MIL-C-46577D
AMENDMENT 1
20 May 1981

MILITARY SPECIFICATION

CARTRIDGE, 20MM, ARMOR PIERCING INCENDIARY, M53

This amendment forms a part of Military Specification MIL-C-46577D dated 7 December 1973, and is approved for use by all Departments and Agencies of the Department of Defense.

PAGE 10

paragraph 4.4.4, Table I, 9/ Accuracy: Change "If the average mean radius of the sample cartridges exceeds the applicable requirement, a retest sample of 100 cartridges shall be tested. The lot shall be rejected if the average mean radius of 10 accuracy targets exceeds 15 inches at the same range." to "If the average mean radius of the sample cartridge exceeds the applicable requirement, a retest sample of 100 cartridges shall be tested for the accuracy parameter only. The lot shall be rejected if the average mean radius of the 10 accuracy targets exceeds the requirement."

Paragraph 4.4.4, Table I, 11/ Incendiary Performance: Change "If one or two cartridges fail to comply with the requirement, a second sample of 20 cartridges shall be tested." to "If one or two cartridges fail to comply with the requirement, a second sample of 20 cartridges shall be tested for the incendiary performance parameter only."

PAGE 14

Add to paragraph 4.5.6 "The 200 yard range may be reduced by 11.5 yards. to accommodate combining test phases. Any variation from 200 yard range requires direct proportional adjustment of the average mean radius."
