COMMERCIAL ITEM DESCRIPTION

INSECT REPELLENT, PERSONAL APPLICATION, STICK

The General Services Administration has authorized the use of this commercial item description.

Abstract. The Deet based insect repellent in push-up stick form is for application to human skin to repel mosquitoes, gnats, ticks, stable flies, sand flies, black flies, fleas, and chiggers.

1. SALIENT CHARACTERISTICS

1.1 Description. The insect repellent stick shall contain a minimum of 31 percent by weight of N,N-Diethyl-m-Toluamide (Deet) and 2.0 percent by weight of Deet Isomers (o,p), and 67 percent by weight of inert ingredients. The product shall be in push-up stick form.

1.1.1 Base material. The base material may contain a fragrant masking agent for the active ingredients. The product shall not have a rancid odor.

1.1.2 Consistency. The consistency of the product shall be such that its softening point shall be 71°C ± 5°C when tested in accordance with the "Procedure for Materials Having Softening Points 80°C or Below" of ASTM Test Method E28 Softening Point by Ring-and-Ball Apparatus.

1.1.3 Color. The product shall be a light yellow transparent solid gel which leaves no color on the wearer after application to the skin.

Beneficial comments (recommendations, additions, deletions) and any pertinent data which may be used in improving this document should be addressed to: U.S. Army Natick Research, Development, and Engineering Center, Natick, MA 01760-5018, by using the Standardization Document Improvement Proposal (DD Form 1426) appearing at the end of this document or by letter

AMSC N/A FSC 6840

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T08:38Z
Check the source to verify that this is the current version before use.

1.1.4 Labeling. Labeling shall be in compliance with the requirements of 40 CFR Part 162 the Federal Insecticide, Fungicide, and Rodenticide Act as amended. Labels shall be approved by the Pesticide Registration Division of the Environmental Protection Agency (EPA).

2. QUALITY ASSURANCE

2.1 Certification. The contractor shall certify, and maintain substantiating evidence, that the product offered meets the salient characteristics and requirements of this Commercial Item Description, and that the product conforms to the producer's own drawings, specifications, standards, and quality assurance practices. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

2.2 Regulatory requirements. The offeror/contractor is encouraged to use recovered material in accordance with Public Law 94-580 to the maximum extent practicable.

3. PACKAGING

3.1 Overseas.

3.1.1 Packaging. One ounce of repellent shall be packaged in a stick-type cartridge with a push-up mechanism. The unit shall be overwrapped to contain leakage of contents. Twelve units shall be packaged in a paperboard box.

3.1.2 Packing. One hundred twenty units shall be packed in a fiberboard box conforming to style RSC, grade 275 of PPP-B-636. The box shall be closed in accordance with the appendix of PPP-B-636.

3.1.3 Palletization. Boxes shall be palletized on a 4-way entry pallet in accordance with load type Ia of MIL-STD-147. Each prepared load shall be bonded with straps in accordance with bonding means C and D or film bonding means F or G. Pallet pattern shall be in accordance with the appendix of MIL-STD-147.

3.1.4 Marking. Marking shall be in accordance with MIL-STD-129.

3.2 Domestic.

3.2.1 Packaging, packing, palletization, and marking. Packaging, packing, palletization, and marking shall be in accordance with ASTM D 3951.

4. NOTES

4.1 Ordering data. Acquisition documents must specify the following:

a. Title, number, and date of this document.
