COMMERCIAL ITEM DESCRIPTION

PRESERVES (OR JAMS), FRUIT

The U.S. Department of Agriculture has authorized the use of this Commercial Item Description in preference to Federal Specification Z-J-196.

Salient characteristics.

The product shall conform to one of the options in the following list, which shall be specified, as required in the contract or purchase order.

Types.

Type I - Fruit preserves (or jams) that are prepared from a single fruit (except apple) listed in Group I or Group II are "Type I".

Type II - Fruit preserves (or jams) that are prepared from more than a single fruit listed in Group I or Group II are "Type II".

Kinds.

GROUP I

Any one singly or in combination with not more than four of the following: 1/

Blackberry (other than dewberry)
Black raspberry
Blueberry
Boysenberry
Cherry
Crabapple
Damson, damson plum
Dewberry (other than boysenberry, loganberry and youngberry)
Elderberry
Grape
Grapefruit
Huckleberry
Loganberry
Orange
Pineapple
Raspberry, red raspberry
Rhubarb
Strawberry
Tangerine
Tomato
Yellow tomato
Youngberry

1/ In accordance with the limits specified in the definitions and standards of identity for preserves, jams (21 CFR 150.160).

FSC 8930

ny one singly or in combination with not more than four of the following fruits and fruits in Group I: 1/

Apple (Type II only)
Apricot
Cranberry
Damson, damson plum
Fig
Gooseberry
Greengage, greengage plum
Guava
Nectarine
Peach (clingstone and freestone)
Pear
Plum (other than greengage, plum, and damson plum)
Quince
Red currant, currant (other than black currant)

1/ In accordance with the limits specified in the definitions and standards of identity for preserves, jams (21 CFR 150.160).

Grades.

U.S. Grade A
U.S. Grade B

Sweetening ingredients. Sweetening ingredients may be any of those permitted in quantities permitted by the Food and Drug Administration Standards of Identity for Fruit Preserves and Jams. Specific sweetening agent(s) may be designated in the contract or purchase order.

Chemical analyses. The finished product, on a lot average basis, if required by the purchaser, shall meet the minimum requirements listed in Table I, and the analyses shall be made in accordance with methods listed in Table II, as outlined in the Official Methods of Analysis of the Association of Official Analytical Chemists, as follows:

Check the source to verify that this is the current version before use.

Table I. Minimum chemical requirements

Kind of fruit 1/ 2/	Ash (percent)	K_2O (mg per 100 grams)	P_2O_5 (mg per 100 grams)
Apricot	0.305	176.3	21.1
Blackberry (w/seeds)	0.169	82.5	13.8
Cherry	0.170	93.2	16.8
Plum, damson	0.209	112.6	9.0
Grape, concord	0.188	98.2	10.7
Loganberry	0.177	85.0	11.8
Peaches	0.167	91.7	16.1
Pineapple	0.144	66.6	5.4
Plum, Italian	0.155	82.0	12.9
Raspberry (red)	0.168	82.6	15.1
Raspberry (black)	0.186	94.6	11.9
Strawberry	0.154	79.7	10.5

1/ Chemical requirements are applicable only to the listed kinds of jams.

2/ Type II finished products shall contain the above constituents in amounts proportionate to the fruits in the mixture.

Table II. Methods of analyses

Test	Source		Method
Ash, percent	Chapter:	Fruit and Fruit Products	
	Section:	Ash	
Potassium oxide (K_2O mg/100g)	Chapter:	Fruit and Fruit Products	Rapid Flame Photometric
	Section:	Potassium	
Phosphorus pentoxide (P_2O_5 mg/100g)	Chapter:	Fruit and Fruit Products	Volumetric
	Section:	Phosphorus	

The fruit preserves or jams shall conform to all applicable requirements of the United States Standards for Grades of Fruit Preserves (or Jams).

Unless otherwise specified in the contract or purchase order, the fruit preserves (jams) shall be prepared and processed less than one year prior to purchase by the Federal Government.

Contractor's certification.

By submitting an offer, the contractor certifies that the product offered meets the specified salient characteristics of this Commercial Item Description; conforms to the producer's own specifications and standards, including product characteristics, manufacturing procedures, quality control procedures, and storage and handling practices; has a national or regional distribution from storage facilities located within the United States, its territories or possessions; and is sold on the commercial market. The Government reserves the right to determine proof of such conformance prior to the first delivery from point of origin, and any time thereafter, up to and including delivery at final destination, as may be necessary to determine conformance to the provisions of the contract.

Regulatory requirements.

The delivered product shall comply with all applicable Federal and State mandatory requirements and regulations relating to the preparation, packaging, labeling, storage, distribution, and sales of the product in the commercial marketplace. All deliveries shall conform in every respect to the provisions of the Federal Food, Drug, and Cosmetic Act and regulations promulgated thereunder.

Quality assurance.

When required in the contract or purchase order, the fruit preserves or jams shall be graded and certified as to product grade and condition of containers by the Processed Products Branch, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, as specified in the solicitation or contract. The product grade and condition of containers shall be determined in accordance with the applicable provisions of the U.S. Standards for Grades of Fruit Preserves (or Jams), and the United States Standards for Condition of Food Containers currently in effect on the date of the solicitation and in accordance with the requirements in the applicable Regulations.

Preservation, packaging, packing, labeling, and marking (as appropriate and applicable).

The fruit preserves or jams shall be preserved, packaged, packed, and case marked in accordance with good commercial practice. Commercial labeling and packaging, as may be augmented by the contract or purchase order, shall be acceptable. Shipping containers shall comply with National Motor Freight Classification or Uniform Freight Classification, as applicable.

For Department of Defense procurement.

The following requirements are applicable when specified by the contracting officer:

A. Commercial packaging. One and one-half ounces of product shall be packaged in a size 211 x 011 metal can, 2 pounds and 5 ounces in a size 401 x 411 metal can, 2 pounds in a glass jar, or 1/2 ounce of product shall be unit packaged in an individual serving size boat or cup in accordance with good commercial practice. Twenty boats or cups shall be intermediate packaged in a commercial carton, tray or box.

B. Commercial packing. The product shall be packed in fiberboard containers complying with Uniform Freight Classification or National Motor Freight Classification, as applicable, except metal fasteners shall not be used in the final closure of fiberboard boxes. The quantity and arrangement of packages within the shipping container shall be as specified in Table I. Tiered cans shall be separated with a full length and width fiberboard pad fabricated of the same material as the box.

TABLE I. Quantity and arrangement of packages within shipping container

Package	Quantity	Arrangement 1/		
		Length	Width	Depth
Metal can (211 x 011)	192	6	4	8
Metal can (401 x 411)	24	4	3	2
Glass jar	12	4	3	1
Boats or cups	200	-	-	-

1/ Arrangement of intermediate packaged boats or cups shall be at the option of the supplier.

C. Commercial unit loads. Shipping containers shall be arranged in unit loads in accordance with Type III, Class G of MIL-L-35078, Loads, Unit, Preparation of Nonperishable Subsistence.

D. Export packaging. The product shall be packaged in accordance with (1), (2), or (3), as applicable.

(1) Metal cans. One and one-half ounces of product shall be packaged in a size 211 x 011 can or 2 pounds and 5 ounces in a size 401 x 411 can. The can shall be an open-top style, round metal can, size 211 x 011 or 401 x 411, with a soldered or welded side seam and compound-lined, double-seamed ends. The size 211 x 011 can shall have a one-piece drawn body. The tin plate weight and

inside enameling of cans shall be in accordance with PPP-C-29, Canned Subsistence Items, Packaging and Packing of. The can shall have a sufficient base plate weight and temper to protect the product during shipment and storage. The can shall be coated overall on the outside with a coating conforming to Type I or when specified, Type III of TT-C-495, Coatings, Exterior, for Tinned Food Cans. The filled can shall be sealed under a vacuum.

(2) Glass jars. The product shall be packaged in a 2-pound capacity glass jar in accordance with good commercial practice. The jar shall be sealed with one of the following closures:

Hermetic-friction type closure. The closure shall be a hermetic-friction type side seal closure with a pry-off feature. The closure shall be made from commercial 0.50 pound per base box electrolytic tinplate and shall be fitted with a liner and facing material suitable for the product. The closure shall be equipped with a gasket made from material normally used for the product.

Vacuum, twist-off cap closure. The closure shall be a vacuum, twist-off cap coated inside with an enamel suitable for the product. The inside of the cap shall have a suitable sealing compound to effect a hermetic closure.

(3) Boats and cups. Same as for commercial packaging.

E. Export packing. The product shall be packed in a snug-fitting fiberboard box, constructed, closed and reinforced in accordance with Style RSC or RSC-L, as applicable, Grade V3c, V3s, or V4s of PPP-B-636, Boxes, Shipping, Fiberboard. The inside of each box packed with glass jars shall be fitted with a Grade V15c box liner in accordance with PPP-B-636. Each box packed with glass jars shall be provided with weather-resistant grade fiberboard inner packing to afford protection to the jars from physical damage while in transit or storage. When the product is in trays, the top tray in the pack shall be covered with a chipboard or nontest fiberboard pad having the same dimensions as the outer dimensions of the tray. The quantity and arrangement of packages within the box shall be as specified in Table I. For distribution to Navy, reinforcement shall be restricted to nonmetallic strapping or pressure-sensitive, adhesive-filament reinforced tape in accordance with the appendix of PPP-B-636.

F. Export unit loads. Shipping containers shall be arranged in unit loads in accordance with Type I, Class A of MIL-L-35078.

G. Labeling (commercial and export). Labeling of packages shall be in accordance with good commercial practice and be in compliance with the Federal Food, Drug, and Cosmetic Act and regulations promulgated thereunder.

H. Marking of intermediate packages and shipping containers (commercial and export). Commercial markings for intermediate packages and shipping containers are acceptable, provided the following information is included:

Check the source to verify that this is the current version before use.

National Stock Number	Date of Packaging (month/year) 1/
Item Description	Contract Number
Quantity, Unit of Issue	Name, Address, and Zip Code of Contractor 2/

1/ Day of packaging is also required for intermediate packages and shipping containers of boats or cups.

2/ Intermediate packages do not require this information.

Shipping containers packed with glass jars shall be imprinted on top in boldface type, preferably over two inches in height, as follows:

"FRAGILE - HANDLE WITH CARE"

(or similar precautionary marking)

and

"THIS SIDE UP"

Shipping containers packed with intermediate packages of boats and cups shall be imprinted on top in boldface type between 1 and 1-1/2 inches in height, as follows:

"KEEP REFRIGERATED

(40°F or BELOW)

DO NOT FREEZE"

I. Marking of unit loads (commercial and export). Unit loads shall be marked in accordance with MIL-L-35078.
