COMMERCIAL ITEM DESCRIPTION

NOODLES, EGG, ENRICHED

The U.S. Department of Agriculture has authorized the use of this Commercial Item Description in preference to Type I, Class B (Enriched) of Federal Specification N-N-591.

This Commercial Item Description (CID) covers enriched egg noodles, packed in commercially acceptable containers, suitable for use by the Federal Government.

Salient characteristics.

Egg noodles shall consist of dried ribbon-shaped or small or large bow-shaped units of dough made from durum flour or semolina, or combinations thereof, egg products, and water. Egg noodles shall be enriched in accordance with the following requirements as specified in the U.S. Standard of Identity for Enriched Noodle Products, 21 CFR, Part 139.155:

Enriched with	Milligrams per pound of noodle product
Thiamine	4 - 5
Riboflavin	1.7 - 2.2
Niacin or niacinamide	27 - 34
Iron	13 - 16.5

The appearance of the noodles shall not be materially affected by an aggregate of black specks which are larger than 1/32 inch in diameter. The product shall also not contain grossly distorted units or units cracked in a checkered pattern over more than 10 percent of the product surface. The product shall contain not more than 10 percent by weight of these defects, (i.e.; black specks, distorted units, and cracked units).

Egg products used in egg noodles shall be processed under continuous U.S. Department of Agriculture (USDA) inspection in accordance with USDA Regulations Governing the Inspection of Eggs and Egg Products, 7 CFR, Part 59.24.

FSC 8920

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T08:31Z
Check the source to verify that this is the current version before use.

When cooked as directed on the package, the noodles shall be firm, but tender, have a characteristic flavor, odor, and color, shall not break up during cooking, and shall not adhere together in a mass that cannot be separated with a fork or similar utensil. The cooked noodles shall be free from objectionable flavor and odor (rancid, musty, bitter, sour, etc.).

The dimensions of noodles shall be as follows:

	Ribbon-shaped noodles	Bow-shaped noodles	
		Small	Large
Width	- 1/4 ± 1/16 inch	---	1-1/4 ± 1/16 inch
Thickness	- 0.033 ± 0.006 inch	0.031 ± 0.001 inch	0.037 ± 0.001 inch
Length	- 2-3/4 ± 3/4 inch	5/8 ± 1/16 inch	1-1/2 ± 1/16 inch

Analytical requirements.

Chemical analyses shall be made in accordance with the Official Methods of Analysis of the Association of Official Analytical Chemists (AOAC). All egg noodles shall conform to the following analytical requirements:

Moisture	- 13.00 percent maximum
Ash 1/	- 1.25 percent maximum
Protein 1/	- 13.00 percent minimum
Egg solids 1/ 2/	- 5.50 percent minimum

1/ Percent of ash, protein, and egg solids shall be calculated on a moisture-free basis.

2/ The percent egg solids shall be determined by the AOAC Method, Chapter: Cereal Foods, Section: Wheat Flour, Methods: Lipids-Official Final Action and Lipid Phosphorus - Official Final Action. The Standard of Identity for Egg Noodles, 21 CFR, 139.150, requires a minimum of 5.5 percent egg solids. Egg noodles shall contain not less than the following amounts of lipid phosphorus:

Egg noodles prepared with egg yolk solids - 0.120 percent
Egg noodles prepared with whole egg solids - 0.090 percent

Cook test.

The product shall be cooked in accordance with the manufacturer's instructions. The cooked product shall be firm but tender, have a characteristic flavor, odor, and color, and shall not adhere together in a mass that cannot be separated by a fork or similar utensil.

Contractor's certification.

By submitting an offer, the contractor certifies that the product offered meets the specified salient characteristics and requirements of this CID; conforms to the producer's own specifications and standards, including product characteristics, manufacturing procedures, quality control procedures, and storage and handling practices; has a national or regional distribution from storage facilities located within the United States, its territories, or possessions; and is sold on the commercial market. The Government reserves the right to determine proof of such conformance prior to the first delivery from point of origin and any time thereafter, up to and including delivery at final destination, as may be necessary to determine conformance with the provisions of the contract.

Regulatory requirements.

The delivered product shall comply with all applicable Federal and State mandatory requirements and regulations relating to the preparation, packaging, labeling, storage, distribution, and sales of the product in the commercial marketplace. All deliveries shall conform in every respect to the provisions of the Federal Food, Drug, and Cosmetic Act and regulations promulgated thereunder.

Quality assurance.

When required in the solicitation, contract, or purchase order, the Federal Grain Inspection Service (FGIS), U.S. Department of Agriculture, will determine the quality assurance of the egg noodles according to FGIS procedures. The product shall be examined and/or analyzed in accordance with applicable provisions in the CID, and when applicable, the United States Standards for Condition of Food Containers currently in effect on the date of the solicitation.

Preservation, packaging, packing, labeling, and marking.

The egg noodles shall be preserved, packaged, packed, labeled, and case marked in accordance with good commercial practice. Commercial labeling and packaging, as may be augmented by the solicitation, contract, or purchase order, shall be acceptable. Shipping containers shall comply with the National Motor Freight Classification or Uniform Freight Classification, as applicable.

For Department of Defense procurements (Only).

The following requirements are applicable when specified by the contracting officer.

A. Commercial packaging. One or five pounds of product shall be packaged in a paperboard box or plastic bag, or 10 pounds or product shall be packaged in a plastic bag in accordance with good commercial practice.

B. Commercial packing. Twelve 1-pound packages; one, two, or four 5-pound packages; or one 10-pound package shall be packed in fiberboard boxes in accordance with the National Motor Freight Classification or Uniform Freight Classification, except metal fasteners shall not be used in the final closure of fiberboard boxes.

C. Export packaging. The product shall be packaged in paperboard boxes or plastic bags as specified in paragraph A.

D. Export packing. Twelve 1-pound packages; one, two, or four 5-pound packages; or one 10-pound package shall be packed in a snug-fitting, fiberboard box constructed and closed in accordance with Style RSC, Grade W5c or W5s of PPP-B-636. Each box shall have the contents enclosed in a waterproof case liner, fabricated and sealed in accordance with MIL-L-10547 for subsistence items. Exposed metal fasteners on the inside of the fiberboard box shall be covered with pressure-sensitive tape or paperboard pads to protect the case liner from mechanical damage. Alternatively, the product commercially packed in fiberboard boxes, shall be overpacked in the box heretofore specified. Prior to overpacking, the commercial pack shall be enclosed in the waterproof case liner heretofore specified. Each fiberboard box shall be reinforced with nonmetallic strapping or pressure-sensitive adhesive, filament-reinforced tape in accordance with the appendix of PPP-B-636.

E. Unit loads (commercial and export). Shipping containers shall be arranged in unit loads in accordance with MIL-L-35078. When unit loads are strapped, the strapping shall be limited to nonmetallic strapping, except for Type II, Class F loads.

F. Labeling (commercial and export). Labeling of interior packages shall be in accordance with good commercial practice. Cooking instructions shall be printed on each package label.

G. Marking (commercial and export). Marking of shipping containers and unit loads shall be in accordance with MIL-STD-129.
