a 30° slant of fiber at the end of the brush.

E–2b. *Handle hole.*—The handle shall have a 3/16±1/32-inch hole centrally located approximately 3/4 inch from the end.

E–3. *Set.*—The fiber shall solidly fill the holes and shall be securely staple-set or wire-drawn.

F. METHODS OF SAMPLING, INSPECTION, AND TESTS

F–1. *Sampling.*—Two brushes shall be taken at random from each lot of 100 brushes or fraction thereof delivered.

F–2. *Inspection.*—

F–2a. The brushes shall be inspected to determine compliance with this specification with respect to material and workmanship, dimensions, and finish of the block, slant of fiber, length of fiber clear of block, kind of wire, and the number, diameter, and depth of holes.

F–2b. The brushes shall be compared with the standard sample with respect to the requirements of paragraph D–1.

F–3. *Tests.*—

F–3a. *Weight of fiber.*—The fiber shall be removed from the block and shall be conditioned for not less than 16 hours in air at a relative humidity of 65±2 percent and at a temperature of 70° to 80° F. The weight of fiber shall be determined in the same atmosphere.

G. PACKAGING, PACKING, AND MARKING FOR SHIPMENT

G–1. *Packaging.*—Unless otherwise specified, each brush shall be packaged in an individual closed pasteboard box or carton.

G–2. *Packing.*—Unless otherwise specified, the subject commodity shall be packed in substantial commercial containers of the type, size, and kind commonly used for the purpose, so constructed as to insure acceptance and safe delivery by common or other carriers, at the

lowest rate, to the point of delivery called for in the contract or purchase order.

G–3. *Marking.*—

G–3a. *Packages.*—Unless otherwise specified, individual packages shall be marked with the name of the article, the quantity contained therein, and the name of the contractor.

G–3b. *Shipping containers.*—Unless otherwise specified, shipping containers shall be marked with the name of the article and the quantity contained therein, as defined by the contract or order under which the shipment is made, the name of the contractor, and the number of the contract or order.

H. REQUIREMENTS APPLICABLE TO INDIVIDUAL DEPARTMENTS

H–1. The following departmental specifications and other publications, of the issues in effect on date of invitation for bids, and special requirements, shall form a part of this specification, and shall be applicable to purchases made under this specification by the respective departments.

H–2. *Army.*—U. S. Army Specification No. 100–2, Standard Specification for Marking Shipments by Contractors, copies of which may be obtained without cost upon application to the procuring agency.

H–2a. *Packing.*—For domestic shipment, current practice which will insure delivery at destination in perfect condition shall be followed; for overseas shipment, applicable, U. S. Army specifications, of the issues in effect on date of invitation for bids, shall be followed.

H–3. *Navy.*—

H–3a. *Applicable specifications and other publications.*—

Federal Specifications:

NN–B–591—Boxes; Wood-Cleated-Fiberboard.
NN–B–601—Boxes; Wood-Cleated-Plywood (for Domestic Shipments).
NN–B–621—Boxes; Wood, Nailed and Lock-Corner.
NN–B–631—Boxes; Wood, Wire-Bound, for Domestic Shipment.
LLL–B–631—Boxes; Fiber, Corrugated (for Domestic Shipment).
LLL–B–636—Boxes; Fiber, Solid (for Domestic Shipment).

Joint Army-Navy Specifications:

JAN–P–105—Packaging and Packing for Overseas Shipment—Boxes, Wood, Cleated, Plywood.
JAN–P–106—Packaging and Packing for Overseas Shipment—Boxes; Wood, Nailed.
JAN–P–107—Packaging and Packing for Overseas Shipment—Boxes, Wood, Wire-Bound.
JAN–P–108—Packaging and Packing for Overseas Shipment—Boxes, Fiberboard (V-Board and W-Board), Exterior and Interior.
JAN–P–125—Packaging and Packing for Overseas Shipment—Barrier-Materials, Waterproof, Flexible.
JAN–P–138—Packaging and Packing for Overseas Shipment—Boxes, Wood, Fiberboard-Lined.
JAN–P–140—Packaging and Packing for Overseas Shipment—Adhesives, Water-Resistant, Case-Liner.

Navy Department Specification:
General Specifications for Inspection of Material.
Bureau of Supplies and Accounts Publication:
Navy Shipment Marking Handbook.

Copies of Federal and Joint Army-Navy specifications (required for Navy purchases), Navy Department specifications, and the Navy Shipment Marking Handbook may be obtained without cost upon application to the Bureau of Supplies and Accounts, Navy Department, Washington 25, D. C., except that Naval activities should make application to the Supply Officer in Command, Naval Supply Depot, Norfolk, Va. When requesting specifications, refer to both title and number (or symbol).

H–3b. *Packing.*—

H–3b(1). *For domestic shipment.*—Dauber brushes, packaged as described in paragraph G–1, shall be packed in substantial commercial containers of the type, size, and kind commonly used for the purpose, so constructed as to insure acceptance and safe delivery by common or other carriers, at the lowest rate, to the point of delivery. When wood-cleated-fiberboard boxes, wood-cleated-plywood boxes, nailed wood boxes, wire-bound wood boxes, corrugated fiber boxes, or solid fiber boxes are used, they shall conform to the requirements of Federal Specifications NN–B–591, NN–B–601, NN–B–621, NN–B–631, LLL–B–631, and LLL–B–636, respectively. The gross weight of wood boxes shall not exceed approximately 200 pounds; of fiberboard boxes, 70 pounds.

H–3b(2). *For overseas shipment.*—Dauber brushes, packaged as described in paragraph G–1, shall be packed in cleated-plywood boxes, nailed wood boxes, wire-bound wood boxes, fiberboard boxes, or fiberboard-lined wood boxes conforming to the requirements of Joint Army-Navy Specifications JAN–P–105, JAN–P–106, JAN–P–107, JAN–P–108, and JAN–P–138, respectively. Shipping containers shall be lined with a sealed waterproof bag, or its equivalent, made from material conforming to the requirements of Joint Army-Navy Specification JAN–P–125. The seams and closures shall be sealed with a water-resistant adhesive conforming to the requirements of Joint Army-Navy Specification JAN–P–140. The gross weight of wood boxes shall not exceed approximately 200 pounds; of fiberboard boxes, 70 pounds.

H–3c. *Marking.*—In addition to any special marking required by the contract or order, marking of interior packages and shipping containers shall conform to the requirements of the latest issue of the Navy Shipment Marking Handbook.

H–3d. *Ordering information.*—Requests, requisitions, schedules, and contracts or orders should specify whether the subject commodity is to be packed and shipping containers marked for domestic or overseas shipment. (See pars. H–3b and H–3c.)

I. NOTES

I–1. Purchasers should exercise any desired options offered herein and should specify the location at which standard samples may be seen. (See pars. G–1, G–2, G–3, and H–3d.)

I–2. *Standard sample.*—The standard sample is a reasonable facsimile of the master standard sample on file at the National Bureau of Standards, Washington, D. C. It is not intended that the master standard sample shall be used for the purpose of purchase or inspection

Source: https://assist.dla.mil -- Check the source to verify that th

of brushes, but that the master standard sample will be used by Government agencies for comparison purposes to obtain a standard sample for their own use in purchase and inspection.

I–2a. In order that uniform standards for brushes may be maintained among the various Government agencies, purchasers should forward brushes to the National Bureau of Standards for inspection and its opinion in order to obtain a standard sample equal to the master standard sample; the standard sample should then be preserved by the purchaser and used in the purchase and inspection of brushes obtained under this specification.

I–3. It is believed that this specification adequately describes the characteristics necessary to secure the desired material, and that normally no samples will be necessary prior to award to determine compliance with this specification. If, for any particular purpose, samples with bids are necessary, they should be specifically asked for in the invitation for bids, and the particular purpose to be served by the bid sample should be definitely stated, the specification to apply in all other respects.

I–4. Federal specifications do not include all types, classes, grades, sizes, etc., of the commodities indicated by the titles of the specifications, or which are commercially available, but are intended to cover the types, etc., which are suitable for Federal Government requirements.

I–5. An Index of Federal Specifications may be purchased as noted in the paragraph below, price to be obtained from the Superintendent of Documents.

I–6. Copies of this specification may be obtained upon application, accompanied by postal note, money order, coupon, or cash, to the Superintendent of Documents, Government Printing Office, Washington 25, D. C. Price, 5 cents.

Notice.—When Government drawings, specifications, or other data are used for any purpose other than in connection with a definitely related Government procurement operation, the United States Government thereby incurs no responsibility nor any obligation whatsoever; and the fact that the Government may have formulated, furnished, or in any way supplied the said drawings, specifications, or other data, is not to be regarded by implication or otherwise as in any manner licensing the holder or any other person or corporation, or conveying any rights or permission to manufacture, use, or sell any patented invention that may in any way be related thereto.
