INTERIM AMENDMENT

TO

FEDERAL SPECIFICATION

PORTFOLIO, PLASTIC

This interim amendment was developed by the General Services Administration, Federal Supply Service, Washington, DC 20406, based upon currently available technical information. It is recommended that Federal Agencies use it in procurement and forward recommendations for changes to the preparing activity at the address shown above.

The General Services Administration has authorized the use of the interim amendment as a valid exception to L-P-600A, dated October 10, 1972.

PAGE 2

Table I Line 2 Type I Delete 3000 Substitute 2500.

PAGE 3

Paragraph 3.1.5 Line 2 Delete 0.200, Substitute 0.150.

Paragraph 3.1.6 Line 2 Delete 8-3/8, Substitute 7-1/2.

Paragraph 3.2.1.1 Line 4 Delete 50, Substitute 40.

Paragraph 3.2.2.1 Delete and Substitute the following:

3.2.2.1 Body. The body of the portfolio shall conform to the base material requirements specified in 3.1.1 and Table I. The body shall be constructed of not more than three pieces of

base material. Seams shall be stitched or shall be sealed by high-frequency electronic sealing. Stitched seams shall conform to stitch type 301 or 401 and seam type SSa-1 of FED-STD-No.751A. All stitched seams shall be covered with cloth or plastic binding. Rivets may be employed on stitched seams to increase the strength of the seams. The seams shall be free from skips, and shall be straight and in good appearance. Free edges shall be embossed to provide a selvage effect. The tensile strength of the seams shall be not less than 50 percent of the tensile strength of the base material, when tested as described in 4.4.2.5. The side and bottom gussets shall, after completion of the portfolio manufacturing process, fold inward in a neat and orderly fashion. The design and forming process of the gussets shall be such, that when the portfolio is closed, the flap shall cover the whole opening and shall require no additional action by the user.

Paragraph 3.2.2.1.1 Delete and substitute the following:

3.2.2.1.1 Steel Tuck-Type Fastener. Each portfolio shall be supplied with two fasteners conforming to the requirements specified in 3.1.4. The hasps shall be securely attached to the flap by two rivets, or two staples. The tuck type staples shall be securely attached to the front of the portfolio. No parts of the hasp or staple fixture shall be visible on the underside of the flap or from the inside of the portfolio.

Paragraph 3.2.2.1.2, Line 4, after 1/4 inch add "minimum".

Paragraph 3.2.2.2 1 Delete and substitute the following:

3.2.2.2 Dimensions. The portfolio, when closed, shall measure 15-1/2 + 1/4 inches wide, by 11-1/4 + 1/4 inches high. When fully expanded, the side and bottom gussets shall have a minimum expansion of 2 inches, (measurements shall be taken approximately 5 inches from the top of the portfolio).

Paragraph 3.2.2.4 Line 5 & 8. Delete "FSN" and substitute "NSN".

Paragraph 3.3 Delete and substitute the following:

3.3 Workmanship. The portfolios shall be free from defects or imperfection which adversely affect appearance, impair serviceability, or constitute a hazard to the users. Some of the defects are, but not restricted to:

Check the source to verify that this is the current version before use.

Improper fastening of any hardware (including handles), which includes mis-alignment or damage in the manufacturing process.

Improper molding and seam closing.

PAGE 4

Paragraph 4.2.3. Delete the fourth sentence and substitute the following:

4.2.3. Sampling for Visual & Dimensional Examination.

The inspection level shall be S-2, AQL 4.0 percent defective for dimensions. Inspection level shall be Level II, AQL 4.0 percent defective for all other defects.

PAGE 6

Paragraph 5.2.2.2 delete and substitute the following:

5.2.2.2 Type II. The portfolios, packaged as specified in 5.1.2.2, shall not require additional packing for shipment.
