COMMERCIAL ITEM DESCRIPTION

BRUSH, POLISHING, DENTAL HANDPIECE (Screw Stem)

This commerical item description shall be used in preference to Military Specification MIL-B-36170A.

This commercial item description covers a screw stem type polishing brush for use in angle prophylaxis handpieces in cleaning and polishing teeth.

Salient characteristics:

Material. The brush stock shall be top grade, stiff, natural (undyed) black horsehair. The hub and screw stem shall be made of nickel plated brass, except plating is optional on screw stem. The staple used for clinching the hair shall be made of corrosion resisting metal, or metal suitably coated to render it corrosion-resisting.

Design and construction. The brush shall be suitable for use with short right angle and contra angle dental handpieces. The hair shall be straightened, cleaned, and square cut. The hair shall be securely and properly clinched and fastened in the hub by means of a staple around the middle of the bent tuft. The hair shall be tightly packed in the hub and neatly and evenly trimmed. The brush shall retain the hair and the exposed metal components shall show no corrosion, when tested as specified below. The brush shall conform to style 1 or 2 of figure 1.

Finish. The exposed metal components of the brush (hub and screw) shall have a bright, smooth finish.

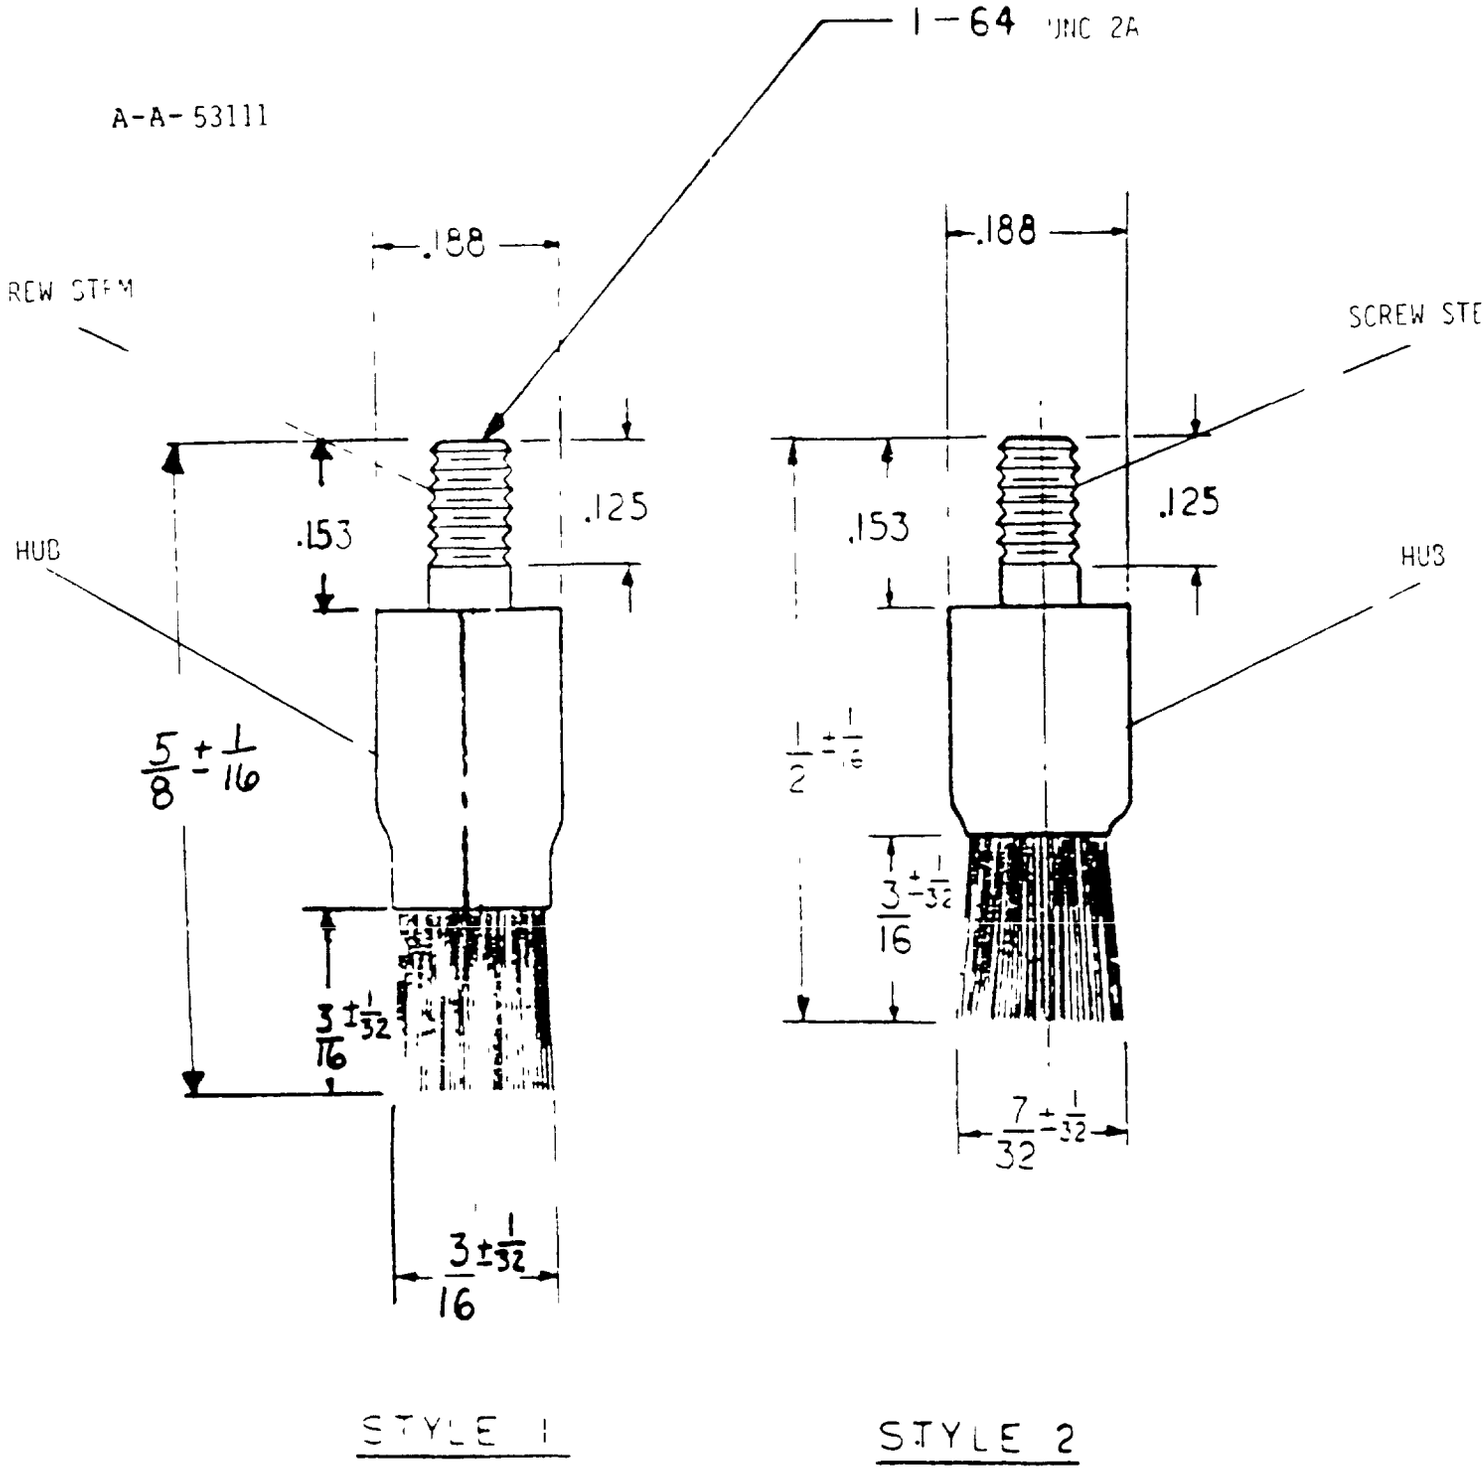

Workmanship. The polishing brush shall be free from rough edges and burrs or other defects which detract from its appearance or may impair its serviceability.

Unit. Package (PG). One package containing twenty-four brushes, as specified, constitutes one unit of issue.

AMSC N/A FSC 6520

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

Quality Assurance Provisions.

Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the contractor is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract or purchase order, the contractor may use his own or any facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure supplies and services conform to prescribed requirements.

Records. Records of examinations and tests performed by or for the contractor shall be maintained by the contractor and made available to the Government upon the Government's request, at any time, or from time to time, during the performance of the contract and for a period of three years after delivery of the supplies to which such records relate.

Inspection. Inspection, as used herein, is defined as both examination (such as visual or auditory investigation without the use of special laboratory appliances or procedures) and testing (determination by technical means of physical and chemical properties) of the item.

Sampling for inspection. Sampling for inspection shall be conducted in accordance with MIL-STD-105. Where feasible, the same sample shall be used for the determination of two or more inspection characteristics. The unit of product for inspection purposes shall be one brush. Unless otherwise specified, sampling for examination shall be conducted at inspection level II, AQL 2.5, and sampling for tests (when applicable) shall be conducted at inspection level S-1, AQL 1.0.

Tests.

Resistance to boil: Before testing, the brushes shall be scrubbed with soap and water and rinsed thoroughly in distilled water, and dried. After being cleaned the brush shall be boiled in distilled water in a glass container for 30 minutes and allowed to remain submerged for an additional 24 hours. The specimens shall then be removed from the water and examined for corrosion and retention of the hair.

Check the source to verify that this is the current version before use.

Hair Retention. The brushes shall be rotated at 2,500 revolutions per minute and applied to a metal disc under a 300 gram load for 5 minutes. The brushes shall be examined for hairs that may be loosened.

Contractor certification. The contractor shall certify that the product offered meets the salient characteristics of this description and conforms to the producers' own drawings, specifications, standards, and quality assurance practices. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Metric Products. Products manufactured to metric dimensions will be considered on an equal basis with those manufactured using inch/pound units, providing they fall within the tolerance specified using conversion tables contained in the latest revision of Federal Standard No. 376, and all other requirements of this document are met. If a product is manufactured to metric dimensions and those dimensions exceed the tolerance specified in the inch/pound units, a request should be made to the contracting officer to determine if the product is acceptable. The contracting officer has the option of accepting or rejecting the product.

Regulatory requirements.

Federal Food, Drug and Cosmetic Act. If the product covered by this document has been determined by the U.S. Food and Drug Administration to be under its jurisdiction, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of the Federal Food, Drug and Cosmetic Act, as amended, and regulations promulgated thereunder. In addition, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of all other applicable Federal, State, and local statutes, ordinances, and regulations.

Recovered materials. The offeror/contractor is encouraged to use recovered material in accordance with Public Law 94-580 as amended, and as implemented by Federal Acquisition Regulation Subpart 23.4 to the maximum extent practical.

Preservation, packaging, packing, labeling, and marking. Unless otherwise specified, preservation, packaging and packing shall be to a degree of protection to preclude damage to containers and/or contents thereof under normal shipping conditions, handling, etc., involving shipment from the supply source to the receiving activity, plus reshipment from receiving activity, and shall conform to applicable carrier's rules and regulations. Intermediate and exterior package quantities and labeling and marking shall be as specified in the contract and/or order.

NOTE: The following National Stock Number is covered by this document.

INSTRUCTIONS In a continuing effort to make our standardization documents better, the DoD provides this form for use in submitting comments and suggestions for improvements. All users of military standardization documents are invited to provide suggestions. This form may be detached, folded along the lines indicated, taped along the loose edge (*DO NOT STAPLE*), and mailed. In block 5, be as specific as possible about particular problem areas such as wording which required interpretation was too rigid, restrictive, loose, ambiguous, or was incompatible, and give proposed wording changes which would alleviate the problems. Enter in block 6 any remarks not related to a specific paragraph of the document. If block 7 is filled out, an acknowledgement will be mailed to you within 30 days to let you know that your comments were received and are being considered.

NOTE This form may not be used to request copies of documents, nor to request waivers, deviations, or clarification of specification requirements on current contracts. Comments submitted on this form do not constitute or imply authorization to waive any portion of the referenced document(s) or to amend contractual requirements.
