* Paragraph 3.4.1: Change "3.5 to 3.5.4" to "3.5.2".

* Paragraph 3.5.2: Delete paragraph and substitute the following:

"3.5.2 Operability.- With the cant corrector thermally stabilized at a temperature between 70° and 75°F the torque required to rotate housing 8626160 shall be between 8 and 16 ounce-inches. When exposed to the operating temperatures specified in 3.4.1 the torque required to rotate housing 8626160 shall not exceed 5 inch-pounds."

* Add the following new paragraphs:

"4.1.2 First article (initial production) approval. - The requirement for first article approval and the responsibility (Government or contractor) for first article testing shall be as specified in the contract. The sample for first article approval tests shall consist of 3 cant correctors. The sample shall be manufactured in the same manner, using the same materials, equipment, processes, and procedures as used in regular production. All parts and materials, including packaging and packing, shall be obtained from the same source of supply as used in regular production.

4.1.2.1 Government testing.- When the Government is responsible for conducting first article approval tests, the contractor, prior to submitting the sample to the Government, shall inspect the sample to insure that it conforms to all the requirements of the contract and submit a record of this inspection with the sample, including certificates of conformance for materials.

4.1.2.2 Contractor testing.- When the contractor is responsible for conducting first article approval tests, the sample shall be inspected by the contractor for all the requirements of the contract. The sample and a record of this inspection, including certificates of conformance for materials shall be submitted to the Government for approval. The Government reserves the right to witness the contractor's inspection."
