MILITARY SPECIFICATION

CONVERTER, LIQUID OXYGEN GCU-10/A

This amendment forms a part of Military Specification MIL-C-25974D, dated 1 April 1983 and is approved for use by the Department of the Air Force, and is available for use by all Departments and Agencies of the Department of Defense.

PAGE 2

3.3.1: Delete entirely and substitute the following:

"3.3.1 Schematic diagram. The converter shall be designed in accordance with the schematic diagram shown in figure 5."

3.3.2: Add paragraph 3.3.2 which was erroneously deleted from Revision D:

"3.3.2 Design strength. The filled converter shall be designed to withstand the following "g" forces without damage:

Vertical (down)	14g
Vertical (up)	6g
Lateral	6g"

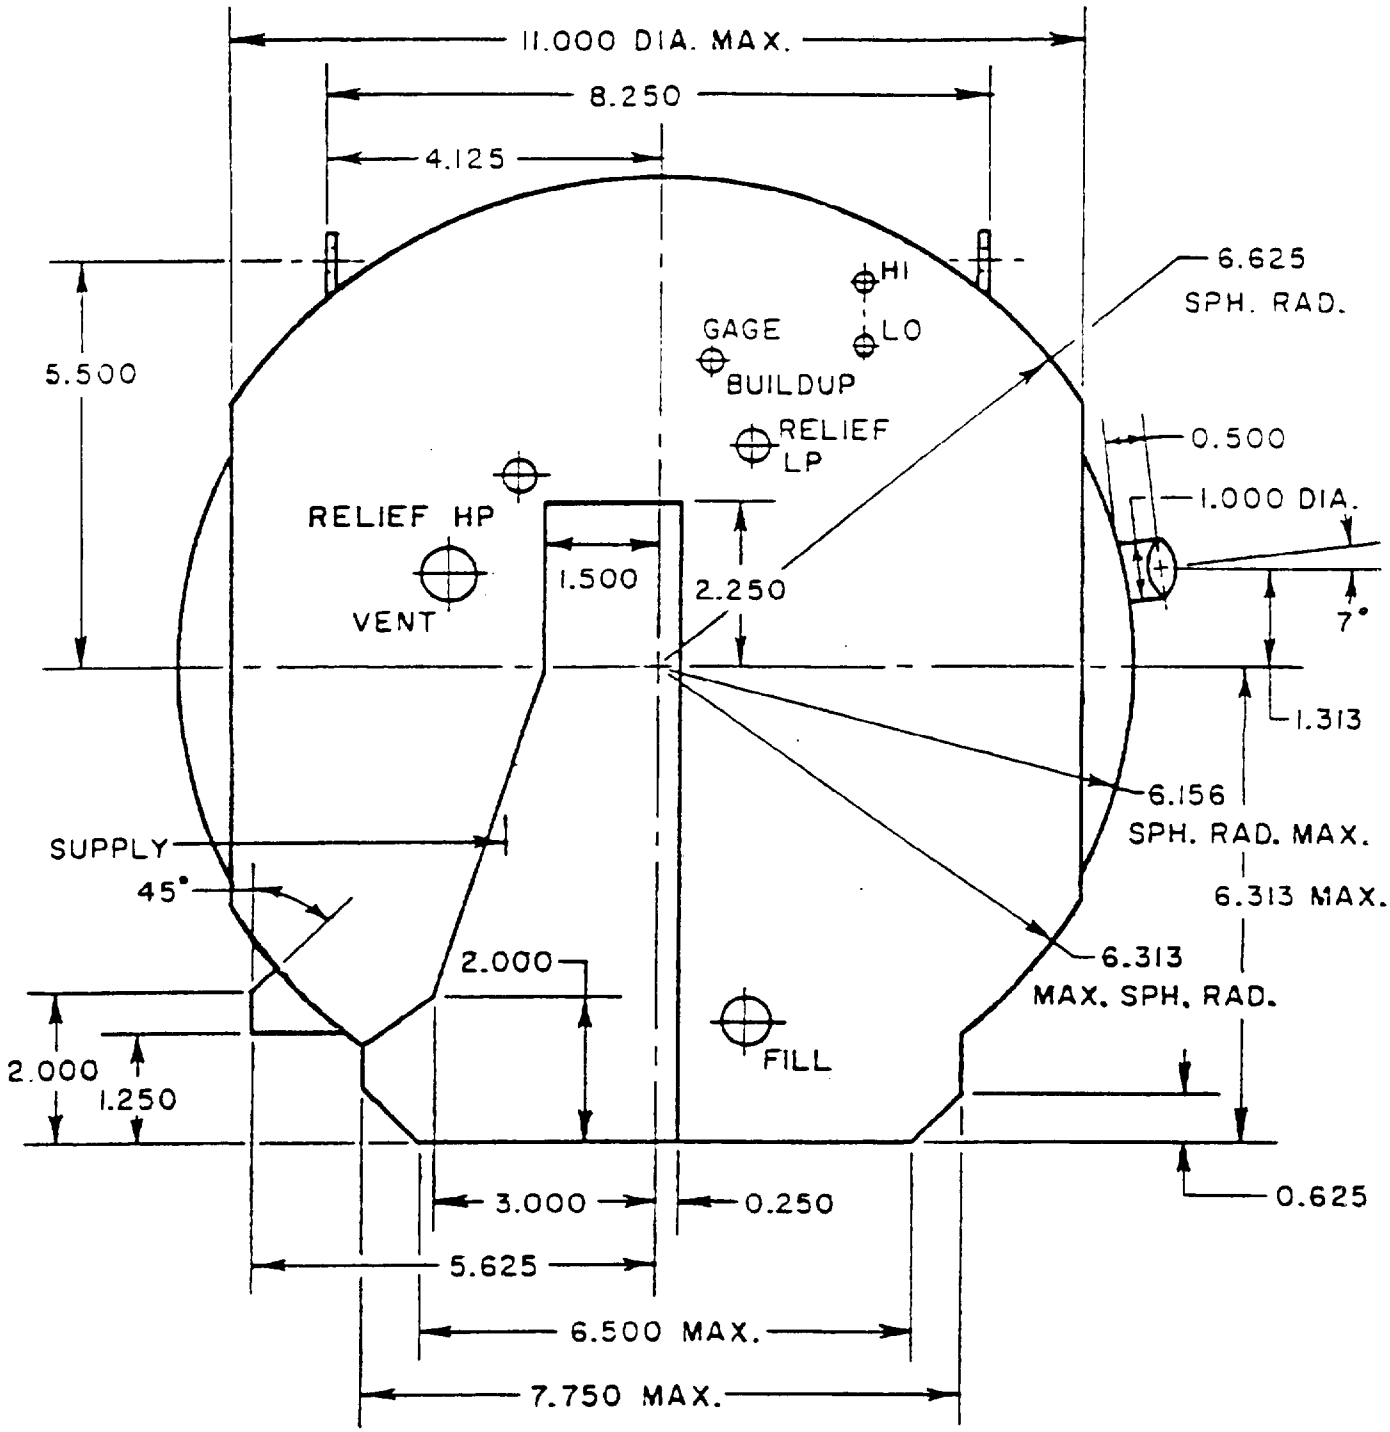

Add figures 1 through 6 which were erroneously left out of revision D. These figures form pages 2 through 7 of this amendment.

LIQUID OXYGEN (LITERS)	NORMAL CAPACITANCE (pF)
0	123.5
2	135.1
4	146.7
6	158.3
8	169.9
10	181.5
