14 December 1967

MILITARY SPECIFICATION

NOMENCLATURE ASSIGNMENT, CONTRACTORS METHOD FOR OBTAINING

This specification is approved for use by the Department of the Air Force, and is available for use by all Departments and Agencies of the Department of Defense

1. SCOPE

1.1 Scope. This specification establishes requirements for the contractor in obtaining assignment of nomenclature for airborne and ground photographic, electronic, and aeronautical and support equipment. Type designation procedures are explained in MIL-STD-155 for photographic equipment, MIL-STD-196 for electronic equipment, and MIL-STD-875 for aeronautical and support equipment.

2. APPLICABLE DOCUMENTS

2.1 Issues of documents. The following documents of the issue in effect on date of invitation for bids or request for proposal, form a part of this specification to the extent specified herein.

STANDARDS

MILITARY

MIL-STD-155	Joint Photograhic Type Designation System
MIL-STD-196	Joint Electronics Type Designation System
MIL-STD-280	Definitions of Item Levels, Item Exchangeability, Models and Related Terms
MIL-STD-875	Type Designation System for Aeronautical and Support Equipment

(Copies of specifications, standards, drawings, and publications required by contractors in connection with specific procurement functions should be obtained from the procuring activity or as directed by the contracting officer.)

3. REQUIREMENTS

3.1 Nomenclature assignment. The contractor shall obtain and use nomenclature (item name and type designation) in accordance with this specification.

Beneficial comments (recommendations, additions, deletions) and any pertinent data which may be of use in improving this document should be addressed to: ASD/ENESS, Wright-Patterson AFB, OH 45433 by using the self-addressed Standardization Document Improvement Proposal (DD Form 1426) appearing at the end of this document or by letter.

FSC MISC

Check the source to verify that this is the current version before use.

3.1.1 Photographic items. Nomenclature is required for preproduction and production models of systems, sets, groups, units, accessories, and attachments of photographic items within the scope of MIL-STD-155. The type designations shall be in accordance with MIL-STD-155 and shall not apply below the unit level.

3.1.2 Electronic items. Nomenclature is required for preproduction and production models of centrals, centers, systems, sets, groups, and units including plug-in units within the scope of MIL-STD-196. The type designations shall be in accordance with MIL-STD-196 and shall not apply below the unit level.

3.1.3 Aeronautical and support equipment. Nomenclature is required for preproduction and production models of equipment, units and components within the scope of MIL-STD-875. The type designations shall be in accordance with MIL-STD-875 and shall not apply below the unit level.

3.2 Nomenclature meeting. Fifteen days after the award of contract, the contractor shall schedule a conference through the contracting officer or Systems Program Office, with the appropriate nomenclature activity, if desired. Procedures to be followed in the preparation of nomenclature descriptions and the application for and assignment of nomenclature will be discussed. The contractor should not prepare any nomenclature descriptions prior to the meeting. The appropriate Air Force responsible engineering agency will have the final decision regarding items to be nomenclatured.

3.3 Official nomenclature assignment. The appearance of nomenclature for items covered by this specification in invitations for bids, contracts, specifications, drawings and associated documents, does not constitute official assignment. Prior to the use of such nomenclature (including suffix letters), the contractor shall obtain official assignment or confirmation of nomenclature. Assignment of official nomenclature on previous contracts does not relieve the contractor of the requirements of this specification. Under no condition shall the manufacturer assume or otherwise receive nomenclature except by official assignment through the procedures outlined herein. Nomenclature shall be used as assigned and confirmed by the procuring activity.

3.4 Changes to type designation of systems, sets, groups and units. Whenever an engineering change or other modification which affects substitute item or interchangeable item status, as defined in MIL-STD-280, is to be implemented in a type designated preproduction or production model, the type designation shall be changed and the contractor shall obtain and use the changed type designation in accordance with the following:

3.4.1 Type designation change when the modified unit is not an interchangeable item with the previous unit. When the modified unit is not an interchangeable item with the previous unit, a new type designation will be assigned. For example: In accordance with MIL-STD-155, a modified KA-63A may be assigned the new type designation KA-90A; in accordance with MIL-STD-196, a modified RT-635/APN may be assigned the new type designation RT-976/APN; and in accordance with MIL-STD-875, a modified AAU-34/A may be assigned the new type designation AAU-55/A.

3.4.2 Type designation change when the modified unit becomes a substitute item for all the previous units. When the modified unit becomes a substitute item for the previous unit, a suffix letter will be added to the type

Check the source to verify that this is the current version before use.

designation. For example: In accordance with MIL-STD-155, a KA-63A would become KA-63B; in accordance with MIL-STD-196, a RT-635/APN would become RT-635A/APN; and in accordance with MIL-STD-875, an AAU-34/A would become AAU-34A/A.

3.4.3 Type designation change to higher level elements when modified. Whenever a type designated unit is modified in accordance with 3.4.1 or 3.4.2, the type designation of its next element and all progressively higher elements shall be changed, up to and including the element where interchangeability or substitutability is maintained. If interchangeability or subsitutability of the higher element is maintained, the type designation shall be changed by adding a suffix letter to indicate that a modification has been made below the higher element.

3.5 Nomenclature assignment requests.

3.5.1 Application. The contractor shall prepare and submit a separate Request for Nomenclature, DD Form 61, for each new configuration item (CI) e.g., centrals, systems, sets, equipment, groups, units, components, accessories and attachments requiring a type designation. A DD Form 61 shall also be submitted upon modification of a CI by an approved Engineering Change Proposal (ECP) requiring a change in type designation, as required by 3.4.

3.5.2 Submittal of requests. The contractor shall submit, when required by the contract, requests for nomenclature DD Form 61, 120 days prior to the need for such approved nomenclature for use in specifications, drawings, or technical manuals. Normally, 90 days are required for processing the contractors requests, after submission of same, by the appropriate Air Force nomenclature control point. Expedited action shall be requested by the contractor when the delivery date is less than 120 days after contract date.

3.5.3 Nomenclature assignment requests for previously nomenclatured items which are modififed. Modifications to units which have been assigned nomenclature shall require the submittal of a DD Form 61 for each unit modified including a DD Form 61 for the group and set, as applicable, of which the unit is a part. The above applies only to modifications which affect substitute or interchangeable item status as defined in MIL-STD-280.

3.5.4 Nomenclature assignment requests for systems, sets, groups, and units modified after delivery. Requests for nomenclature shall be submitted by the contractor for systems, sets, groups and units which are to be modified as described in 3.4, provided such items require nomenclature in accordance with this specification.

3.5.5 Request for nomenclature. The request for nomenclature, DD Form 61 (data package), shall be prepared by the contractor in accordance with 3.7 when specified on the Contract Data Requirements List (CDRL), DD Form 1423. (see 6.2)

3.5.5.1 Copies to be submitted. Eight copies (or as specified in the CDRL, DD Form 1423) of each request for nomenclature shall be sent to the appropriate responsible Air Force engineering agency or Systems Program Office (SPO) for routing to the appropriate nomenclature control point for action, and one copy of the block diagram and outline drawing, when specified.

Source: https://assist.dla.mil -- Downloaded: 2026-10-17T08:34Z
Check the source to verify that this is the current version before use.

3.5.5.2 Identification of requests. Each request for nomenclature shall be serially numbered as specified in MIL-STD-155, MIL-STD-196, or MIL-STD-875, as applicable.

NOTE: Contractors awarded contracts by the Space Missile Systems Organization (formerly Space Systems Division, SSD, and Ballistics Systems Division, BSD) shall use the block of numbers previously assigned to identify each request for nomenclature.

3.6 Nomenclature confirmation requests. If the system, set, group or unit is an interchangeable item with one previously supplied by the same or another contractor, a letter with a statement to this effect, listing both the former and current contract numbers, the item name, type designation, design activity and part number, shall be submitted in lieu of a DD Form 61. Such a letter shall be sent as specified in 3.5.5.1.

3.7 Preparation of DD Form 61. Preparation of the DD Form 61 for photographic equipment shall be in accordance with MIL-STD-155, for electronic equipment in accordance with MIL-STD-196, and for aeronautical and support equipment with MIL-STD-875.

3.8 Limitation on nomenclature approval. The assignment of photographic, electronic, or aeronautical and support system nomenclature does not constitute approval of any item of equipment, nor approval for the use of any particular item in a specific equipment and does not waive any requirement of the contract involved.

3.9 Contractor notification. The contractor will be notified of the official nomenclature assignment by the Government Contracting Officer or Program Office, as applicable. Notification will not be forwarded on revised nomenclature requests involving technical changes unless these result in a change in the item name or type designation.

4. QUALITY ASSURANCE PROVISIONS

4.1 Responsibility for inspection. Unless otherwise specified in the contract, the contractor is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract, the contractor may use his own or any other facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure supplies and services conform to prescribed requirements.

4.2 Quality conformance inspection. Prior to submission, all nomenclature requests for each item for which nomenclature is required shall be inspected by the contractor for quality of presentation and format, required number of copies, accuracy and completeness of information and technical data, and conformance to security requirements. Failure to meet any applicable requirement specified herein shall be considered cause for rejection.

5. PACKAGING

5.1 Packaging requirements. The delivery of the documents covered by this specification shall be as specified by the procuring activity.

Check the source to verify that this is the current version before use.

6. NOTES

6.1 Intended use. This specification establishes the requirements for obtaining official assignment of nomenclature and conformation of existing nomenclature for items of photographic, electronic, and aeronautical and support equipment acquired by the Air Force.

6.2 Ordering data. Procurement documents for items of photographic, electronic, aeronautical and support equipment within the scope of this specification, which require nomenclature, shall specify the following:

a. Title, number, and date of this specification

b. Items of data required as specified on DD Form 1664, Data Item Description (DID) DI-E-3126.

6.2.1 Contract data requirements. Data specified in 3.5.5 and 3.6 will be as identified on the DD Form 1664, Data Item Description DI-E-3126, when specified for delivery on a DD Form 1423 incorporated into the contract.

6.3 Data. For the information of contractors and contracting officers any of the data required by the documents listed in section 2 of the specification or lower-tier documents referenced therein need not be prepared for the Government and need not be furnished to the Government unless specified in the contract or order. The data to be furnished should be listed on DD Form 1423 (Contractor Data Requirements List) which will be attached to and made part of the contract or order.

6.4 Definitions. For the purpose of this specification the following definitions shall apply:

6.4.1 Nomenclature. Nomenclature is the combination of the approved item name and type designation.

6.4.1.1 Item name. A name published in the Federal Cataloging Handbook H6 or that name approved for use by Cataloging and Standard Office, AFLC/CASO/LODCC.

6.4.1.2 Type designation. A combination of letters and numerals arranged in a specific sequence to provide a short significant method of identifying the equipment by type.

6.4.2 Terms defined. The term equipment as defined in MIL-STD-875 shall be interpreted as set in this specification. The terms component and unit as defined in MIL-STD-875 shall be interpreted as unit in this specification.

6.4.3 Equipment division. The following are as defined in MIL-STD-280:

a. Accessory
b. Attachment
c. Group
d. Part
e. Set
f. Subassembly
g. System
h. Unit
i. Assembly.

Check the source to verify that this is the current version before use.

6.4.4 Interchangeable item. As defined in MIL-STD-280. (The new article must be two way interchangeable with an existing article.)

6.4.5 Models. The following are as defined in MIL-STD-280.

a. Preproduction model
b. Production model.

6.4.6 Substitute item. As defined in MIL-STD-280. (The new article must be one way interchangeable with an existing article, but not vice versa.)

6.5 Changes from previous issue. Asterisks are not used in this revision to identify changes with respect to the previous issue, due to the extensiveness of the changes.

INSTRUCTIONS: In a continuing effort to make our standardization documents better, the DoD provides this form for use in submitting comments and suggestions for improvements. All users of military standardization documents are invited to provide suggestions. This form may be detached, folded along the lines indicated, taped along the loose edge *(DO NOT STAPLE)*, and mailed. In block 5, be as specific as possible about particular problem areas such as wording which required interpretation, was too rigid, restrictive, loose, ambiguous, or was incompatible, and give proposed wording changes which would alleviate the problems. Enter in block 6 any remarks not related to a specific paragraph of the document. If block 7 is filled out, an acknowledgement will be mailed to you within 30 days to let you know that your comments were received and are being considered.

NOTE: This form may not be used to request copies of documents, nor to request waivers, deviations, or clarification of specification requirements on current contracts. Comments submitted on this form do not constitute or imply authorization to waive any portion of the referenced document(s) or to amend contractual requirements.
