COMMERCIAL ITEM DESCRIPTION

TABLE, TREATMENT

The General Services Administration has authorized the use of this commercial item description.

This Commercial Item Description covers a folding, padded, portable treatment table.

Salient characteristics:

The treatment table shall be a sturdy, padded, portable treatment table with a folding capability for ease of transport. It shall have the following nominal dimensions:

Overall width - 24 inches (61.0cm)
Overall length - 72 inches (182.9cm)
Overall height - 28 inches (71.1cm)

The table shall weigh no more than 30 pounds; however, it shall be capable of safely supporting up to a 300 pound patient. The folded table shall have a carrying handle.

The table shall be upholstered with a 2 inch thick (minimum) foam pad covered in heavy-duty, easy to clean vinyl. The foam pad shall have no large voids and shall be dense enough that it will not bottom-out with a 300 pound patient. The vinyl covering shall be fire retardant. Both the foam pad and the vinyl covering shall have no objectionable odor. Corrosion resistant corner guards shall protect the four upholstered corners.

The table shall have a sturdy rigid frame with a table top thickness of 1/4 inch minimum supported by a minimum of eight aluminum or wooden legs, suitably braced for strength and support. All metal hardware shall be corrosion-resisting.

AMSC N/A FSC 6530

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

Check the source to verify that this is the current version before use.

The table shall sit stable on a flat floor surface when unfolded. It shall sit without rock or wobble, with or without a patient on it. The table shall have a fail-proof locking mechanism or latch to keep it from collapsing when in use.

The table finish shall be smooth and uniform and free of scratches, splinters, and discoloration.

The table shall be so constructed that all corners shall be rounded and edges smooth. There shall be no danger of injury or tearing of clothing by inadvertently brushing against the table.

Workmanship. The treatment table shall be free from defects which detract from its appearance or impair its serviceability.

Unit. Each (EA). One table, as specified, constitutes one unit.

Quality Assurance Provisions.

Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the contractor is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract or purchase order, the contractor may use his own or any facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure supplies and services conform to prescribed requirements.

Records. Records of examinations and tests performed by or for the contractor shall be maintained by the contractor and made available to the Government upon the Government's request, at any time, or from time to time, during the performance of the contract and for a period of three years after delivery of the supplies to which such records relate.

Inspection. Inspection, as used herein, is defined as both examination (such as visual or auditory investigation without the use of special laboratory appliances or procedures) and testing (determination by technical means of physical and chemical properties) of the item.

Check the source to verify that this is the current version before use.

Tests. Tests shall be conducted to determine compliance with specification requirements. Where feasible, the same sample shall be used for the determination of two or more test characteristics.

Sampling for examination. Sampling for examination shall be conducted in accordance with MIL-STD-105, with an AQL of 1.0 (percent defective) and an inspection level of II. The unit of product for examination purposes shall be one treatment table as specified in this description.

Defects.

Table has less than six legs.

Metal hardware is not corrosion-resisting.

Table does not have a vinyl covered foam pad upholstering.

Foam pad has voids.

Foam pad or vinyl covering has objectionable odor.

Table finish is not smooth and uniform or free of scratches, splinters, and discoloration.

Table corners are not rounded or edges smooth.

Sampling for tests. Sampling for tests including dimensional test, shall be conducted in accordance with MIL-STD-105, with an AQL of 2.5 (percent defective) and an inspection level of S-3. The unit of product for test purposes shall be one treatment table.

Tests

Load Test

The fully assembled treatment table shall be tested with a distributed load of 300 pounds on top. Failure to be free from wobble or distortion shall constitute a defect.

Check the source to verify that this is the currentversion before use.

The fully assembled treatment table shall be tested with an empty load. Failure to be free from wobble or any unsteadiness shall constitute a defect.

Contractor certification. The contractor shall certify that the product offered meets the salient characteristics of this description and conforms to the producers' own drawings, specifications, standards, and quality assurance practices. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Regulatory requirements.

Federal Food, Drug and Cosmetic Act. If the product covered by this document has been determined by the U.S. Food and Drug Administration to be under its jurisdiction, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of the Federal Food, Drug and Cosmetic Act, as amended, and regulations promulgated thereunder. In addition, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of all other applicable Federal, State, and local statutes, ordinances, and regulations.

Recovered materials. The offeror/contractor is encouraged to use recovered material in accordance with Public Law 94-580, as amended, and as implemented by Federal Acquisition Regulation Subpart 23.4 to the maximum extent practical.

Preservation, packaging, packing, labeling, and marking. Unless otherwise specified, preservation, packaging, and packing shall be to a degree of protection to preclude damage to containers and/or contents thereof under normal shipping conditions, handling, etc., involving shipment from the supply source to the receiving activity, plus reshipment from receiving activity, and shall conform to applicable carrier's rules and regulations. Intermediate and exterior package quantities and labeling and marking shall be as specified in the contract and/or order.
