INTERIM COMMERCIAL ITEM DESCRIPTION

CROMOLYN SODIUM INHALATION AEROSOL, ORAL

The General Services Administration has authorized the use of this Interim Commercial Item Description which was developed by the Defense Personnel Support Center, Directorate of Medical Materiel, DPSC-RST, 2800 South 20th Street, Philadelphia, PA 19101, based upon currently available technical information.

Salient Characteristics:

Shall be Cromolyn Sodium Inhalation Aerosol, Oral.

Shall be a micronized suspension of cromolyn sodium and sorbitan trioleate, with dichlorotetrafluorethane and dichlorodifluoromethane as propellants suitable for oral inhalation.

The valve shall deliver in each metered dose, 800 micrograms (mcg) of cromolyn sodium within the applicable assay limits.

Each container shall deliver not less than 200 metered doses.

Workmanship. The product shall be free from defects which detract from its appearance or impair its serviceability.

Unit. Package (PG). Shall be supplied 14.2 g in a commercially available container. Container shall be supplied together with an oral adapter equipped with a metered dose valve and protective cap. When container is used in conjunction with oral adapter, the assembled unit shall deliver at least 200 single oral inhalations. One package containing one container together with an oral adapter equipped with a metered dose valve, as specified, constitutes one unit.

AMSC/NA FSC 6505

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.
